Course Roadmap

Session 01 — Design Foundations Seeing

Session 02 — Design Foundations Colour Type

Session 03 — Design Foundations Images Composition

Session 04 — Canva Interface

Session 05 — Canva Layers Brand

Session 06 — Canva Advanced Techniques

Session 07 — Flyers and Social

Session 08 — Print and Identity

Session 09 — Portfolios Presentation

Session 10 — Professional Workflow

Session 11 — Client Simulation

Session 12 — Final Project Capstone

OVERVIEW

Course Roadmap

What we cover in every session

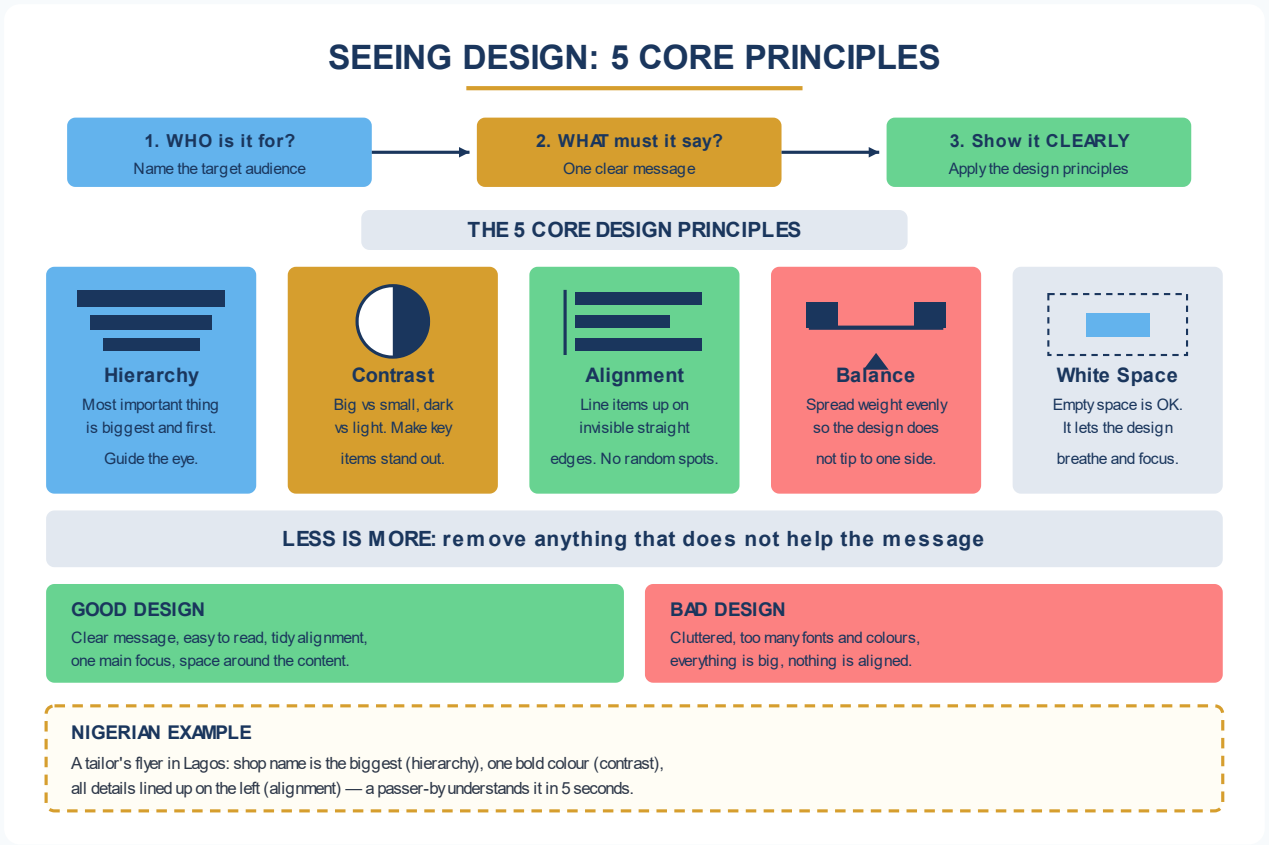

#	SESSION TOPIC	WEEK / MODULE	DURATION
01	Design Foundations Seeing		105 minutes
02	Design Foundations Colour Type		105 minutes
03	Design Foundations Images Composition		105 minutes
04	Canva Interface		105 minutes
05	Canva Layers Brand		105 minutes
06	Canva Advanced Techniques		105 minutes
07	Flyers and Social		105 minutes
08	Print and Identity		105 minutes
09	Portfolios Presentation		105 minutes
10	Professional Workflow		105 minutes
11	Client Simulation		105 minutes
12	Final Project Capstone		105 minutes

How to use this book: Each session below is a complete, ready-to-teach lesson note. Section A tells you what to prepare, B lists the outcomes, D–F are the teaching content, G–H are your demos and practicals, and the knowledge check with answer key is at the end. The concept diagram for each session is embedded as a visual aid.

SESSION 01 OF 12

Design Foundations Seeing

CONCEPT DIAGRAM — SESSION 01

SESSION 1: DESIGN FOUNDATIONS I â€" SEEING

Week: 1 **Module:** Design Foundations **Duration:** 105 minutes **Difficulty:** Beginner **Prerequisite Knowledge:** Basic computer skills (Typing & Computer Basics recommended) **Connection to Previous Session:** First session of Graphic Design **Preparation Required Before Class:**

- Collect 5â€"10 real design examples (flyers, posters, social media screenshots, business cards)
- Print or project examples for class analysis
- Prepare a "good design vs bad design" comparison slide

A. SESSION IDENTIFICATION

Field	Detail
Session Number	1
Title	Design Foundations I â€" Seeing
Week	1
Module	Design Foundations

Field	Detail
Duration	105 minutes
Difficulty	Beginner
Prerequisite Knowledge	Basic computer skills
Connection to Previous Session	First session
Preparation	Real design examples collected and prepared

B. LEARNING OUTCOMES

By the end of this session, the learner will be able to:

1. **Define graphic design** and explain its purpose in everyday life.
2. **Identify the target audience** of a design and explain why it matters.
3. **Recognise and name** the core design principles: hierarchy, contrast, alignment, balance and white space.
4. **Analyse a real design** using correct design vocabulary.
5. **Explain why** some designs work and others do not.
6. **Apply the "less is more" principle** to evaluate design choices.

C. REQUIRED MATERIALS

Hardware:

- One desktop computer per learner
- One monitor per learner
- Projector for instructor demonstration

Software:

- No software required for this session (foundations only)
- Optional: web browser to view online design examples

Printed Materials:

- "Design Principles Quick Reference" card (one per learner)
- Printed copies of design examples for analysis (one set per learner)

Teaching Aids:

- Projected design examples (good and bad)
- Whiteboard or flip chart for drawing diagrams

Internet: Optional â€” for viewing additional design examples.

D. OPENING ACTIVITY (10 minutes)

"The 5-Second Test"

Instructor Setup: Prepare 5 design examples â€” 3 good, 2 bad. Display each one for exactly 5 seconds.

Instructor Script: "Good morning, everyone. Welcome to the Graphic Design course. Before we learn any tools or techniques, I want to train your eyes. I am going to show you five designs. Each one will appear for only 5 seconds. Your job is to decide: does this design work, or does it not work? You do not need to explain why yet. Just notice your reaction.

[Show each design for 5 seconds.]

Now, which ones worked? [Pause for answers.] Which ones did not? [Pause.]

Here is the interesting thing: you did not need any design training to know which ones worked. Your eyes already know. The difference between a good designer and a bad designer is that the good designer knows WHY it works â€" and can make it work on purpose, every time.

That is what we are going to learn in this course. Not just how to make things look nice, but how to see why they look nice â€" and how to fix them when they do not. Let us begin."

Expected Learner Response: Learners will correctly identify which designs work and which do not. This activates visual intuition and sets the context for the session.

E. PREREQUISITE REVIEW (5 minutes)

Instructor Script: "Before we start, let us make sure we are all on the same page. Quick review of basic computer skills."

Review Questions and Expected Answers:

1. "How do you open a web browser?"
   - Click the browser icon on the taskbar or desktop.
2. "How do you search for something online?"
   - Type keywords in the search box and press Enter.
3. "How do you save a file?"
   - Press Ctrl+S or click File > Save.
4. "What is a file extension?"
   - The letters after the dot in a file name (e.g., .jpg, .png, .pdf).
5. "What is the difference between a file and a folder?"
   - A file is a single piece of information. A folder is a container for files.

How to Address Common Gaps:

- If a learner is still struggling with basic computer skills, pair them with a more confident learner.
- If a learner cannot open a browser, guide them through the taskbar.

F. FULL LECTURE NOTES (35 minutes)

Topic 1: What Is Graphic Design? (5 minutes)

Instructor Script: "Graphic design is the art of organising visual elements â€" text, images, colours and shapes â€" to communicate a message. It is everywhere. The sign on a shop. The flyer at a church. The Instagram post from your favourite brand. The business card someone hands you. All of that is graphic design.

Why Does It Matter? Good design gets attention. Bad design gets ignored. A well-designed flyer makes people stop and read. A poorly designed flyer makes people walk past. A professional business card makes people trust you. An unprofessional one makes them doubt you.

Graphic Design vs Art: Art is about expression. Design is about communication. An artist creates something to express their feelings. A designer creates something to communicate a message to an audience. In this course, we are learning to be designers â€" communicators, not just decorators."

Topic 2: Design Purpose and Target Audience (5 minutes)

Instructor Script: "Every design has a purpose and an audience. Before you create any design, you must answer two questions:

1. **What is the purpose?** What do you want the viewer to do? Buy something? Attend an event? Remember a name? Call a number?

2. **Who is the audience?** Who will see this design? Young people? Old people? Business owners? Church members? Students?

Why This Matters: A flyer for a nightclub looks very different from a flyer for a church event. A business card for a lawyer looks different from a business card for a DJ. If you do not know your audience, you cannot make the right design choices.

Example: If you are designing a flyer for a children's birthday party, you would use bright colours, playful fonts and fun images. If you are designing a flyer for a corporate seminar, you would use professional colours, clean fonts and formal images. Same tool, different choices â€" because the audience is different."

Topic 3: Hierarchy â€" What You See First (10 minutes)

Instructor Script: "Hierarchy is the arrangement of elements in order of importance. It tells the viewer what to look at first, second and third. Without hierarchy, everything looks equally important â€" and nothing stands out.

How to Create Hierarchy:

- **Size:** Bigger elements are seen first. Make the most important text the largest.
- **Position:** Elements at the top are seen first. Put the most important information at the top.
- **Colour:** Bright or contrasting colours stand out. Use them for important information.
- **Weight:** Bold text stands out more than regular text. Use bold for headings.

Example: On a business flyer, the hierarchy might be:

1. Event name (largest, boldest, most colourful)
2. Date and time (medium size, clear)
3. Location (smaller, but still readable)
4. Contact information (smallest, at the bottom)

Common Mistake: Making everything the same size. When everything is big, nothing is big. When everything is bold, nothing is bold. Hierarchy requires contrast â€" some things must be bigger or bolder than others."

Topic 4: Contrast â€" Making Things Stand Out (5 minutes)

Instructor Script: "Contrast means difference. In design, contrast makes elements stand out from each other and from the background. Without contrast, everything blends together and nothing is readable.

Types of Contrast:

- **Size contrast:** Large text vs small text.
- **Colour contrast:** Dark text on a light background, or light text on a dark background.
- **Weight contrast:** Bold text vs regular text.
- **Font contrast:** A decorative heading font vs a clean body font.

The Golden Rule of Contrast: If two elements are not the same, make them very different. Do not make them slightly different. Slight differences look like mistakes. Big differences look intentional.

Example: Bad contrast: Dark grey text on a black background. Hard to read. Good contrast: White text on a black background. Easy to read.

Bad contrast: Two fonts that look almost the same. Looks like a mistake. Good contrast: A bold serif heading with a clean sans-serif body. Looks intentional."

Topic 5: Alignment â€" Everything Has a Place (5 minutes)

Instructor Script: "Alignment means lining up elements along a common edge or axis. When elements are aligned, the design looks organised and professional. When elements are randomly placed, the design looks messy and amateur.

Types of Alignment:

- **Left align:** All elements line up on the left edge. Most common for text.
- **Centre align:** All elements line up on the centre axis. Good for titles and short text.
- **Right align:** All elements line up on the right edge. Good for dates and numbers.

The Alignment Rule: Choose one alignment and stick with it. Do not mix left-aligned text with centre-aligned text on the same design unless you have a specific reason.

Example: On a business card, all text is usually left-aligned or centre-aligned. Mixing alignments makes the card look unprofessional."

Topic 6: Balance and White Space (5 minutes)

Instructor Script: "Balance means the visual weight of elements is distributed evenly. A design that is too heavy on one side looks unstable. A design that is balanced looks calm and professional.

White Space: White space (also called negative space) is the empty space around and between elements. It is not wasted space â€" it is essential space. White space gives the viewer's eye a place to rest. It makes the design easier to read and more elegant.

Common Mistake: Filling every inch of the design with text and images. This creates a cluttered, overwhelming design. The fix: remove unnecessary elements and add more white space.

Example: Look at a professional website like Apple. Notice how much white space there is. The products stand out because there is nothing competing for attention. That is the power of white space."

G. INSTRUCTOR DEMONSTRATION (15 minutes)

Demonstration 1: Analysing a Good Design (5 minutes)

What the Instructor Prepares:

- A well-designed flyer projected on the screen

What the Instructor Says and Does: "I am going to analyse this flyer using the principles we just learned. Watch how I think."

