Digital Marketing — Course Summary

A quick reference of what is covered and what you will learn in each session.

QUICK NAVIGATION

Session 01 — Digital Marketing Foundations

Session 02 — Customer and Positioning

Session 03 — Branding and Online Presence

Session 04 — Content and Social Marketing

Session 05 — SEO and Google Basics

Session 06 — Email and WhatsApp Marketing

Session 07 — Paid Ads Basics

Session 08 — Analytics Tracking and Optimisation

Session 09 — Capstone Integrated Digital Marketing Campaign Plan

SESSION 01

Digital Marketing Foundations

Week 1 â€" Module 1: Foundations

WHAT YOU WILL LEARN

- ✓ **Define** — digital marketing in their own words and explain why it matters for a small Nigerian business, using at least one everyday example from their own phone use.
- ✓ **Name and describe** — the eight main digital marketing channels (website, search, social media, content, email, WhatsApp, paid ads, Google Business Profile) and match each channel to the job it does for a business.
- ✓ **Explain** — the four marketing funnel stages â€" Awareness, Consideration, Conversion and Retention â€" in their own words, and correctly classify at least 4 of 5 given marketing tactics to the correct funnel stage.
- ✓ **Map a simple customer journey** — for a named customer of a real or fictional business, describing what the customer sees, thinks and does at each stage from first hearing about the business to becoming a repeat customer.
- ✓ **Explain why channels work together** — rather than alone, using the running example of Mama Nkechi's Kitchen to show how one customer might move across three or four channels before buying.
- ✓ **Apply the academy's ethics rules** — by stating, in their own words, what honest, permission-based marketing means and why buying followers or posting fake reviews is wrong.

SESSION 02

Customer and Positioning

Week 1 â€" Module 1: Foundations

WHAT YOU WILL LEARN

- ✓ **Explain** — why marketing to "everybody" is marketing to nobody, using at least one concrete example from their own experience as a customer.
- ✓ **Build a complete customer avatar** — for a named individual â€" including demographics (age, location, income), goals, pains, objections and preferred platforms â€" with at least two specific details in each category.
- ✓ **Write a one-sentence value proposition** — that states who the business is for, what it gives them and why it is different, using the formula: *For [who], we [do what] so that [benefit], unlike [alternative].*
- ✓ **List three common customer objections** — for a given business and write one honest counter-message for each.
- ✓ **Write three messaging lines** — aimed at a named pain, each following the formula: *We understand [pain]. That is why we [solution]. [Proof or differentiator].*
- ✓ **Defend a positioning choice** — by explaining, in plain language, why the business should target one specific customer type first rather than trying to serve everyone.

SESSION 03

Branding and Online Presence

Week 1 â€” Module 1: Foundations

WHAT YOU WILL LEARN

- ✓ **Explain** — why a trustworthy online presence is the foundation of digital marketing, using the customer journey from Session 1 to show what happens when the "home" is missing or broken.
- ✓ **Set up or complete a Google Business Profile** — for a fictional or real business, including business name, category, address, phone number, opening hours, photos and description â€” with consistent name, address and phone (NAP) across all platforms.
- ✓ **Describe** — the six essential elements of a simple one-page website or landing page (headline, what you sell, where you are, prices or menu, how to order, trust signals) and build one using a free tool.
- ✓ **Apply basic brand consistency** — â€ business name, logo, two colours, two fonts and one tone of voice â€ across a Google Business Profile, a social profile and a Canva graphic, using only free Canva assets.
- ✓ **List five trust signals** — that make a stranger buy online and explain why each one works.
- ✓ **Complete an online presence audit** — of three real local businesses, scoring each on a checklist of presence elements and identifying the strongest and weakest.

SESSION 04

Content and Social Marketing

Week 2 â€” Module 2: Channels

WHAT YOU WILL LEARN

- ✓ **Explain** — what content marketing is and why it is the engine of social media, using the "empty shop" analogy.
- ✓ **Build a content pillar plan** — with three to five pillars for a small business, each pillar tied to a customer pain, goal or interest from their avatar.
- ✓ **Create a one-week content calendar** — with format, topic, hook, call-to-action and funnel stage for each post â€ realistic for one person with a phone.
- ✓ **Write a story-led post** — using the situationâ€“struggleâ€“solutionâ€“next step structure, with a scroll-stopping hook and a clear call-to-action.
- ✓ **Explain organic reach** — and why it must be earned through saves, shares, comments and watch time rather than bought.
- ✓ **Repurpose one idea into at least three formats** — â€ for example, one menu photo becoming an Instagram post, a WhatsApp broadcast and a video script.
- ✓ **Apply ethical content rules** — â€ honest claims, real photos, no copying, no fake engagement â€ in every piece of content they create.

