Content Creation — Course Summary

A quick reference of what is covered and what you will learn in each session.

QUICK NAVIGATION

Session 01 — Foundations

Session 02 — Shooting

Session 03 — Audio Script

Session 04 — Edit Basics

Session 05 — Edit Advanced Thumbnail

Session 06 — Copywriting

Session 07 — Calendar Branding

Session 08 — Publish Analytics

Session 09 — Capstone

SESSION 01

Foundations

Week 1 â€" Module 1: See and Plan (Foundations)

WHAT YOU WILL LEARN

- ✓ **Explain in their own words** — what content creation is and give one example of content that gives value to an audience.
- ✓ **Define a niche** — and explain why a focused niche beats posting about "everything".
- ✓ **Build a simple audience avatar** — naming who the audience is, what they need, and what stops them from getting it.
- ✓ **Choose three content pillars** — for a chosen niche and explain what kind of content belongs in each.
- ✓ **Explain what a hook is** — and why the first three seconds of a video decide whether the rest is watched.
- ✓ **Write three hook lines** — for a chosen topic in spoken, natural language (not labels).
- ✓ **Distinguish value-driven posting from random posting** — and justify a posting choice using the audience avatar.
- ✓ **Produce a storyboard seed** — â€" a three-line plan of the beginning, middle and end â€" for one of their hook ideas.

SESSION 02

Shooting

Week 1 â€" Module 1: See and Plan (Foundations)

WHAT YOU WILL LEARN

- ✓ **Explain why** — a smartphone camera can produce professional-looking video and list the factors that matter more than the camera itself (stability, light, framing, audio).
- ✓ **Hold or mount a phone** — so that footage is stable and shake-free, using a tripod, stand or improvised bracing.
- ✓ **Use light correctly** — â€" natural window light, a ring light, and simple fill â€" and **avoid backlighting**.
- ✓ **Apply the rule of thirds** — when framing a subject.
- ✓ **Identify and use** — at least four shot types: wide, medium, close-up and over-the-shoulder.
- ✓ **Choose vertical or horizontal** — framing appropriate to the target platform and explain the reason.
- ✓ **Set basic phone camera options** — â€" resolution, focus lock, grid and exposure â€" for a clean shot.
- ✓ **Build a shot list** — that plans at least five shots for a short piece of content.

SESSION 03

Audio Script

Week 1 â€" Module 1: See and Plan (Foundations)

WHAT YOU WILL LEARN

- ✓ **Explain why** — audio quality often matters more than picture quality for whether a video is watched.
- ✓ **Identify common audio problems** — â€" background noise, wind, hum, echo and distance â€" and how they happen.
- ✓ **Record clear speech** — using the phone mic, an earphone mic or an external mic, with the mic close to the speaker in a quiet space.
- ✓ **Write a 30-second script** — using the **hookâ€"bodyâ€"call-to-action (CTA)** structure.
- ✓ **Draw a three-panel storyboard** — matched to a script.
- ✓ **Build a shot list** — that supports the script and storyboard.
- ✓ **Read a script aloud naturally** — (not robotically) and adjust it to fit a time limit.

SESSION 04

Edit Basics

Week 2 â€" Module 3: Production (Editing)

WHAT YOU WILL LEARN

- ✓ **Explain in their own words** — what video editing is and why raw footage must be edited before publishing.
- ✓ **Create a new CapCut project** — set to a vertical **9:16** aspect ratio and **import** footage from the phone or machine.
- ✓ **Identify and describe the four zones** — of the CapCut screen â€" the preview, the timeline, the playhead, and the toolbar â€" and describe what each does.
- ✓ **Perform the five core edit actions** — â€" trim, split, delete, reorder and undo â€" on a real clip without help.
- ✓ **Match their clips to their Session 3 script** — so that the video follows the planned Hook â†' Value â†' CTA order.
- ✓ **Apply basic pacing** — by removing dead air, stumbles and long pauses so the video flows.
- ✓ **Generate auto-captions in CapCut** — and **correct at least three caption errors** (spelling, names, Nigerian words).
- ✓ **Export a finished video correctly for vertical platforms** — â€" 1080 Ã— 1920, 30fps, MP4 â€" and confirm the file plays.
- ✓ **Produce a complete 30â€"60 second first-cut video with captions** — that can be published to Instagram Reels, TikTok or YouTube Shorts.

SESSION 05

Edit Advanced Thumbnail

Week 2 â€" Module 3: Production (Editing and Graphics)

WHAT YOU WILL LEARN

- ✓ **Explain** — what B-roll is and why it keeps viewers watching.
- ✓ **Add B-roll** — as an overlay clip above their talking-head video in CapCut and synchronise it to the spoken words.
- ✓ **Add music** — from the CapCut library (or a royalty-free source), **reduce the music volume** so the voice is clear, and explain why copyrighted songs must be avoided.
- ✓ **Add a transition** — and justify why transitions should be used **sparingly**.
- ✓ **Add a text overlay / title** — (business name, offer or key point) and make it readable.
- ✓ **Apply basic colour/tone adjustments** — (brightness, contrast, saturation) to make footage look consistent and professional.
- ✓ **Export the finished video** — with the correct vertical settings.
- ✓ **Explain what a thumbnail is** — and why it drives clicks.
- ✓ **Design a thumbnail at 1280 Ã— 720 in Canva** — using a template, brand colours, readable text and a face/emotion, and export it as an image.