1. **Purpose:** "The purpose of this flyer is to get people to attend a business seminar. The call to action is 'Register Now.'"
2. **Audience:** "The audience is business professionals. That is why the design is clean and formal."
3. **Hierarchy:** "The event name is the largest text â€" that is what you see first. The date and time are second. The location is third. The contact information is smallest."
4. **Contrast:** "The heading is bold and dark blue. The body text is regular and black. The background is white. High contrast makes it easy to read."
5. **Alignment:** "All text is left-aligned. Everything lines up on the left edge. This looks organised."
6. **Balance and White Space:** "The design is balanced â€" the text is on the left, the image is on the right. There is plenty of white space around the text. It does not feel cluttered."

What Learners Should Observe: The instructor systematically analysing a design using the six principles.

Expected Result: Learners can describe how each principle is applied in the example.

Demonstration 2: Analysing a Bad Design (5 minutes)

What the Instructor Prepares:

- A poorly designed flyer projected on the screen

What the Instructor Says and Does: "Now let us look at a design that does not work. What is wrong with it?"

1. **Hierarchy:** "Everything is the same size. The event name is not bigger than the contact information. You do not know what to look at first."
2. **Contrast:** "The text is light grey on a white background. It is hard to read. There is not enough contrast."
3. **Alignment:** "Some text is left-aligned, some is centre-aligned, some is right-aligned. Nothing lines up. It looks messy."
4. **Balance and White Space:** "The design is cluttered. There is text and images everywhere. There is no white space. It feels overwhelming."
5. **Purpose:** "I cannot tell what the purpose is. Is it an event? A sale? A announcement? The message is unclear."

What Learners Should Observe: The instructor identifying specific problems using design vocabulary.

Expected Result: Learners can identify specific problems in a poorly designed piece.

Demonstration 3: Fixing a Bad Design (5 minutes)

What the Instructor Prepares:

- The same poorly designed flyer, with annotations showing fixes

What the Instructor Says and Does: "Now let us fix this design. Here is what I would do:"

1. **Fix hierarchy:** "Make the event name the largest text. Make the date and time medium. Make the contact information smallest."
2. **Fix contrast:** "Change the text colour to dark blue or black. Make the background white or light grey."
3. **Fix alignment:** "Choose one alignment â€" left align â€" and apply it to all text."
4. **Fix balance and white space:** "Remove unnecessary images. Add more white space around the text."
5. **Fix purpose:** "Make the call to action clear â€" 'Register Now' in a bold, colourful button."

What Learners Should Observe: The instructor applying fixes based on the principles.

Expected Result: Learners can explain how to fix a poorly designed piece using design principles.

H. GUIDED PRACTICAL EXERCISE (20 minutes)

Exercise: "Design Autopsy"

Practical Objective: The learner will analyse three real designs using the design principles learned in this session.

Starting Materials:

- Printed copies of three design examples (one good, one bad, one average)
- "Design Analysis Worksheet" (one per learner)

Instructions:

Part 1: Analyse Design A (7 minutes)

1. "Look at Design A. This is a business flyer for a restaurant."
2. "Answer these questions on your worksheet:
    - What is the purpose of this design?
    - Who is the target audience?
    - Is there a clear hierarchy? What do you see first?
    - Is there enough contrast? Can you read the text easily?
    - Are the elements aligned? Do they line up?
    - Is the design balanced? Is there enough white space?
    - Overall, does this design work? Why or why not?"

Instructor Prompts:

- "What is the first thing you see on this flyer?" (Answer: The restaurant name â€" it is the largest text.)
- "Can you read all the text easily?" (Answer: Yes â€" dark text on a light background.)
- "Does anything look out of place?" (Answer: No â€" everything is aligned and balanced.)

Part 2: Analyse Design B (7 minutes)

3. "Look at Design B. This is a social media post for a church event."
4. "Answer the same questions on your worksheet."

Instructor Prompts:

- "What is the first thing you see?" (Answer: Everything is the same size â€" there is no clear hierarchy.)
- "Can you read the text easily?" (Answer: No â€" some text is light grey on a white background.)
- "Does anything look out of place?" (Answer: Yes â€" the text is not aligned, and there are too many colours.)

Part 3: Analyse Design C (6 minutes)

5. "Look at Design C. This is a business card for a hair salon."
6. "Answer the same questions on your worksheet."

Instructor Prompts:

- "What is the first thing you see?" (Answer: The salon name â€" it is bold and centred.)
- "Can you read all the text easily?" (Answer: Mostly yes, but the phone number is very small.)
- "Does anything look out of place?" (Answer: The email address is left-aligned while everything else is centre-aligned.)

Expected Result: Every learner has completed a written analysis of three designs using correct design vocabulary.

Troubleshooting Guidance:

- If a learner cannot identify hierarchy: "Look at the text sizes. Which one is biggest? That is the first thing you see."
- If a learner cannot identify contrast: "Look at the text colour and the background colour. Is there enough difference?"
- If a learner cannot identify alignment: "Draw an imaginary line along the left edge of the text. Do all the text blocks line up?"

Completion Checklist:

- ☐ Design A analysed (purpose, audience, hierarchy, contrast, alignment, balance, white space)
- ☐ Design B analysed (same criteria)
- ☐ Design C analysed (same criteria)
- ☐ Overall assessment completed for each design

I. INDEPENDENT CLASS EXERCISE (10 minutes)

Exercise: "Spot the Principle"

Scenario: "You are given six design examples. For each one, identify which design principle is being demonstrated (or violated)."

Task: Look at each design example and write down:

1. Which principle is most clearly demonstrated (or violated)?
2. Why?

Design Examples:

1. A flyer where the headline is huge and the body text is tiny. (Hierarchy)
2. A poster with white text on a white background. (Contrast â€" violated)
3. A business card where all text is perfectly left-aligned. (Alignment)
4. A social media post that is completely cluttered with no empty space. (White space â€" violated)
5. A flyer where the left side has lots of text and the right side has one small image. (Balance)
6. A poster with a bold serif heading and a clean sans-serif body. (Contrast)

Requirements:

- Identify the principle for each example
- Explain why in one sentence

Time Allowance: 10 minutes

Success Criteria:

- All 6 examples correctly identified
- Explanations are clear and accurate

Hints Available If the Learner Gets Stuck:

- Hint 1: "Ask yourself: what is the first thing you see? That is hierarchy."
- Hint 2: "Ask yourself: can I read this easily? That is contrast."
- Hint 3: "Ask yourself: do the elements line up? That is alignment."

Complete Answer Key for the Instructor:

1. **Hierarchy** â€" The headline is much larger than the body text, creating a clear order of importance.
2. **Contrast (violated)** â€" White text on a white background has no contrast, making it unreadable.
3. **Alignment** â€" All text is left-aligned, creating a clean, organised appearance.
4. **White space (violated)** â€" The design is cluttered with no empty space, making it overwhelming.
5. **Balance** â€" The text on the left and the image on the right create visual balance.
6. **Contrast** â€" The bold serif heading contrasts with the clean sans-serif body, creating visual interest.

J. REAL-WORLD CASE STUDY (5 minutes)

Case: "The Church Flyer That No One Read"

Situation: A church in Port Harcourt needs a flyer for their upcoming revival service. The pastor asks a member who "knows computers" to design it. The member creates a flyer with 10 different fonts, 5 different colours, text everywhere and no clear message. They print 500 copies and distribute them. Almost no one attends the revival.

The Problem: The flyer failed because it had no design principles. There was no hierarchy (everything was the same size), no contrast (light text on a busy background), no alignment (text was randomly placed) and no white space (it was completely cluttered).

Why It Matters: This happens every day â€" in churches, schools, businesses and events. People spend money printing designs that do not work because they do not understand design principles.

Relevant Concept: All six design principles. If the designer had understood hierarchy, contrast, alignment, balance and white space, the flyer would have been effective.

Worked Solution: If the designer had taken this course, here is what they would do:

1. **Purpose:** Get people to attend the revival.
2. **Audience:** Church members and the local community.
3. **Hierarchy:** Make the event name the largest text. Make the date and time second. Make the location third.
4. **Contrast:** Use dark text on a light background. Use one accent colour for the event name.
5. **Alignment:** Left-align all text for a clean, organised look.
6. **Balance and white space:** Use one image (e.g., a cross or a dove) and plenty of white space around the text.

Reasoning: Good design is not about making things look fancy. It is about making things work. A flyer that communicates clearly and looks professional will always outperform a flyer that is cluttered and confusing.

Possible Mistake: The designer might think that more colours and fonts make the design more attractive. In reality, simplicity is more attractive and more effective.

Correction: Use a maximum of 2â€"3 colours and 2 fonts. Keep it simple. Let the message shine.

Transfer Exercise: "Your friend is designing a flyer for a birthday party. She wants to use 8 different fonts and every colour she can find. What advice would you give her?"

Professional Connection: Every flyer, poster, social media post and business card you create will be judged by these principles. Whether you are designing for a church, a school, a business or a personal event, the same principles apply.

K. COMMON MISTAKES AND TROUBLESHOOTING (5 minutes)

Mistake 1: Not Knowing the Purpose

Symptoms: The learner creates a design without a clear message. **Likely Cause:** The learner did not think about the purpose before starting. **How to Investigate:** Ask the learner, "What is the purpose of this design? What do you want the viewer to do?" **Safe Corrective Steps:** Teach the learner to always define the purpose before starting any design. **How to Confirm the Problem Is Resolved:** The learner defines the purpose before designing. **How to Prevent Recurrence:** Make "Define the purpose" the first step in every design exercise.

Mistake 2: Making Everything the Same Size

Symptoms: The learner creates a design where all text is the same size. **Likely Cause:** The learner does not understand hierarchy. **How to Investigate:** Look at the design. Are there different text sizes? **Safe Corrective Steps:** Teach the learner to make the most important text the largest and the least important text the smallest. **How to Confirm the Problem Is Resolved:** The learner creates clear hierarchy. **How to Prevent Recurrence:** Remind the learner: "If everything is big, nothing is big."

Mistake 3: Using Too Many Colours

Symptoms: The learner uses 5 or more colours in one design. **Likely Cause:** The learner thinks more colours make the design more attractive. **How to Investigate:** Count the colours in the design. **Safe Corrective Steps:** Teach the learner to use a maximum of 2â€“3 colours. **How to Confirm the Problem Is Resolved:** The learner uses 2â€“3 colours. **How to Prevent Recurrence:** Remind the learner: "Less is more."

Mistake 4: Not Leaving White Space

Symptoms: The learner fills every inch of the design with text and images. **Likely Cause:** The learner thinks empty space is wasted space. **How to Investigate:** Look at the design. Is there any empty space? **Safe Corrective Steps:** Teach the learner that white space is essential for readability and elegance. **How to Confirm the Problem Is Resolved:** The learner leaves white space. **How to Prevent Recurrence:** Remind the learner: "White space is your friend."

Mistake 5: Mixing Alignments

Symptoms: The learner uses left, centre and right alignment in the same design. **Likely Cause:** The learner does not understand the importance of consistent alignment. **How to Investigate:** Look at the design. Do the text blocks line up? **Safe Corrective Steps:** Teach the learner to choose one alignment and stick with it. **How to Confirm the Problem Is Resolved:** The learner uses consistent alignment. **How to Prevent Recurrence:** Remind the learner: "Choose one alignment and stick with it."

L. SESSION ASSIGNMENT (5 minutes)

Assignment Title: "Design Analysis Report"

Purpose: To reinforce design analysis skills by having the learner analyse three real designs in writing.

Realistic Scenario: "You are applying for a design job. The employer asks you to analyse three designs and explain what works and what does not. This is your chance to show that you can think like a designer."

Detailed Instructions:

1. Find three designs (a flyer, a social media post and a business card). You can find them online or in your community.
2. For each design, write a short analysis (5â€“7 sentences) that covers:
    - The purpose of the design
    - The target audience
    - The hierarchy (what do you see first?)
    - The contrast (can you read the text easily?)
    - The alignment (do the elements line up?)
    - The balance and white space (is it cluttered or clean?)
    - Overall assessment (does it work? Why or why not?)
3. Save the analysis as a Word document named "Design Analysis Report" on the Desktop.
4. Show the saved file to the instructor before leaving.

Required Deliverables:

- A Word document named "Design Analysis Report" saved on the Desktop
- The document contains: analysis of three designs, each covering all six principles

Submission Format:

- The file must be saved on the Desktop of the academy machine
- The learner must show the instructor the saved file before leaving

Deadline Recommendation:

- Before leaving the session (in-class assignment)

Marking Rubric:

Criterion	Excellent (5)	Good (3)	Needs Improvement (1)
Purpose identified	Clear, specific purpose stated	Purpose stated but vague	Not identified
Audience identified	Clear, specific audience stated	Audience stated but vague	Not identified
Hierarchy analysis	Correctly identified and explained	Mostly correct	Incorrect or missing
Contrast analysis	Correctly identified and explained	Mostly correct	Incorrect or missing
Alignment analysis	Correctly identified and explained	Mostly correct	Incorrect or missing
Balance and white space	Correctly identified and explained	Mostly correct	Incorrect or missing
Overall assessment	Insightful, well-reasoned	Present but generic	Missing or superficial
File saved correctly	Saved on Desktop with correct name	Saved but wrong location or name	Not saved

Total: 40 marks

Common Mistakes to Avoid:

- Writing vague statements (e.g., "It looks nice") without explaining why
- Not using design terminology
- Not saving the file

Instructor Reference Solution:

Design A â€" Restaurant Flyer: The purpose of this design is to attract customers to the restaurant. The target audience is local residents and workers. The hierarchy is clear â€" the restaurant name is the largest text, followed by the tagline, then the menu items. The contrast is good â€" dark text on a white background makes it easy to read. The alignment is consistent â€" all text is left-aligned. The balance is good â€" the logo is on the left, the text is on the right. There is adequate white space. Overall, this design works well.