SESSION 05

SEO and Google Basics

Week 2 â€" Module 2: Channels

WHAT YOU WILL LEARN

- ✓ **Explain** — in simple terms how search engines work â€" crawling, indexing and ranking â€" using the library analogy.
- ✓ **Distinguish** — the three types of search intent (informational, navigational, transactional) and match keywords to the correct intent for a small business.
- ✓ **Find relevant keywords** — for a small business using free tools and observation, and list at least 10 keywords with notes on volume and competition.
- ✓ **Use Google Keyword Planner basics** — to judge keyword search volume and competition, explaining what the numbers mean for a small business.
- ✓ **List the local SEO actions** — that lift a Google Business Profile â€" categories, keywords in the description, photos, posts, reviews, Q&A, and consistent NAP.
- ✓ **Explain honestly** — why "number one on Google" promises are usually false, and what realistic local SEO results look like over time.

SESSION 06

Email and WhatsApp Marketing

Week 2 â€" Module 2: Channels

WHAT YOU WILL LEARN

- ✓ **Explain** — why email and WhatsApp are "owned" channels â€" and why that makes them more valuable than rented channels like social media.
- ✓ **Build a permission-based list** — using at least three legitimate methods (sign-up link, giveaway, checkout question, WhatsApp opt-in) â€" and explain why buying or scraping contacts is wrong.
- ✓ **Draft a simple newsletter** — with one message, one story, one call-to-action and one unsubscribe link â€" following the structure taught in Section F.
- ✓ **Create a WhatsApp broadcast list** — and draft a permission-based WhatsApp message with an opt-out.
- ✓ **Explain consent, unsubscribe and anti-spam/NDPR-minded practice** — in their own words, scoring at least 70% on the ethics check.
- ✓ **Read open and click rates** — from a sample email report and explain what the numbers mean.

SESSION 07

Paid Ads Basics

Week 3 â€" Module 3: Convert and Measure

WHAT YOU WILL LEARN

- ✓ **Explain** — the difference between Meta ads and Google ads â€" who they reach, when they reach them, and what each is best for.
- ✓ **Choose a campaign objective** — that matches a stated business goal, using the funnel stages from Session 1.
- ✓ **Define a target audience** — for a small local business, using location, interests and behaviours â€" and explain why "everyone" is the wrong audience.
- ✓ **Describe the three parts of ad structure** — â€" campaign, ad set and ad â€" and what belongs at each level.
- ✓ **Propose a daily budget in naira** — that matches a stated goal, and explain what that budget can realistically buy (and what it cannot).
- ✓ **Judge ad creative and landing-page fit** — â€" whether an ad's promise matches what the customer finds when they click.
- ✓ **Apply honest advertising rules** — â€" no fake discounts, no misleading claims, no buying engagement â€" to ad creative and copy.

SESSION 08

Analytics Tracking and Optimisation

Week 3 â€" Module 3: Convert and Measure

WHAT YOU WILL LEARN

- ✓ **Define KPIs** — and explain the difference between vanity metrics and actionable metrics, choosing KPIs that match a stated business goal.
- ✓ **Read a basic Google Analytics report** — â€" identifying sessions, users, traffic sources, top pages and events â€" and explain what each metric tells them.
- ✓ **Build correctly tagged UTM links** — using a free UTM builder, with a consistent naming convention, so every click traces to its exact source.
- ✓ **Plan a simple A/B test** — â€" changing one variable only, defining a success metric, and deciding when to keep the winner.
- ✓ **Write a one-page report** — that says what happened, what it means, and what to change next.
- ✓ **Apply honest measurement practice** — â€" no cherry-picking data, no claiming causation from correlation, no ignoring results that contradict what they hoped was true.

SESSION 09

Capstone Integrated Digital Marketing Campaign Plan

Week 3 â€" Module 3: Convert and Measure

WHAT YOU WILL LEARN

- ✓ **Assemble a complete integrated digital marketing campaign plan** — covering all eight required components: cover page, contents and ethics and scope statement, goals and KPIs, audience and positioning, online presence, channel and content plan, SEO and owned channels, paid media and measurement, and timeline, budget and ethics statement.
- ✓ **Check internal consistency** — â€" ensuring that the audience matches the channels, the channels match the content, the content matches the budget, and the measurement plan matches the goals.
- ✓ **Present the plan in a short talk** — (4â€"5 minutes), explaining at least three key decisions aloud in plain language.
- ✓ **Defend decisions under questioning** — â€" answering at least three questions accurately, explaining the reasoning behind channel choices, budget choices and measurement choices.
- ✓ **Give and receive constructive peer feedback** — using a structured feedback form.
- ✓ **Reflect on the course as a whole** — â€" identifying what they have learned, what they can do now that they could not do before, and what they want to learn next.