SESSION 06

Copywriting

Week 2 â€" Module 4: Copywriting and Repurposing

WHAT YOU WILL LEARN

- ✓ **Explain** — the three parts of a caption: the **hook line**, the **value**, and the **CTA**.
- ✓ **Write scroll-stopping hooks** — using at least three formulas (question, bold claim, number/list, mistake, story).
- ✓ **Write a complete caption** — for their own video, following the hookâ€"valueâ€"CTA structure.
- ✓ **Choose the right CTA** — for a given goal (get comments, get orders, get DMs, get followers).
- ✓ **Explain how hashtags work** — and select **3â€"10 relevant hashtags** instead of stuffing 30.
- ✓ **Adapt the same message** — for different platforms â€" Instagram, TikTok, YouTube Shorts and WhatsApp Status.
- ✓ **Repurpose one video into multiple posts** — with different captions and formats.
- ✓ **Use a reusable caption template** — to speed up writing.
- ✓ **Write three captions with hooks and CTAs** — for their edited video, plus a hashtag set.

SESSION 07

Calendar Branding

Week 3 â€” Module 3: Publish, Measure and Package

WHAT YOU WILL LEARN

- ✓ **Explain** — why a planned content calendar beats random posting, in their own words.
- ✓ **Build a realistic one-week content calendar** — with all seven columns filled: date, platform, format, pillar, hook, caption and status.
- ✓ **Choose a varied content-pillar mix** — for the week (educate / promote / entertain / proof), avoiding an all-promo page, and include **at least one lighter or rest day**.
- ✓ **Explain and apply a batch workflow** — â€" shooting several clips in one session, editing in another, writing captions in another â€" and say why it saves time.
- ✓ **Define a simple brand look** — â€" one primary colour and one secondary colour (with hex codes), one or two fonts, a logo placement rule, and a tone of voice.
- ✓ **Assemble a brand kit** — in a simple, free way (a saved Canva design, or a written brand sheet with hex codes) without a paid subscription.
- ✓ **Check posts for consistency** — using a short checklist, and correct off-brand colours, fonts, logo placement or tone.
- ✓ **Plan a week that is realistic for one person** — who has a job or business, rather than an impossible "three posts a day" schedule.
- ✓ **Produce a one-week content calendar and a brand kit** — for their chosen business, ready to feed the capstone.

SESSION 08

Publish Analytics

Week 3 â€" Module 3: Publish, Measure and Package

WHAT YOU WILL LEARN

- ✓ **Explain** — what "publishing" means across TikTok, Instagram, YouTube Shorts and WhatsApp Status, and how it differs from editing or exporting.
- ✓ **Publish** — , **schedule**, or prepare a **ready-to-publish draft / unlisted link** when they prefer to keep content private.
- ✓ **Choose a sensible posting time** — using general guidance and their own audience habits, knowing no time guarantees success.
- ✓ **Write a good first (pinned) comment** — that adds value, repeats a CTA, or starts a conversation.
- ✓ **Explain the basic analytics terms** — in their own words: views, reach, watch time, average view duration, retention, saves, shares, comments, follows.
- ✓ **Read a retention graph** — and say what an early drop (weak hook) and a mid-video drop (slow pacing) mean, then name one specific change.
- ✓ **Handle comments politely and professionally** — â€" praise, questions and complaints.
- ✓ **Apply the ethics of engagement** — : no fake likes, no bought followers, no fake reviews, respect privacy, keep replies professional.
- ✓ **Complete a short analytics note** — that names real numbers and what they suggest.
- ✓ **Publish or prepare one item and record its first-day numbers** — (Assignment 8 and part of the capstone evidence).

SESSION 09

Capstone

Week 3 â€" Module 3: Publish, Measure and Package (final session)

WHAT YOU WILL LEARN

- ✓ **Assemble a complete package** — in `CEA-Content-`: three edited vertical captioned videos, three Canva graphics (two posts + one thumbnail), a one-week calendar, a captions document, and published links or ready-to-publish drafts.
- ✓ **Organise and name files clearly** — so a client could open the folder and understand it without help.
- ✓ **Run a final quality check** — against the rubric and fix the biggest gaps under time-limited build conditions.
- ✓ **Deliver a 3â€"5 minute presentation** — explaining niche, audience, hooks, shot choices, edits and metrics in their own words.
- ✓ **Answer viva ("why") questions** — on niche, hook, music/B-roll legality, B-roll placement, audio ducking, caption structure, retention, consent, thumbnail wording, strongest video, honesty and one improvement.
- ✓ **Give and receive structured peer feedback** — using a simple, respectful form.
- ✓ **Explain the certification conditions** — honestly.