Design B â€" Church Social Media Post: The purpose is to announce a church event. The target audience is church members. The hierarchy is weak â€" all text is the same size, so nothing stands out. The contrast is poor â€" some text is light grey on a white background. The alignment is inconsistent â€" some text is left-aligned, some is centre-aligned. The design is cluttered with no white space. Overall, this design does not work well.

Design C â€" Hair Salon Business Card: The purpose is to provide contact information. The target audience is potential customers. The hierarchy is good â€" the salon name is bold and centred. The contrast is good â€" black text on a white background. The alignment is mostly good, but the email address is left-aligned while everything else is centre-aligned. The balance is good. There is adequate white space. Overall, this design works well, but the alignment inconsistency is a minor flaw.

M. KNOWLEDGE CHECK (5 minutes)

Questions

1. Multiple Choice: What is graphic design? a) The art of drawing and painting b) The art of organising visual elements to communicate a message c) The art of writing code d) The art of taking photographs

Answer: b) The art of organising visual elements to communicate a message

2. Short Answer: What are the six core design principles we learned today?

Answer: Hierarchy, contrast, alignment, balance, white space, and purpose/audience.

3. Multiple Choice: What is hierarchy in design? a) The arrangement of elements in order of importance b) The use of different colours c) The size of the design d) The number of images used

Answer: a) The arrangement of elements in order of importance

4. Explain in Your Own Words: Why is white space important in design?

Answer: White space gives the viewer's eye a place to rest. It makes the design easier to read and more elegant. Without white space, a design looks cluttered and overwhelming.

5. Practical Identification: Look at this design example. Identify the hierarchy â€" what do you see first, second and third?

Answer: The learner correctly identifies the order of visual importance.

6. Scenario-Based: Your friend creates a flyer where all the text is the same size and all the same colour. What design principle is being violated, and how would you fix it?

Answer: Hierarchy is being violated. To fix it, make the most important text (e.g., the event name) the largest and boldest. Make the less important text (e.g., contact information) smaller. Use different colours or weights to create contrast.

7. Error-Detecting: A learner writes in their analysis: "The design is bad because it is ugly." What is wrong with this statement, and what should they write instead?

Answer: "Ugly" is a subjective opinion, not a design analysis. The learner should identify specific problems using design principles, such as: "The design has poor hierarchy because all text is the same size. The contrast is low because the text is light grey on a white background. The alignment is inconsistent."

N. REFLECTION AND RECAP (5 minutes)

Plain-English Summary

Today you learned the foundations of graphic design. You learned what graphic design is, why it matters, and how to analyse designs using six core principles: hierarchy, contrast, alignment, balance, white space and purpose/audience. You also learned to identify what works and what does not in real designs. These are the skills that separate a designer from someone who just makes things "look nice."

Five Important Takeaways

1. Graphic design is about communication, not just decoration.
2. Every design has a purpose and a target audience.
3. Hierarchy tells the viewer what to see first.
4. Contrast makes elements stand out.
5. White space is essential â€" it is not wasted space.

Questions That Help You Recognise What You Can Now Do

- Can you define graphic design?
- Can you identify the purpose and audience of a design?
- Can you recognise hierarchy, contrast, alignment, balance and white space?
- Can you analyse a design using correct vocabulary?
- Can you explain why a design works or does not work?

Connection to the Next Session

In the next session, you will learn about colour and typography â€" two of the most powerful tools in a designer's toolkit. You will learn how to choose colours that work together and fonts that read well. You now know how to see design. Next, you will learn to choose the right colours and fonts.

O. INSTRUCTOR EVALUATION NOTES

Observable Signs of Competence

- The learner defines graphic design correctly.
- The learner identifies purpose and audience.
- The learner recognises and names all six design principles.
- The learner analyses designs using correct vocabulary.
- The learner explains why designs work or do not work.

Common Misconceptions

- **"Design is just about making things look pretty."** Some learners think design is purely aesthetic. Correct this by explaining that design is about communication.
- **"More colours and fonts make a better design."** Some learners think more is better. Correct this by teaching the "less is more" principle.
- **"White space is wasted space."** Some learners think empty space should be filled. Correct this by explaining the importance of white space.

Suggested Remedial Exercises

- For learners who cannot identify hierarchy: Show them two designs side by side â€" one with clear hierarchy and one without. Ask them to compare.
- For learners who cannot identify contrast: Show them a design with good contrast and one with poor contrast. Ask them to explain the difference.
- For learners who cannot analyse designs: Provide a structured analysis template with guiding questions.

Differentiation Guidance

Level 1 â€" Supported (for learners who struggle):

- Provide a "Design Principles Quick Reference" card.
- Pair with a more confident learner for analysis exercises.
- Allow extra time for the independent exercise.
- Provide additional design examples for practice.

Level 2 â€" Independent (standard):

- Complete all exercises as written.
- Answer all knowledge check questions.
- Complete the assignment to the standard shown in the rubric.

Level 3 â€" Challenge (for learners who finish early):

- Ask the learner to find and analyse three more designs.
- Ask the learner to create a "good version" and a "bad version" of the same design.
- Ask the learner to teach the six principles to a partner.

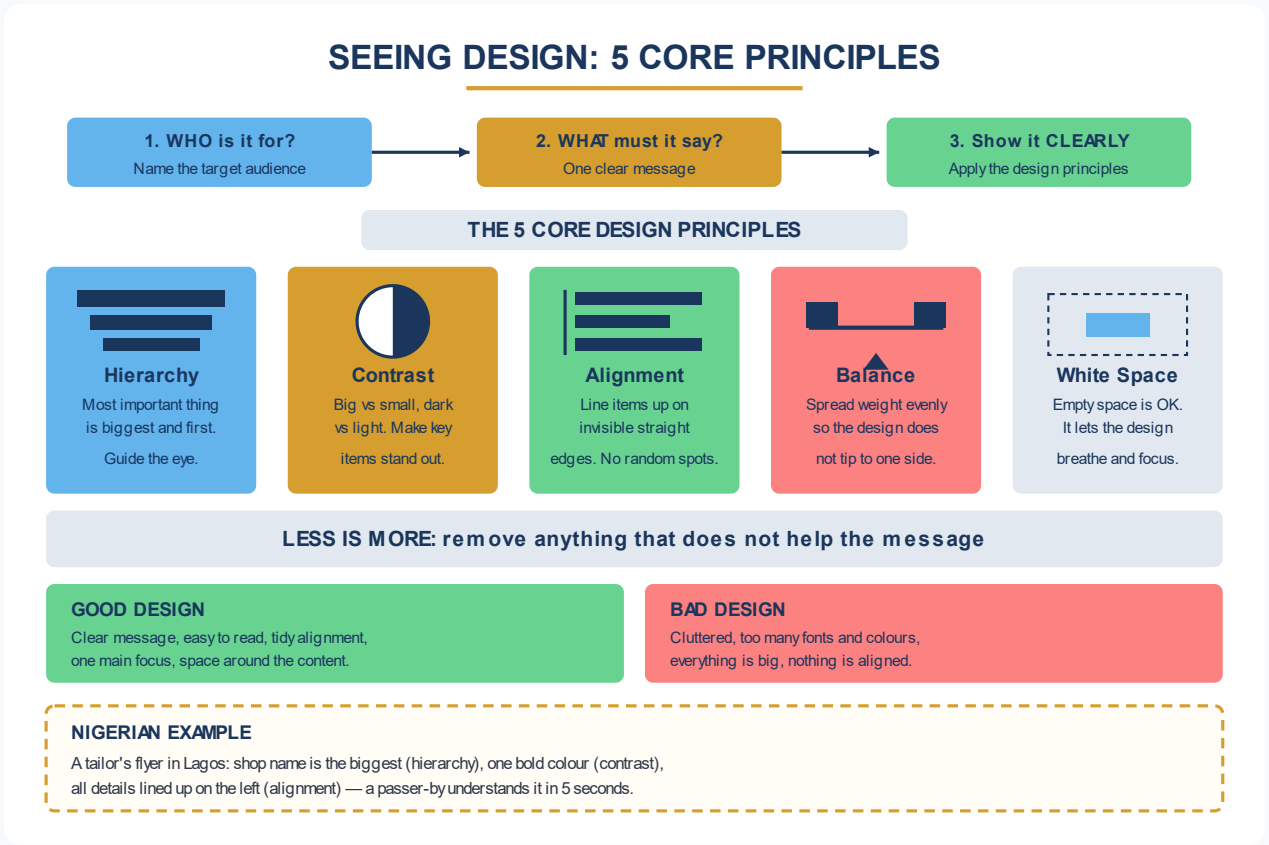

End of Session 1

Next Session: Session 2 â€" Design Foundations II: Colour & Type **What to Bring:** An eye for colour, willingness to experiment **Preparation:** Print colour wheel, font category samples

SESSION 02 OF 12

Design Foundations Colour Type

CONCEPT DIAGRAM — SESSION 02

SESSION 2: DESIGN FOUNDATIONS II â€" COLOUR & TYPE

Week: 1 **Module:** Design Foundations **Duration:** 105 minutes **Difficulty:** Beginner **Prerequisite Knowledge:** Session 1 â€" Design Foundations I **Connection to Previous Session:** Builds on Session 1 by teaching colour theory and typography

Preparation Required Before Class:

- Print colour wheels (one per learner)
- Print font category samples (one per learner)
- Prepare colour combination examples (good and bad)
- Prepare font pairing examples (good and bad)

A. SESSION IDENTIFICATION

Field	Detail
Session Number	2
Title	Design Foundations II â€" Colour & Type
Week	1

Field	Detail
Module	Design Foundations
Duration	105 minutes
Difficulty	Beginner
Prerequisite Knowledge	Session 1 â€" Design Foundations I
Connection to Previous Session	Builds on Session 1 by teaching colour and typography
Preparation	Colour wheels, font samples, pairing examples

B. LEARNING OUTCOMES

By the end of this session, the learner will be able to:

1. **Explain the colour wheel** and identify primary, secondary and tertiary colours.
2. **Create effective colour combinations** using complementary, analogous and monochromatic schemes.
3. **Explain colour psychology** and how different colours create different moods.
4. **Identify font categories:** serif, sans-serif, script and display.
5. **Pair fonts effectively** using contrast and hierarchy.
6. **Apply typographic hierarchy** to create clear visual order.
7. **Explain why** most designs should use no more than 2â€"3 colours and 2 fonts.

C. REQUIRED MATERIALS

Hardware:

- One desktop computer per learner
- One monitor per learner
- Projector for instructor demonstration

Software:

- No software required for this session (foundations only)
- Optional: web browser to view online colour tools

Printed Materials:

- Colour wheel (one per learner)
- Font category samples (one per learner)
- "Colour Combinations Quick Reference" card (one per learner)

Teaching Aids:

- Projected colour examples (good and bad)
- Projected font pairing examples (good and bad)
- Whiteboard or flip chart for drawing the colour wheel

Internet: Optional â€" for viewing additional colour and font examples.

D. OPENING ACTIVITY (10 minutes)

"The Colour Mood Test"

Instructor Setup: Display 5 designs, each dominated by a different colour (red, blue, green, yellow, black). Do not tell the learners what the designs are for.

Instructor Script: "Good morning, everyone. Look at these five designs. They are all for different businesses â€" a restaurant, a bank, a children's party, a law firm and a nightclub. But I am not going to tell you which is which. Your task is to match each design to the business based on the colour alone. You have 2 minutes."

[Give learners 2 minutes to match.]

"Now let us check. [Reveal the answers.] How did you do? [Pause.]

Here is the interesting thing: you did not need any design training to know that the bright yellow design was for the children's party and the dark blue design was for the bank. Colour communicates mood and meaning instantly. Today, you will learn how to use colour and typography deliberately â€" so that your designs communicate exactly what you want them to communicate."

Expected Learner Response: Learners will correctly match most designs to their businesses based on colour. This activates intuition and sets the context for the session.

E. PREREQUISITE REVIEW (5 minutes)

Instructor Script: "Before we start, let us remember what we learned in the last session. Quick review."

Review Questions and Expected Answers:

1. "What are the six core design principles?"
   - Hierarchy, contrast, alignment, balance, white space, purpose/audience.
2. "What is hierarchy?"
   - The arrangement of elements in order of importance.
3. "What is contrast?"
   - Difference â€" making elements stand out from each other.
4. "Why is white space important?"
   - It gives the viewer's eye a place to rest and makes the design easier to read.
5. "What is the 'less is more' principle?"
   - Use fewer elements, colours and fonts. Keep it simple.

How to Address Common Gaps:

- If a learner cannot remember the principles, ask a partner to help.
- If a learner forgot the "less is more" principle, remind them: "If everything is important, nothing is important."

F. FULL LECTURE NOTES (35 minutes)

Topic 1: The Colour Wheel (10 minutes)

Instructor Script: "The colour wheel is a circular diagram that shows how colours relate to each other. It is one of the most important tools in design.

Primary Colours: Red, blue and yellow. These are the three colours that cannot be created by mixing other colours.

Secondary Colours: Orange, green and purple. These are created by mixing two primary colours:

- Red + Yellow = Orange
- Blue + Yellow = Green
- Red + Blue = Purple

Tertiary Colours: Red-orange, yellow-orange, yellow-green, blue-green, blue-purple and red-purple. These are created by mixing a primary colour with a secondary colour.

Warm and Cool Colours:

- **Warm colours:** Red, orange, yellow. These colours feel energetic, warm and exciting.
- **Cool colours:** Blue, green, purple. These colours feel calm, professional and trustworthy.

How to Use the Colour Wheel: The colour wheel helps you choose colours that work together. We will learn three common colour combinations in the next topic."

Topic 2: Colour Combinations (10 minutes)

Instructor Script: "Here are three colour combinations that always work:

1. Complementary: Colours that are opposite each other on the colour wheel. For example, blue and orange, or red and green. Complementary colours create high contrast and visual energy. They are great for call-to-action buttons and important information.

2. Analogous: Colours that are next to each other on the colour wheel. For example, blue, blue-green and green. Analogous colours create a harmonious, calming effect. They are great for backgrounds and designs that need to feel cohesive.

3. Monochromatic: Different shades, tints and tones of a single colour. For example, light blue, medium blue and dark blue. Monochromatic schemes are elegant and sophisticated. They are great for professional designs.

The 60-30-10 Rule: When using multiple colours, follow the 60-30-10 rule:

- 60% dominant colour (usually a neutral or background colour)
- 30% secondary colour (supports the dominant colour)
- 10% accent colour (for call-to-action and important information)

Example: For a business flyer:

- 60% white (background)
- 30% dark blue (headings and main elements)
- 10% orange (call-to-action button)"

Topic 3: Colour Psychology (5 minutes)

Instructor Script: "Colours create emotional responses. Here are some common associations:

- **Red:** Energy, urgency, passion, danger. Used for sales, food and entertainment.
- **Blue:** Trust, calm, professionalism, stability. Used for banks, tech companies and healthcare.
- **Green:** Nature, growth, health, money. Used for organic products, finance and environmental causes.
- **Yellow:** Happiness, optimism, attention. Used for children's products, food and warnings.
- **Orange:** Creativity, enthusiasm, affordability. Used for entertainment, food and call-to-action.
- **Black:** Luxury, power, sophistication. Used for premium brands and formal events.
- **White:** Cleanliness, simplicity, purity. Used for healthcare, technology and minimalist designs.

Important Note: Colour associations are not universal. They vary by culture and context. In Nigeria, for example, white is often associated with purity and celebration, while in some other cultures it is associated with mourning. Always consider your audience when choosing colours."

Topic 4: Typography â€" The Art of Text (10 minutes)

Instructor Script: "Typography is the art of arranging text so that it is readable, beautiful and appropriate. Good typography makes text easy to read. Bad typography makes text hard to read â€" even if the words are the same.

Font Categories:

1. Serif: Serif fonts have small lines or "feet" at the ends of the letters. Examples: Times New Roman, Georgia, Garamond. Serif fonts feel traditional, formal and trustworthy. They are good for body text in formal documents.

2. Sans-serif: Sans-serif fonts do not have the small lines at the ends. Examples: Arial, Calibri, Helvetica. Sans-serif fonts feel modern, clean and simple. They are good for headings, digital designs and informal documents.

3. Script: Script fonts look like handwriting. Examples: Brush Script, Pacifico, Dancing Script. Script fonts feel elegant, personal and creative. They are good for invitations, logos and decorative text. They are hard to read in large amounts.

4. Display: Display fonts are decorative and attention-grabbing. Examples: Impact, Bebas Neue, Lobster. Display fonts feel bold, fun and dramatic. They are good for headlines and posters. They are not good for body text.

Font Pairing: Most designs use two fonts: one for headings and one for body text. The key to good font pairing is contrast. Pair a serif with a sans-serif, or a display font with a clean sans-serif. Do not pair two fonts that look too similar â€" it looks like a mistake.

Example of Good Pairing:

- Heading: Montserrat (sans-serif, bold)
- Body: Merriweather (serif, regular)

Example of Bad Pairing:

- Heading: Arial (sans-serif)
- Body: Helvetica (sans-serif) These two fonts look almost the same. It looks like a mistake."

G. INSTRUCTOR DEMONSTRATION (15 minutes)

Demonstration 1: Choosing Colours (5 minutes)

What the Instructor Prepares:

- A blank flyer template projected on the screen

What the Instructor Says and Does: "I am going to choose colours for a flyer for a new restaurant. Watch how I think."

1. **Purpose and audience:** "The purpose is to attract customers. The audience is local residents. I want the design to feel warm and appetising."
2. **Colour psychology:** "Red and orange are associated with food and energy. I will use warm colours."
3. **Colour combination:** "I will use a complementary scheme: orange (dominant) and dark blue (contrast). Orange for the background and headings, dark blue for the text and call-to-action."
4. **60-30-10 rule:** "60% orange (background), 30% white (text areas), 10% dark blue (call-to-action button)."

What Learners Should Observe: The instructor making deliberate colour choices based on principles.

Expected Result: Learners can explain why specific colours were chosen.

Demonstration 2: Choosing Fonts (5 minutes)

What the Instructor Prepares:

- The same flyer template with colours applied

What the Instructor Says and Does: "Now I will choose fonts for this flyer."

1. **Purpose and audience:** "The restaurant is casual but professional. I want the fonts to feel friendly but trustworthy."
2. **Font categories:** "I will use a display font for the restaurant name (to make it stand out) and a sans-serif font for the body text (to make it easy to read)."
3. **Font pairing:** "Heading: Montserrat (sans-serif, bold, large). Body: Open Sans (sans-serif, regular, smaller). These two fonts are both sans-serif but different enough to create hierarchy."
4. **Hierarchy:** "The restaurant name is the largest text. The tagline is second. The menu items are third. The contact information is smallest."

What Learners Should Observe: The instructor making deliberate font choices based on principles.

Expected Result: Learners can explain why specific fonts were chosen.

Demonstration 3: Common Colour and Font Mistakes (5 minutes)

What the Instructor Prepares:

- Three designs with common mistakes

What the Instructor Says and Does: "Now let us look at some common mistakes."

1. **Too many colours:** "This design uses 7 different colours. It looks chaotic. The fix: use 2â€“3 colours maximum."
2. **Poor contrast:** "This design has yellow text on a white background. It is hard to read. The fix: use dark text on a light background."
3. **Too many fonts:** "This design uses 4 different fonts. It looks unprofessional. The fix: use 2 fonts maximum."

What Learners Should Observe: The instructor identifying and explaining common mistakes.

Expected Result: Learners can identify common colour and font mistakes.

H. GUIDED PRACTICAL EXERCISE (20 minutes)

Exercise: "Colour and Font Workshop"

Practical Objective: The learner will choose colour combinations and font pairings for different design scenarios.

Starting Materials:

- Colour wheel (printed)
- Font category samples (printed)
- "Colour and Font Worksheet" (one per learner)

Instructions:

Part 1: Colour Combinations (10 minutes)

1. "For each of the following scenarios, choose a colour combination and explain why: a) A flyer for a children's birthday party b) A business card for a law firm c) A social media post for a fitness gym d) A poster for a church event e) A menu for a fine dining restaurant"

Instructor Prompts:

- "What colours would you use for a children's party?" (Answer: Bright, warm colours â€" red, yellow, orange, blue.)
- "What colours would you use for a law firm?" (Answer: Professional, trustworthy colours â€" dark blue, grey, white.)
- "Why did you choose those colours?" (Answer: Colour psychology â€" the colours match the mood and audience.)

Part 2: Font Pairings (10 minutes)

2. "For each of the following scenarios, choose a font pairing and explain why: a) A wedding invitation b) A tech startup logo c) A restaurant menu d) A school newsletter e) A music concert poster"

Instructor Prompts:

- "What fonts would you use for a wedding invitation?" (Answer: Elegant script for the names, clean serif for the details.)
- "What fonts would you use for a tech startup?" (Answer: Modern sans-serif for both heading and body, with different weights.)
- "Why did you choose those fonts?" (Answer: The fonts match the tone and audience.)

Expected Result: Every learner has chosen colour combinations and font pairings for 10 different scenarios, with explanations.

Troubleshooting Guidance:

- If a learner chooses too many colours: "Remember the 60-30-10 rule. Choose one dominant colour, one secondary colour and one accent colour."
- If a learner chooses poor contrast: "Check that your text colour is different enough from your background colour."
- If a learner chooses too many fonts: "Remember â€" two fonts maximum. One for headings, one for body text."

Completion Checklist:

- ☐ Colour combinations chosen for 5 scenarios
- ☐ Font pairings chosen for 5 scenarios
- ☐ Explanations provided for all choices

I. INDEPENDENT CLASS EXERCISE (10 minutes)

Exercise: "Fix the Colour and Font Mistakes"

Scenario: "You are given four designs with colour and font mistakes. Your task is to identify the mistakes and suggest fixes."

Task: For each design, write down:

1. What is wrong with the colours?
2. What is wrong with the fonts?
3. How would you fix it?

Design Examples:

1. A flyer with 8 different colours and no clear hierarchy.
2. A business card with yellow text on a white background.
3. A social media post with 5 different fonts.
4. A poster with a script font for all the body text.

Requirements:

- Identify the colour and font mistakes for each design
- Suggest specific fixes

Time Allowance: 10 minutes

Success Criteria:

- All 4 designs analysed correctly
- Fixes are specific and appropriate

Hints Available If the Learner Gets Stuck:

- Hint 1: "Count the colours. More than 3 is too many."
- Hint 2: "Check the contrast. Can you read the text easily?"
- Hint 3: "Count the fonts. More than 2 is too many."

Complete Answer Key for the Instructor:

1. **Flyer with 8 colours:**
    - Mistake: Too many colours create chaos.
    - Fix: Reduce to 2â€“3 colours using the 60-30-10 rule.
2. **Business card with yellow text on white:**
    - Mistake: Poor contrast â€” yellow on white is hard to read.
    - Fix: Use dark text (black or dark blue) on a white background.
3. **Social media post with 5 fonts:**
    - Mistake: Too many fonts look unprofessional.
    - Fix: Use 2 fonts â€” one for headings, one for body text.
4. **Poster with script font for body text:**
    - Mistake: Script fonts are hard to read in large amounts.
    - Fix: Use a script font for the heading only. Use a serif or sans-serif font for the body text.

J. REAL-WORLD CASE STUDY (5 minutes)

Case: "The Restaurant That Changed Its Colours"

Situation: A restaurant in Port Harcourt has been struggling to attract customers. Their flyer is cluttered, with 8 different colours, 5 different fonts and no clear message. They hire a designer to fix it. The designer simplifies the design to 2 colours (red

and white) and 2 fonts (a bold sans-serif for headings and a clean sans-serif for body text). The new flyer is clean, appetising and professional. Within a month, customer visits increase by 40%.

The Problem: The original flyer failed because it had too many colours and fonts, poor contrast and no clear hierarchy.

Why It Matters: Colour and typography are not just aesthetic choices â€" they are communication tools. The right colours and fonts can attract customers, build trust and communicate your brand. The wrong choices can drive customers away.

Relevant Concept: Colour theory and typography. If the original designer had understood these principles, the flyer would have been effective from the start.

Worked Solution: The designer succeeded because they:

1. Chose colours based on colour psychology (red = food, energy).
2. Used a simple colour combination (red and white).
3. Chose fonts based on readability and tone (bold sans-serif for headings, clean sans-serif for body).
4. Created clear hierarchy (restaurant name largest, contact information smallest).
5. Left plenty of white space.

Reasoning: Good design is not about making things look fancy. It is about making things work. The right colours and fonts make a design work.

Possible Mistake: The designer might have chosen colours and fonts based on personal preference rather than the brand and audience. This is a common mistake.

Correction: Always choose colours and fonts based on the purpose, audience and brand â€" not on personal taste.

Transfer Exercise: "Your friend is designing a flyer for a gym. She wants to use pink and purple because they are her favourite colours. What advice would you give her?"

Professional Connection: Every design you create will be judged by its colours and fonts. Whether you are designing for a restaurant, a church, a school or a business, the same principles apply.

K. COMMON MISTAKES AND TROUBLESHOOTING (5 minutes)

Mistake 1: Using Too Many Colours

Symptoms: The learner uses 5 or more colours in one design. **Likely Cause:** The learner thinks more colours make the design more attractive. **How to Investigate:** Count the colours in the design. **Safe Corrective Steps:** Teach the learner to use the 60-30-10 rule and a maximum of 2â€"3 colours. **How to Confirm the Problem Is Resolved:** The learner uses 2â€"3 colours. **How to Prevent Recurrence:** Remind the learner: "Less is more."

Mistake 2: Poor Colour Contrast

Symptoms: The learner uses light text on a light background or dark text on a dark background. **Likely Cause:** The learner does not understand the importance of contrast. **How to Investigate:** Check the text colour and background colour. **Safe Corrective Steps:** Teach the learner to use high contrast â€" dark text on a light background or light text on a dark background. **How to Confirm the Problem Is Resolved:** The learner uses high contrast. **How to Prevent Recurrence:** Remind the learner: "If you cannot read it easily, fix the contrast."

Mistake 3: Using Too Many Fonts

Symptoms: The learner uses 3 or more fonts in one design. **Likely Cause:** The learner thinks more fonts make the design more interesting. **How to Investigate:** Count the fonts in the design. **Safe Corrective Steps:** Teach the learner to use a maximum of 2 fonts â€" one for headings, one for body text. **How to Confirm the Problem Is Resolved:** The learner uses 2 fonts. **How to Prevent Recurrence:** Remind the learner: "Two fonts maximum."

Mistake 4: Using Script Fonts for Body Text

Symptoms: The learner uses a script or display font for large amounts of text. **Likely Cause:** The learner thinks script fonts look elegant. **How to Investigate:** Check the font used for body text. **Safe Corrective Steps:** Teach the learner to use script fonts for headings only and serif or sans-serif fonts for body text. **How to Confirm the Problem Is Resolved:** The learner uses

appropriate fonts for body text. **How to Prevent Recurrence:** Remind the learner: "Script fonts are for decoration, not readability."

Mistake 5: Choosing Colours Based on Personal Preference

Symptoms: The learner chooses colours they like rather than colours that suit the brand and audience. **Likely Cause:** The learner does not understand colour psychology. **How to Investigate:** Ask the learner, "Why did you choose these colours?" **Safe Corrective Steps:** Teach the learner to choose colours based on the purpose, audience and brand â€" not personal taste. **How to Confirm the Problem Is Resolved:** The learner chooses colours based on principles. **How to Prevent Recurrence:** Remind the learner: "Choose colours for the audience, not for yourself."

L. SESSION ASSIGNMENT (5 minutes)

Assignment Title: "Colour and Font Analysis"

Purpose: To reinforce colour and typography skills by having the learner analyse the colour and font choices in real designs.

Realistic Scenario: "You are a design consultant. A client asks you to review their existing flyer and suggest improvements to the colours and fonts. Write a short report with your recommendations."

Detailed Instructions:

1. Find a real design (a flyer, poster or social media post). You can find one online or in your community.
2. Write a short report (5â€"7 sentences) that covers:
    - What colours are used? Are they appropriate for the purpose and audience?
    - What fonts are used? Are they readable and appropriate?
    - What is working well?
    - What could be improved?
    - Your specific recommendations for improvement
3. Save the report as a Word document named "Colour and Font Analysis" on the Desktop.
4. Show the saved file to the instructor before leaving.

Required Deliverables:

- A Word document named "Colour and Font Analysis" saved on the Desktop
- The document contains: colour analysis, font analysis, strengths, weaknesses, recommendations

Submission Format:

- The file must be saved on the Desktop of the academy machine
- The learner must show the instructor the saved file before leaving

Deadline Recommendation:

- Before leaving the session (in-class assignment)

Marking Rubric:

Criterion	Excellent (5)	Good (3)	Needs Improvement (1)
Colour analysis	Correctly identifies colours and evaluates appropriateness	Mostly correct	Incorrect or missing
Font analysis	Correctly identifies fonts and evaluates readability	Mostly correct	Incorrect or missing
Strengths identified	Specific, accurate strengths identified	Mostly correct	Vague or missing
Weaknesses identified	Specific, accurate weaknesses identified	Mostly correct	Vague or missing
Recommendations	Specific, actionable recommendations	Mostly correct	Vague or missing

Criterion	Excellent (5)	Good (3)	Needs Improvement (1)
File saved correctly	Saved on Desktop with correct name	Saved but wrong location or name	Not saved

Total: 30 marks

Common Mistakes to Avoid:

- Writing vague statements (e.g., "The colours are nice") without analysis
- Not providing specific recommendations
- Not saving the file

Instructor Reference Solution:

Colour Analysis: The flyer uses red, yellow and white. Red is appropriate for a food business because it stimulates appetite. Yellow creates energy and attention. White provides contrast and readability. However, the design could benefit from a darker accent colour (e.g., dark blue or black) for the text to improve contrast.

Font Analysis: The flyer uses a bold sans-serif font for the restaurant name and a script font for the tagline. The sans-serif font is appropriate for readability. The script font adds elegance but should be used sparingly. The body text uses a serif font, which is readable but could be replaced with a sans-serif font for a more modern look.

Strengths: The colour combination is appropriate for a food business. The hierarchy is clear â€" the restaurant name is the largest text.

Weaknesses: The contrast between the yellow text and white background is poor. The script font is overused.

Recommendations:

1. Change the yellow text to dark blue or black for better contrast.
2. Use the script font for the restaurant name only, not for the tagline.
3. Add more white space around the text.

M. KNOWLEDGE CHECK (5 minutes)

Questions

1. Multiple Choice: What are the three primary colours? a) Red, green, blue b) Red, blue, yellow c) Orange, green, purple d) Red, yellow, green

Answer: b) Red, blue, yellow

2. Short Answer: What is the 60-30-10 rule in colour?

Answer: The 60-30-10 rule states that a design should use 60% dominant colour, 30% secondary colour and 10% accent colour.

3. Multiple Choice: What type of font is best for body text in a formal document? a) Script b) Display c) Serif d) Decorative

Answer: c) Serif

4. Explain in Your Own Words: Why is it important to limit the number of fonts in a design?

Answer: Using too many fonts makes a design look cluttered and unprofessional. Limiting fonts to 2 (one for headings, one for body text) creates a clean, consistent and professional appearance.

5. Practical Identification: Look at this design example. Identify the colour combination (complementary, analogous or monochromatic) and the font categories (serif, sans-serif, script, display).

Answer: The learner correctly identifies the colour combination and font categories.

6. Scenario-Based: Your friend is designing a business card for a law firm. She wants to use a script font and bright pink colours. What advice would you give?

Answer: A script font and bright pink are not appropriate for a law firm. Law firms need to project professionalism, trust and stability. I would recommend using a serif or sans-serif font and professional colours like dark blue, grey or black.

7. Error-Detecting: A learner writes in their analysis: "The design uses complementary colours, which is good." What is wrong with this statement, and what should they write instead?

Answer: The statement is too vague. The learner should specify which colours are complementary and why they work (or do not work) for the design. For example: "The design uses blue and orange, which are complementary colours. This creates high contrast and visual energy, which is appropriate for a sports event."

N. REFLECTION AND RECAP (5 minutes)

Plain-English Summary

Today you learned about colour and typography â€" two of the most powerful tools in a designer's toolkit. You learned about the colour wheel, colour combinations (complementary, analogous, monochromatic), colour psychology, the 60-30-10 rule, font categories (serif, sans-serif, script, display) and font pairing. You also learned to analyse colour and font choices in real designs.

Five Important Takeaways

1. Use the colour wheel to choose colours that work together.
2. Follow the 60-30-10 rule: 60% dominant, 30% secondary, 10% accent.
3. Choose colours based on psychology and audience, not personal preference.
4. Use a maximum of 2 fonts â€" one for headings, one for body text.
5. Script and display fonts are for decoration, not readability.

Questions That Help You Recognise What You Can Now Do

- Can you identify primary, secondary and tertiary colours?
- Can you create complementary, analogous and monochromatic colour combinations?
- Can you explain colour psychology?
- Can you identify serif, sans-serif, script and display fonts?
- Can you pair fonts effectively?
- Can you analyse colour and font choices in a design?

Connection to the Next Session

In the next session, you will learn about images and composition â€" how to select, crop and arrange images effectively. You will also learn about the rule of thirds, visual flow and common composition mistakes. You now know how to choose colours and fonts. Next, you will learn to work with images.

O. INSTRUCTOR EVALUATION NOTES

Observable Signs of Competence

- The learner identifies primary, secondary and tertiary colours.
- The learner creates effective colour combinations.
- The learner explains colour psychology.
- The learner identifies font categories.
- The learner pairs fonts effectively.
- The learner analyses colour and font choices in designs.

Common Misconceptions

- **"More colours make a better design."** Some learners think more is better. Correct this by teaching the 60-30-10 rule.

- **"I should choose colours I like."** Some learners choose colours based on personal preference. Correct this by teaching colour psychology.
- **"Script fonts are elegant, so I should use them everywhere."** Some learners overuse script fonts. Correct this by teaching font categories and readability.

Suggested Remedial Exercises

- For learners who use too many colours: Have them redesign a cluttered flyer using only 2â€“3 colours.
- For learners who use poor contrast: Have them test their designs by squinting. If they cannot read the text, the contrast is too low.
- For learners who use too many fonts: Have them redesign a multi-font design using only 2 fonts.

Differentiation Guidance

Level 1 â€“ Supported (for learners who struggle):

- Provide a colour wheel and font samples for reference.
- Pair with a more confident learner for analysis exercises.
- Allow extra time for the independent exercise.
- Provide additional colour and font examples for practice.

Level 2 â€“ Independent (standard):

- Complete all exercises as written.
- Answer all knowledge check questions.
- Complete the assignment to the standard shown in the rubric.

Level 3 â€“ Challenge (for learners who finish early):

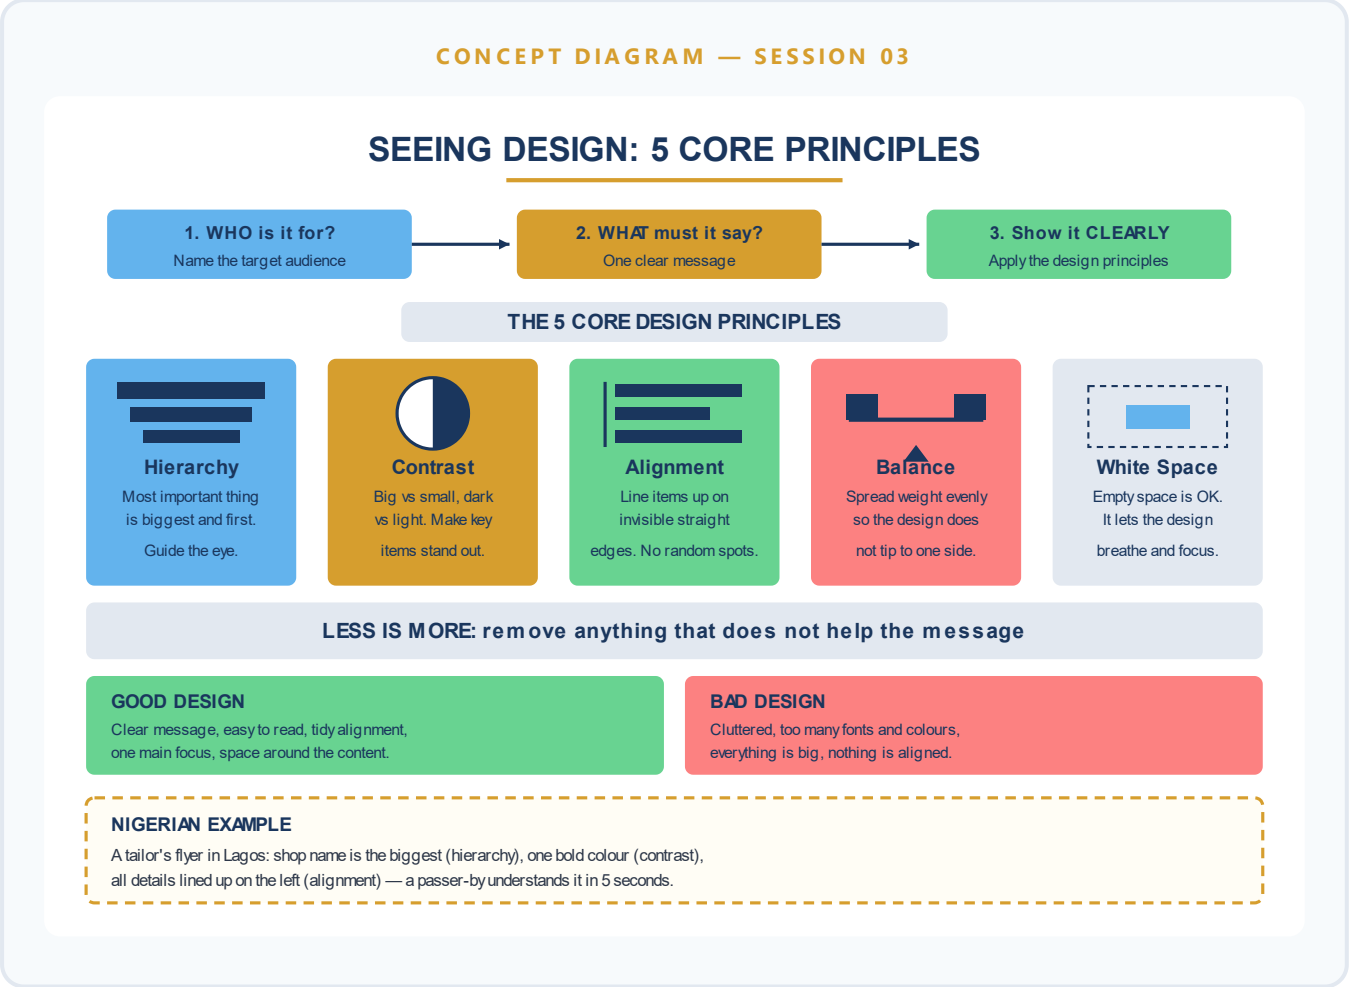

- Ask the learner to create a colour palette and font pairing for a specific brand.
- Ask the learner to research and write down three more colour psychology associations.
- Ask the learner to teach the colour wheel to a partner.

End of Session 2

Next Session: Session 3 â€“ Design Foundations III: Images & Composition **What to Bring:** An eye for images, willingness to analyse **Preparation:** Prepare design examples for composition analysis

SESSION 03 OF 12

Design Foundations Images Composition

SESSION 3: DESIGN FOUNDATIONS III â€" IMAGES & COMPOSITION

Week: 1 **Module:** Design Foundations **Duration:** 105 minutes **Difficulty:** Beginner **Prerequisite Knowledge:** Sessions 1â€"2 â€" Design Foundations I & II **Connection to Previous Session:** Builds on Sessions 1â€"2 by teaching image selection and composition **Preparation Required Before Class:**

- Prepare design examples showing good and bad composition
- Prepare examples of the rule of thirds
- Prepare examples of visual flow and reading patterns

A. SESSION IDENTIFICATION

Field	Detail
Session Number	3
Title	Design Foundations III â€" Images & Composition
Week	1
Module	Design Foundations

Field	Detail
Duration	105 minutes
Difficulty	Beginner
Prerequisite Knowledge	Sessions 1â€"2 â€" Design Foundations I & II
Connection to Previous Session	Builds on Sessions 1â€"2 by teaching images and composition
Preparation	Design examples for composition analysis

B. LEARNING OUTCOMES

By the end of this session, the learner will be able to:

1. **Select appropriate images** for different design contexts.
2. **Crop and frame images** effectively using the rule of thirds.
3. **Apply the rule of thirds** to create balanced compositions.
4. **Understand visual flow** and how readers scan designs.
5. **Identify and fix** common composition mistakes.
6. **Analyse real designs** for image quality and composition.

C. REQUIRED MATERIALS

Hardware:

- One desktop computer per learner
- One monitor per learner
- Projector for instructor demonstration

Software:

- No software required for this session (foundations only)
- Optional: web browser to view online design examples

Printed Materials:

- "Rule of Thirds" template (one per learner)
- "Visual Flow Patterns" handout (one per learner)

Teaching Aids:

- Projected design examples (good and bad composition)
- Whiteboard or flip chart for drawing composition diagrams

Internet: Optional â€" for viewing additional design examples.

D. OPENING ACTIVITY (10 minutes)

"The Image Test"

Instructor Setup: Display two versions of the same flyer â€" one with a well-composed image and one with a poorly composed image.

Instructor Script: "Good morning, everyone. Look at these two flyers. They have the exact same text, the same colours and the same fonts. The only difference is the image. Which one looks more professional? [Pause.]

The one on the right, right? Why? [Pause for answers â€" the image is better, it is positioned well, it is not stretched.]

The image on the left is stretched, poorly cropped and positioned awkwardly. The image on the right is well-composed, properly cropped and positioned to support the text.

Today, you will learn how to select, crop and compose images effectively. You will learn the rule of thirds, visual flow and how to avoid common composition mistakes. By the end of this session, you will be able to look at any design and know immediately whether the image is working or not."

Expected Learner Response: Learners will correctly identify the well-composed design. This activates visual intuition and sets the context for the session.

E. PREREQUISITE REVIEW (5 minutes)

Instructor Script: "Before we start, let us remember what we learned in the last session. Quick review."

Review Questions and Expected Answers:

1. "What are the three colour combinations we learned?"
    - Complementary, analogous, monochromatic.
2. "What is the 60-30-10 rule?"
    - 60% dominant colour, 30% secondary colour, 10% accent colour.
3. "What are the four font categories?"
    - Serif, sans-serif, script, display.
4. "What is the maximum number of fonts you should use in a design?"
    - Two.
5. "What is colour psychology?"
    - The study of how colours affect emotions and behaviour.

How to Address Common Gaps:

- If a learner cannot remember the colour combinations, draw a quick colour wheel on the whiteboard.
- If a learner forgot the font categories, write them on the whiteboard.

F. FULL LECTURE NOTES (35 minutes)

Topic 1: Image Selection (10 minutes)

Instructor Script: "The right image can make a design. The wrong image can break it. Here is how to choose the right image.

Criteria for Good Images:

1. **Relevance:** The image must be relevant to the message. A picture of food on a restaurant flyer is relevant. A picture of a car is not.
2. **Quality:** The image must be high-resolution and sharp. Blurry or pixelated images look unprofessional.
3. **Mood:** The image must match the mood of the design. A serious image for a serious topic. A fun image for a fun topic.
4. **Composition:** The image must be well-composed. The subject should be clear and well-positioned.
5. **Colour:** The image colours should work with the design's colour scheme. An image with clashing colours will look out of place.

Where to Find Good Images:

- Your own photographs (best option â€” unique and free)
- Free stock photo websites (Unsplash, Pexels, Pixabay)
- Canva's built-in image library (free tier)

Important Note: Do not use images from Google Images without checking the copyright. Using copyrighted images without permission can get you into legal trouble. Always use your own photos or images from free stock photo websites."

Topic 2: The Rule of Thirds (10 minutes)

Instructor Script: "The rule of thirds is one of the most important composition principles in design. It is simple and it always works.

How It Works: Imagine dividing your image into nine equal parts with two horizontal lines and two vertical lines. This creates a 3x3 grid. The rule of thirds says that you should place the most important elements of your image along these lines or at their intersections.

Why It Works: Placing the subject in the centre of the image often looks static and boring. Placing the subject off-centre (along the rule of thirds lines) creates visual interest and balance.

How to Apply It:

1. When taking a photograph, position the subject off-centre.
2. When cropping an image in Canva, use the rule of thirds grid to position the subject.
3. When designing a layout, place key elements along the rule of thirds lines.

Example: On a business flyer, the main image should be positioned along one of the vertical rule of thirds lines, not in the centre. The text should be positioned along the other vertical line. This creates a balanced, dynamic layout."

Topic 3: Visual Flow and Reading Patterns (10 minutes)

Instructor Script: "Visual flow is the path the viewer's eye follows when looking at a design. Understanding visual flow helps you arrange elements so that the viewer sees them in the right order.

Common Reading Patterns:

F-Pattern: The eye starts at the top-left, moves across to the top-right, then down to the middle-left, across to the middle-right, then down to the bottom-left and across to the bottom-right. This is common for text-heavy designs like newsletters and reports.

Z-Pattern: The eye starts at the top-left, moves diagonally to the bottom-right, then across to the bottom-left. This is common for designs with a clear call-to-action, like flyers and social media posts.

How to Use Visual Flow:

- Place the most important element where the eye starts (usually top-left or centre).
- Place the call-to-action where the eye ends (usually bottom-right or centre).
- Use lines, arrows and colour to guide the eye along the desired path.

Example: On a business flyer, the event name should be at the top (where the eye starts). The date and time should be in the middle. The call-to-action ("Register Now") should be at the bottom (where the eye ends)."

Topic 4: Common Composition Mistakes (5 minutes)

Instructor Script: "Here are the most common composition mistakes and how to avoid them:

1. **Stretching images:** Dragging the corner of an image without holding Shift distorts it. The fix: always hold Shift when resizing, or use the corner handles.
2. **Centring everything:** Placing all elements in the centre creates a static, boring design. The fix: use the rule of thirds and off-centre positioning.
3. **Ignoring the background:** Placing text over a busy background makes it hard to read. The fix: use a solid background or a semi-transparent overlay behind the text.
4. **Too many focal points:** Having multiple elements competing for attention confuses the viewer. The fix: create a clear hierarchy with one main focal point.
5. **Cropping too tightly:** Cutting off important parts of the image (e.g., someone's head) looks unprofessional. the fix: leave breathing room around the subject."

G. INSTRUCTOR DEMONSTRATION (15 minutes)

Demonstration 1: Analysing Image Composition (5 minutes)

What the Instructor Prepares:

- A well-designed flyer projected on the screen

What the Instructor Says and Does: "I am going to analyse the image composition in this flyer."

1. **Image selection:** "The image is relevant â€” it shows the restaurant's food. It is high-quality and sharp. The colours match the design's warm colour scheme."
2. **Rule of thirds:** "The image is positioned along the right vertical rule of thirds line. The text is positioned along the left vertical line. This creates a balanced, dynamic layout."
3. **Visual flow:** "The eye starts at the restaurant name (top-left), moves to the image (right), then down to the date and time (middle-left), and ends at the call-to-action (bottom-right). This follows the Z-pattern."
4. **Background:** "The text is placed over a semi-transparent white overlay, which makes it easy to read over the busy background image."

What Learners Should Observe: The instructor systematically analysing image composition.

Expected Result: Learners can describe how image composition principles are applied.

Demonstration 2: Fixing Composition Mistakes (5 minutes)

What the Instructor Prepares:

- A poorly designed flyer projected on the screen

What the Instructor Says and Does: "Now let us fix the composition mistakes in this design."

1. **Stretched image:** "The image is stretched â€” the people look distorted. The fix: resize proportionally by holding Shift."
2. **Centred everything:** "All the text is centred in the middle. It looks static. The fix: left-align the text and position it along the left rule of thirds line."
3. **Busy background:** "The text is hard to read over the busy background. The fix: add a semi-transparent white overlay behind the text."
4. **Too many focal points:** "There are three images competing for attention. The fix: choose one main image and remove the others."

What Learners Should Observe: The instructor identifying and fixing composition mistakes.

Expected Result: Learners can explain how to fix common composition mistakes.

Demonstration 3: Visual Flow Analysis (5 minutes)

What the Instructor Prepares:

- A social media post projected on the screen

What the Instructor Says and Does: "Now let us trace the visual flow of this social media post."

1. "The eye starts at the top-left â€” the brand logo."
2. "It moves across to the top-right â€” the product image."
3. "It moves down to the middle-left â€” the headline."
4. "It moves across to the middle-right â€” the price."
5. "It ends at the bottom-centre â€” the call-to-action button."

"This follows the Z-pattern. The designer has deliberately placed the most important elements where the eye will see them."

What Learners Should Observe: The instructor tracing the visual flow of a design.

Expected Result: Learners can trace the visual flow of a design.

H. GUIDED PRACTICAL EXERCISE (20 minutes)

Exercise: "Composition Analysis"

Practical Objective: The learner will analyse the image composition of three real designs.

Starting Materials:

- Printed copies of three design examples
- "Composition Analysis Worksheet" (one per learner)

Instructions:

Part 1: Analyse Design A (7 minutes)

1. "Look at Design A. This is a social media post for a clothing brand."
2. "Answer these questions:
    - Is the image relevant to the message?
    - Is the image high-quality?
    - Is the image well-composed? Does it follow the rule of thirds?
    - Is the text easy to read over the background?
    - What is the visual flow? Where does the eye start and end?
    - Overall, does the image composition work? Why or why not?"

Part 2: Analyse Design B (7 minutes)

3. "Look at Design B. This is a business card for a photographer."
4. "Answer the same questions."

Part 3: Analyse Design C (6 minutes)

5. "Look at Design C. This is a poster for a music concert."
6. "Answer the same questions."

Expected Result: Every learner has completed a written analysis of three designs focusing on image composition.

Troubleshooting Guidance:

- If a learner cannot identify the rule of thirds: "Draw two vertical lines and two horizontal lines across the image, dividing it into nine equal parts. Where is the subject positioned?"
- If a learner cannot trace the visual flow: "Close your eyes and open them. Where does your eye land first? That is the starting point. Then trace where it goes next."
- If a learner cannot evaluate image quality: "Zoom in on the image. Is it sharp or blurry? Are there any pixels visible?"

Completion Checklist:

- [ ] Design A analysed (relevance, quality, composition, readability, visual flow)
- [ ] Design B analysed (same criteria)
- [ ] Design C analysed (same criteria)

I. INDEPENDENT CLASS EXERCISE (10 minutes)

Exercise: "Spot the Composition Mistake"

Scenario: "You are given six design examples. For each one, identify the composition mistake and suggest a fix."

Task: For each design, write down:

1. What is the composition mistake?
2. How would you fix it?

Design Examples:

1. A flyer with a stretched image.

2. A poster with all elements centred.
3. A social media post with text over a busy background.
4. A business card with three competing images.
5. A flyer where the subject's head is cropped off.
6. A poster with no clear focal point.

Requirements:

- Identify the mistake for each example
- Suggest a specific fix

Time Allowance: 10 minutes

Success Criteria:

- All 6 examples correctly identified
- Fixes are specific and appropriate

Hints Available If the Learner Gets Stuck:

- Hint 1: "Look at the image. Is it distorted? That is stretching."
- Hint 2: "Look at the layout. Is everything in the centre? That is centring."
- Hint 3: "Look at the text. Can you read it easily? If not, the background is too busy."

Complete Answer Key for the Instructor:

1. **Stretched image:** The image is distorted. Fix: Resize proportionally by holding Shift.
2. **All elements centred:** The design looks static. Fix: Use the rule of thirds and off-centre positioning.
3. **Text over busy background:** The text is hard to read. Fix: Add a semi-transparent overlay behind the text.
4. **Three competing images:** There is no clear focal point. Fix: Choose one main image and remove the others.
5. **Subject's head cropped off:** The cropping is too tight. Fix: Leave breathing room around the subject.
6. **No clear focal point:** Multiple elements compete for attention. Fix: Create a clear hierarchy with one main focal point.

J. REAL-WORLD CASE STUDY (5 minutes)

Case: "The Flyer That Did Not Sell"

Situation: A small business in Port Harcourt creates a flyer to promote a sale. They use a low-resolution image from Google, stretch it to fit the flyer, place all the text in the centre over the busy background, and print 1,000 copies. Almost no one comes to the sale.

The Problem: The flyer failed because of poor image selection and composition. The image was low-quality and stretched, the text was hard to read, and there was no clear focal point.

Why It Matters: A flyer is often the first impression a business makes. A poorly composed flyer suggests the business is unprofessional. A well-composed flyer suggests the business is trustworthy and worth visiting.

Relevant Concept: Image selection and composition. If the designer had understood these principles, the flyer would have been effective.

Worked Solution: If the designer had taken this course, here is what they would do:

1. Use a high-quality image from their own photos or a free stock photo website.
2. Resize the image proportionally (holding Shift).
3. Position the image along the rule of thirds line.
4. Add a semi-transparent overlay behind the text for readability.
5. Create a clear focal point â€" the sale percentage in large, bold text.
6. Use the Z-pattern to guide the eye from the headline to the call-to-action.

Reasoning: Good composition is not about making things look fancy. It is about making things work. A well-composed flyer communicates clearly and attracts customers.

Possible Mistake: The designer might think that using a low-resolution image is acceptable because "it is just a flyer." In reality, low-quality images make the entire design look unprofessional.

Correction: Always use high-quality images. If you cannot find a high-quality image, use a simple graphic or shape instead.

Transfer Exercise: "Your friend is designing a poster for a school event. She found an image on Google but it is blurry when she zooms in. What advice would you give her?"

Professional Connection: Every design you create will be judged by its image composition. Whether you are designing a flyer, a poster, a social media post or a business card, the same principles apply.

K. COMMON MISTAKES AND TROUBLESHOOTING (5 minutes)

Mistake 1: Using Low-Quality Images

Symptoms: The learner uses blurry or pixelated images. **Likely Cause:** The learner does not understand image resolution. **How to Investigate:** Zoom in on the image. Is it sharp or blurry? **Safe Corrective Steps:** Teach the learner to use high-quality images from their own photos or free stock photo websites. **How to Confirm the Problem Is Resolved:** The learner uses high-quality images. **How to Prevent Recurrence:** Remind the learner: "If it looks blurry when you zoom in, do not use it."

Mistake 2: Stretching Images

Symptoms: The learner stretches images, distorting the subjects. **Likely Cause:** The learner does not hold Shift when resizing. **How to Investigate:** Look at the image. Do the subjects look distorted? **Safe Corrective Steps:** Teach the learner to always hold Shift when resizing images. **How to Confirm the Problem Is Resolved:** The learner resizes images proportionally. **How to Prevent Recurrence:** Remind the learner: "Always hold Shift when resizing."

Mistake 3: Placing Text Over Busy Backgrounds

Symptoms: The learner places text over busy backgrounds, making it hard to read. **Likely Cause:** The learner does not understand the importance of readability. **How to Investigate:** Can you read the text easily? **Safe Corrective Steps:** Teach the learner to use a semi-transparent overlay behind the text. **How to Confirm the Problem Is Resolved:** The learner ensures text is readable. **How to Prevent Recurrence:** Remind the learner: "If you cannot read it easily, fix it."

Mistake 4: Centring Everything

Symptoms: The learner centres all elements, creating a static design. **Likely Cause:** The learner does not understand the rule of thirds. **How to Investigate:** Look at the layout. Is everything in the centre? **Safe Corrective Steps:** Teach the learner to use the rule of thirds and off-centre positioning. **How to Confirm the Problem Is Resolved:** The learner uses off-centre positioning. **How to Prevent Recurrence:** Remind the learner: "Centre is static. Off-centre is dynamic."

Mistake 5: Cropping Too Tightly

Symptoms: The learner crops images too tightly, cutting off important parts. **Likely Cause:** The learner does not leave breathing room around the subject. **How to Investigate:** Look at the image. Is the subject cut off? **Safe Corrective Steps:** Teach the learner to leave breathing room around the subject. **How to Confirm the Problem Is Resolved:** The learner leaves breathing room. **How to Prevent Recurrence:** Remind the learner: "Leave breathing room around the subject."

L. SESSION ASSIGNMENT (5 minutes)

Assignment Title: "Image and Composition Analysis"

Purpose: To reinforce image and composition skills by having the learner analyse real designs.

Realistic Scenario: "You are a design consultant. A client asks you to review their existing poster and suggest improvements to the image and composition. Write a short report with your recommendations."

Detailed Instructions:

1. Find a real design (a flyer, poster or social media post). You can find one online or in your community.

2. Write a short report (5â€“7 sentences) that covers:
    - Is the image relevant, high-quality and well-composed?
    - Does the design follow the rule of thirds?
    - Is the text easy to read over the background?
    - What is the visual flow?
    - What is working well?
    - What could be improved?
    - Your specific recommendations for improvement
3. Save the report as a Word document named "Image and Composition Analysis" on the Desktop.
4. Show the saved file to the instructor before leaving.

Required Deliverables:

- A Word document named "Image and Composition Analysis" saved on the Desktop
- The document contains: image analysis, composition analysis, strengths, weaknesses, recommendations

Submission Format:

- The file must be saved on the Desktop of the academy machine
- The learner must show the instructor the saved file before leaving

Deadline Recommendation:

- Before leaving the session (in-class assignment)

Marking Rubric:

Criterion	Excellent (5)	Good (3)	Needs Improvement (1)
Image relevance and quality	Correctly evaluated	Mostly correct	Incorrect or missing
Rule of thirds	Correctly identified and evaluated	Mostly correct	Incorrect or missing
Text readability	Correctly evaluated	Mostly correct	Incorrect or missing
Visual flow	Correctly traced and evaluated	Mostly correct	Incorrect or missing
Recommendations	Specific, actionable	Mostly correct	Vague or missing
File saved correctly	Saved on Desktop with correct name	Saved but wrong location or name	Not saved

Total: 30 marks

Common Mistakes to Avoid:

- Writing vague statements (e.g., "The image is nice") without analysis
- Not providing specific recommendations
- Not saving the file

Instructor Reference Solution:

Image Analysis: The image is relevant â€“ it shows the event venue. However, it is low-resolution and appears pixelated when zoomed in. The colours match the design's colour scheme, which is good.

Composition Analysis: The image is positioned in the centre, which creates a static layout. The text is placed over a busy part of the image, making it hard to read. The visual flow is unclear because there is no clear focal point.

Strengths: The image is relevant and the colours match the design.

Weaknesses: The image is low-resolution, the composition is static and the text is hard to read.

Recommendations:

1. Replace the image with a higher-resolution version.
2. Position the image along the right rule of thirds line instead of centring it.
3. Add a semi-transparent overlay behind the text to improve readability.

4. Create a clear focal point by making the event name the largest text.

M. KNOWLEDGE CHECK (5 minutes)

Questions

1. Multiple Choice: What is the rule of thirds? a) Dividing an image into three equal parts b) Dividing an image into nine equal parts with two horizontal and two vertical lines c) Using three colours in a design d) Placing three images on a page

Answer: b) Dividing an image into nine equal parts with two horizontal and two vertical lines

2. Short Answer: What are the five criteria for selecting a good image?

Answer: Relevance, quality, mood, composition and colour.

3. Multiple Choice: What is the Z-pattern in visual flow? a) The eye moves in a Z shape from top-left to bottom-right b) The eye moves in a circle around the design c) The eye moves from bottom to top d) The eye moves randomly

Answer: a) The eye moves in a Z shape from top-left to bottom-right

4. Explain in Your Own Words: Why should you not place text over a busy background?

Answer: Text over a busy background is hard to read. The background competes with the text for attention. To fix this, use a solid background or a semi-transparent overlay behind the text.

5. Practical Identification: Look at this design example. Identify the visual flow â€" where does the eye start and end?

Answer: The learner correctly traces the visual flow.

6. Scenario-Based: Your friend is designing a flyer and wants to use an image she found on Google. The image is blurry when she zooms in. What advice would you give?

Answer: Do not use the blurry image. Use a high-quality image from your own photos or a free stock photo website like Unsplash or Pexels. A blurry image will make the entire design look unprofessional.

7. Error-Detecting: A learner writes in their analysis: "The image is well-composed because it is in the centre." What is wrong with this statement, and what should they write instead?

Answer: Centring the image creates a static, boring composition. The learner should write: "The image is positioned in the centre, which creates a static layout. It would be more dynamic if it were positioned along the rule of thirds line."

N. REFLECTION AND RECAP (5 minutes)

Plain-English Summary

Today you learned about images and composition. You learned how to select appropriate images, apply the rule of thirds, understand visual flow and avoid common composition mistakes. You also learned to analyse image composition in real designs. These are the skills that make designs look professional and polished.

Five Important Takeaways

1. Choose images that are relevant, high-quality and appropriate for the mood.
2. Use the rule of thirds to create balanced, dynamic compositions.
3. Understand visual flow â€" where the eye starts and ends.
4. Never place text over a busy background without an overlay.
5. Always resize images proportionally â€" never stretch them.

Questions That Help You Recognise What You Can Now Do

- Can you select appropriate images for a design?
- Can you apply the rule of thirds?
- Can you trace the visual flow of a design?

- Can you identify and fix common composition mistakes?
- Can you analyse image composition in a design?

Connection to the Next Session

This is the last session on design foundations. You now have all the theoretical knowledge you need. In the next session, you will start using Canva â€" the tool you will use to create designs throughout the rest of the course. You now know the principles. Next, you will learn the tool.

O. INSTRUCTOR EVALUATION NOTES

Observable Signs of Competence

- The learner selects appropriate images.
- The learner applies the rule of thirds.
- The learner traces visual flow.
- The learner identifies and fixes composition mistakes.
- The learner analyses image composition in designs.

Common Misconceptions

- **"Any image will do."** Some learners think image quality does not matter. Correct this by teaching the five criteria for good images.
- **"Centring is the safest choice."** Some learners centre everything because it feels balanced. Correct this by teaching the rule of thirds.
- **"Visual flow is too advanced."** Some learners think visual flow is an advanced concept. Correct this by showing them how simple it is to trace.

Suggested Remedial Exercises

- For learners who use low-quality images: Have them find high-quality alternatives on Unsplash or Pexels.
- For learners who centre everything: Have them redesign a centred layout using the rule of thirds.
- For learners who cannot trace visual flow: Have them practise with simple designs (e.g., a business card) before moving to complex ones.

Differentiation Guidance

Level 1 â€" Supported (for learners who struggle):

- Provide a "Rule of Thirds" template for reference.
- Pair with a more confident learner for analysis exercises.
- Allow extra time for the independent exercise.
- Provide additional design examples for practice.

Level 2 â€" Independent (standard):

- Complete all exercises as written.
- Answer all knowledge check questions.
- Complete the assignment to the standard shown in the rubric.

Level 3 â€" Challenge (for learners who finish early):

- Ask the learner to find and analyse three more designs.
- Ask the learner to create a "good version" and a "bad version" of the same design.
- Ask the learner to teach the rule of thirds to a partner.

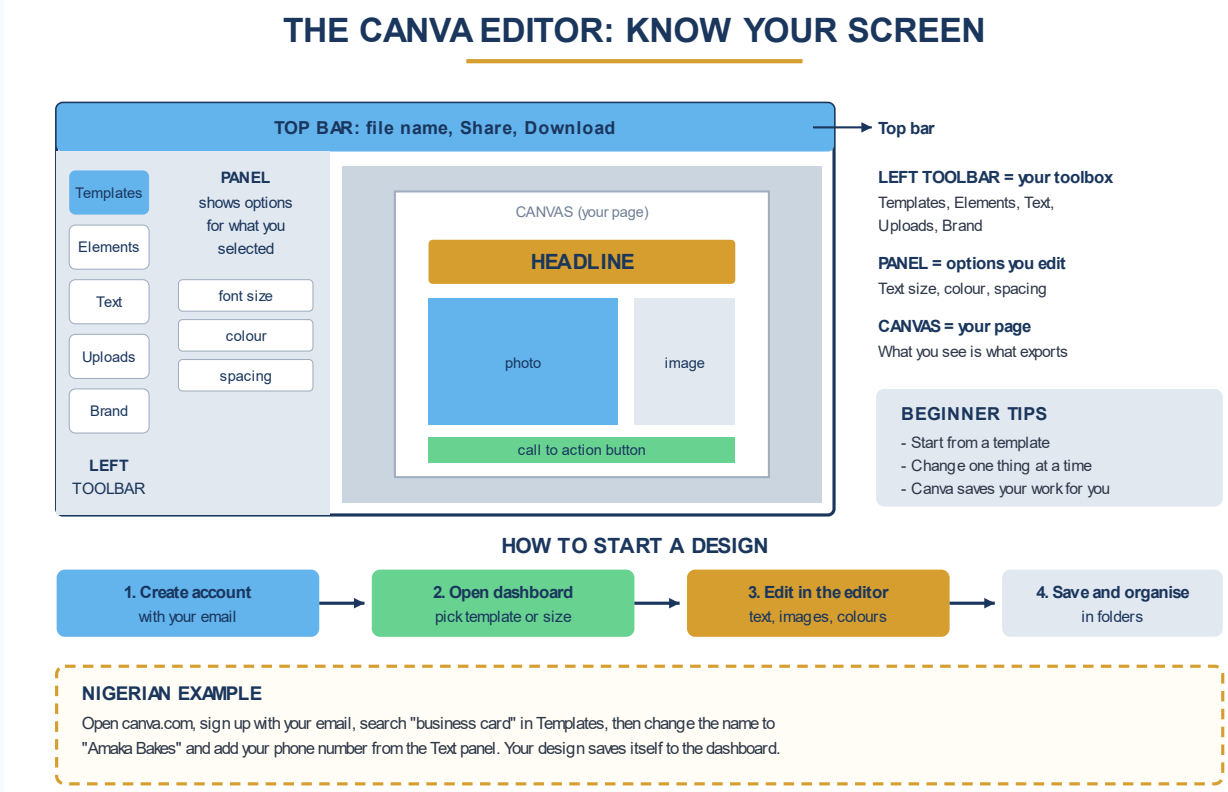

End of Session 3 â€" End of Week 1 (Design Foundations)

Next Session: Session 4 â€" The Tool: Canva Interface **What to Bring:** Curiosity, willingness to explore a new tool **Preparation:** Ensure Canva is accessible on all machines, prepare account creation guide

SESSION 04 OF 12

Canva Interface

CONCEPT DIAGRAM — SESSION 04

SESSION 4: THE TOOL â€" CANVA INTERFACE

Week: 2 **Module:** The Design Tool **Duration:** 105 minutes **Difficulty:** Beginner **Prerequisite Knowledge:** Sessions 1â€"3 â€" Design Foundations **Connection to Previous Session:** Transitions from design theory to practical tool skills **Preparation Required Before Class:**

- Ensure Canva.com is accessible on all academy machines
- Prepare a printed Canva account creation guide (one per learner)
- Test the Canva free tier to ensure all features used in this course are available
- Prepare sample designs for demonstration

A. SESSION IDENTIFICATION

Field	Detail
Session Number	4
Title	The Tool â€" Canva Interface
Week	2

Field	Detail
Module	The Design Tool
Duration	105 minutes
Difficulty	Beginner
Prerequisite Knowledge	Sessions 1â€"3 â€" Design Foundations
Connection to Previous Session	Transitions from theory to practice
Preparation	Canva accessible, account creation guide prepared

B. LEARNING OUTCOMES

By the end of this session, the learner will be able to:

1. **Create a Canva account** using their email address.
2. **Navigate the Canva dashboard** and home screen.
3. **Start a design** from a template or from custom dimensions.
4. **Identify the main parts of the Canva editor:** toolbar, panels, canvas, and top bar.
5. **Add and edit text** using the text panel.
6. **Add and edit images** using the uploads and elements panels.
7. **Save and organise designs** in the Canva dashboard.
8. **Explain why** Canva is a suitable tool for beginner designers.

C. REQUIRED MATERIALS

Hardware:

- One desktop computer per learner
- One keyboard per learner
- One mouse per learner
- One monitor per learner
- Projector for instructor demonstration

Software:

- Google Chrome or Microsoft Edge web browser
- Canva (free tier) â€" accessed through the browser

Accounts:

- Each learner needs an email address to create a Canva account
- If a learner does not have an email, the instructor provides a shared practice account

Internet:

- Academy Wi-Fi (required for this session)

Printed Materials:

- "Canva Account Creation Guide" (one per learner)
- "Canva Interface Diagram" handout (one per learner)

Alternative for Learners Without Email:

- The instructor creates a shared Canva account for learners who cannot create their own.
- Alternatively, learners can pair up and observe while their partner creates the account.

D. OPENING ACTIVITY (10 minutes)

"From Theory to Practice"

Instructor Setup: Display a professional design on the projector. Tell the learners you created it in 5 minutes using Canva.

Instructor Script: "Good morning, everyone. Over the past three sessions, you have learned the principles of design â€" hierarchy, contrast, alignment, balance, white space, colour theory, typography, image selection and composition. You now know how to see a good design.

But knowing is not enough. You also need to be able to DO. Today, we start learning the tool you will use to create designs: Canva.

Canva is a free, web-based design tool. It is used by millions of people worldwide â€" business owners, teachers, church administrators, social media managers and professional designers. It is beginner-friendly but powerful enough for professional work.

Watch this. [Display the design.] I created this in 5 minutes using Canva. By the end of this session, you will be able to create designs like this too.

Let us begin."

Expected Learner Response: Excitement about finally using a tool. Curiosity about how Canva works.

E. PREREQUISITE REVIEW (5 minutes)

Instructor Script: "Before we start, let us remember the design principles we learned last week. Quick review."

Review Questions and Expected Answers:

1. "What are the six core design principles?"
    - Hierarchy, contrast, alignment, balance, white space, purpose/audience.
2. "What is the 60-30-10 rule?"
    - 60% dominant colour, 30% secondary colour, 10% accent colour.
3. "What is the rule of thirds?"
    - Dividing an image into nine equal parts and placing key elements along the lines.
4. "What are the four font categories?"
    - Serif, sans-serif, script, display.
5. "What is the maximum number of fonts you should use in a design?"
    - Two.

How to Address Common Gaps:

- If a learner cannot remember the principles, ask a partner to help.
- If a learner forgot the rule of thirds, draw a quick 3x3 grid on the whiteboard.

F. FULL LECTURE NOTES (35 minutes)

Topic 1: What Is Canva? (5 minutes)

Instructor Script: "Canva is a free, web-based design tool. It runs in your web browser â€" you do not need to install anything. It has a free tier that is powerful enough for most design work, and a paid tier (Canva Pro) with additional features.

Why Canva?

- It is free (for the features we will use).
- It is beginner-friendly â€" no design experience needed.

- It has thousands of templates, images, fonts and elements.
- It works on any computer with a web browser.
- It is used by professionals worldwide.

Canva vs Other Tools:

- **Photoshop:** Powerful but expensive and complex. Overkill for most beginner design work.
- **CorelDRAW:** Professional vector design tool. Also complex and expensive.
- **Microsoft PowerPoint:** Can be used for simple designs but is not designed for graphic design.
- **Canva:** Free, beginner-friendly and powerful enough for most commercial design work.

When to Use Other Tools:

- Use Photoshop for photo retouching and advanced image editing.
- Use CorelDRAW for logo construction and large-format print.
- Use Canva for flyers, social media posts, business cards, presentations and most everyday design work."

Topic 2: Creating a Canva Account (10 minutes)

Instructor Script: "Let us create a Canva account. Follow along on your own machines."

Step-by-Step Instructions:

1. "Open your web browser. Go to canva.com."
2. "Click 'Sign up' in the top-right corner."
3. "Choose 'Sign up with email' (or use Google/Facebook if you prefer)."
4. "Enter your email address."
5. "Create a password. Use a strong password â€" a mix of letters, numbers and symbols."
6. "Enter your name."
7. "Click 'Create account.'"
8. "Canva will ask what you want to use it for. Choose 'Personal' or 'Small business.'"
9. "Canva will ask about your experience. Choose 'Beginner' or 'I'm new to design.'"
10. "Canva will show you a tutorial. You can skip it for now â€" we will learn everything you need in this course."
11. "You are now on the Canva dashboard. This is your home screen."

Important Notes:

- Your Canva account is free. You do not need to enter payment information.
- If you already have a Canva account, sign in instead of creating a new one.
- If you do not have an email address, ask the instructor for help.

Topic 3: The Canva Dashboard and Home Screen (5 minutes)

Instructor Script: "The Canva dashboard is your home screen. Here is what you see:

Top Bar:

- **Canva logo:** Click to return to the dashboard.
- **Search bar:** Search for templates, images and elements.
- **Create a design button:** Start a new design.
- **Templates button:** Browse template categories.
- **Projects button:** View your saved designs.
- **Share button:** Share designs with others.
- **Profile icon:** Access your account settings.

Main Area:

- **Recent designs:** Your most recently edited designs.
- **Recommended templates:** Templates suggested by Canva based on your usage.
- **Create a design:** Quick-start options for common design types (social media post, presentation, poster, etc.).

Left Sidebar:

- **Home:** Return to the dashboard.
- **Projects:** All your saved designs.
- **Templates:** Browse all templates.
- **Photos:** Your uploaded photos.
- **Elements:** Shapes, icons, illustrations and other design elements.
- **Text:** Text styles and font pairings.
- **Uploads:** Images and files you have uploaded.
- **Folders:** Organise your designs into folders."

Topic 4: Starting a Design (10 minutes)

Instructor Script: "There are two ways to start a design in Canva: from a template or from scratch.

Starting from a Template:

1. Click "Create a design" or "Templates."
2. Choose a design type (e.g., "Social Media Post," "Flyer," "Presentation").
3. Browse the template gallery.
4. Click on a template to open it in the editor.
5. Customise the template by changing text, colours, fonts and images.

Starting from Scratch (Custom Dimensions):

1. Click "Create a design."
2. Click "Custom size" (usually in the top-right corner).
3. Enter the width and height in pixels, inches or millimetres.
4. Click "Create new design."
5. A blank canvas appears with your custom dimensions.

Common Design Dimensions:

- **Instagram Post:** 1080 x 1080 pixels (square)
- **Facebook Post:** 1200 x 628 pixels
- **Flyer (A4):** 2480 x 3508 pixels (at 300 DPI for print)
- **Business Card:** 1050 x 600 pixels (standard 3.5 x 2 inches at 300 DPI)
- **Presentation (16:9):** 1920 x 1080 pixels
- **Poster (A3):** 3508 x 4961 pixels (at 300 DPI for print)

Best Practice: Always check the required dimensions before starting a design. If you are designing for print, use 300 DPI. If you are designing for digital, 72 DPI is sufficient."

Topic 5: The Canva Editor Interface (5 minutes)

Instructor Script: "The Canva editor is where you create and design. Here are the main parts:

Top Bar:

- **File menu:** Save, download, share
- **Undo/Redo buttons:** Reverse or repeat actions
- **Design name:** Click to rename your design
- **Share button:** Share your design with others
- **Download button:** Export your design as an image or PDF

Left Sidebar:

- **Templates:** Browse and apply templates
- **Elements:** Shapes, icons, lines, frames, illustrations
- **Text:** Add headings, subheadings and body text

- **Uploads:** Upload and use your own images
- **Photos:** Browse Canva's free image library
- **Background:** Change the background colour or pattern
- **Folders:** Organise your design elements

Canvas (Centre): This is where your design appears. You can click on any element to select and edit it. You can drag elements to move them, resize them using the corner handles, and rotate them using the rotation handle.

Right Panel (Contextual): When you select an element, a panel appears on the right with editing options specific to that element. For example, if you select text, you will see font, size, colour and alignment options."

G. INSTRUCTOR DEMONSTRATION (15 minutes)

Demonstration 1: Creating a Design from Scratch (5 minutes)

What the Instructor Prepares:

- Canva open on the projector
- A blank canvas with custom dimensions (1080 x 1080 pixels for an Instagram post)

What the Instructor Says and Does: "I am going to create a simple Instagram post from scratch. Watch carefully."

1. "I click 'Create a design.' I click 'Custom size.' I type 1080 for width and 1080 for height. I click 'Create new design.'"
2. "A blank canvas appears. I go to the left sidebar and click 'Background.' I choose a light blue colour."
3. "I click 'Text' in the left sidebar. I click 'Add a heading.' A text box appears. I type 'Grand Opening.'"
4. "I select the text. I change the font to Montserrat, size to 80, colour to dark blue, and centre align."
5. "I click 'Add a subheading.' I type 'Saturday, 15th November 2026.' I change the font to Open Sans, size to 36, colour to dark grey."
6. "I click 'Elements' in the left sidebar. I search for 'star.' I drag a star onto the canvas. I resize it and position it above the heading."
7. "I click 'Uploads' in the left sidebar. I upload an image. I drag it onto the canvas. I resize and position it."
8. "I click 'Download' in the top-right corner. I choose PNG. I click 'Download.' The image is saved to my Downloads folder."

What Learners Should Observe: The instructor creating a design from scratch, adding text, elements and images, and downloading the final design.

Expected Result: Learners can describe the steps to create a design in Canva.

Demonstration 2: Customising a Template (5 minutes)

What the Instructor Prepares:

- Canva open on the projector
- A template selected from the gallery

What the Instructor Says and Does: "Now I will show you how to customise a template."

1. "I click 'Templates' in the left sidebar. I choose 'Social Media.' I browse the Instagram post templates."
2. "I find a template I like. I click on it. It opens in the editor."
3. "I click on the text. I change 'Your Text Here' to 'Sale â€" 50% Off.'"
4. "I click on the image. I press Delete to remove it. I go to 'Photos' in the left sidebar. I search for 'shopping.' I drag a new image onto the canvas."
5. "I click on the background. I change the colour from pink to dark blue."
6. "I click 'Download.' I choose PNG. I click 'Download.'"

What Learners Should Observe: The instructor customising a template by changing text, images and colours.

Expected Result: Learners can describe how to customise a template.

Demonstration 3: Saving and Organising Designs (5 minutes)

What the Instructor Prepares:

- The design from Demonstration 2

What the Instructor Says and Does: "Now I will show you how to save and organise your designs."

1. "I click on the design name in the top bar. I type 'Sale Instagram Post.' The design is automatically saved."
2. "I click 'Projects' in the left sidebar. I can see my design in the list."
3. "I click 'Create a new folder.' I name it 'Instagram Posts.' I drag my design into the folder."
4. "Now my design is organised. I can find it easily later."

What Learners Should Observe: The instructor saving and organising a design.

Expected Result: Learners can describe how to save and organise designs.

H. GUIDED PRACTICAL EXERCISE (20 minutes)

Exercise: "My First Canva Design"

Practical Objective: The learner will create a Canva account, create a simple Instagram post from scratch, and download it.

Starting Materials:

- A web browser open on each machine
- An email address for each learner (or a shared practice account)

Instructions:

Part 1: Create a Canva Account (5 minutes)

1. "Open your web browser. Go to canva.com."
2. "Follow the printed guide to create your account. Use your email address and create a strong password."
3. "When you reach the dashboard, raise your hand."

Instructor Prompts:

- "What do you see on the dashboard?" (Answer: Recent designs, recommended templates, create a design options.)
- "Where is the 'Create a design' button?" (Answer: In the top bar or main area.)

Part 2: Create an Instagram Post (10 minutes)

4. "Click 'Create a design.' Click 'Custom size.' Type 1080 for width and 1080 for height. Click 'Create new design.'"
5. "Go to the left sidebar. Click 'Background.' Choose a colour you like."
6. "Click 'Text' in the left sidebar. Click 'Add a heading.' Type your name."
7. "Select the text. Change the font, size and colour to make it stand out."
8. "Click 'Add a subheading.' Type 'Cyber Elias Academy â€" Graphic Design Course.'"
9. "Click 'Elements' in the left sidebar. Search for an element you like (e.g., 'star,' 'arrow,' 'circle'). Drag it onto the canvas."
10. "Resize and position the element."

Instructor Prompts:

- "What colour did you choose for the background?" (Answer: Varies.)
- "What font did you choose for the heading?" (Answer: Varies.)
- "What element did you add?" (Answer: Varies.)

Part 3: Download the Design (5 minutes)

11. "Click 'Download' in the top-right corner. Choose PNG. Click 'Download.'"
12. "The image is saved to your Downloads folder. Open the Downloads folder to verify."
13. "Click on the design name in the top bar. Type 'My First Canva Design.' The design is automatically saved."

Instructor Prompts:

- "Where was the image saved?" (Answer: The Downloads folder.)

- "What is the file name?" (Answer: Varies â€" Canva generates a default name.)

Expected Result: Every learner has created a Canva account, created a simple Instagram post and downloaded it.

Troubleshooting Guidance:

- If the learner cannot create a Canva account: "Make sure you have a valid email address. Check that you typed the password correctly."
- If the learner cannot find the 'Create a design' button: "It is in the top bar or in the main area of the dashboard."
- If the learner cannot download: "Click 'Download' in the top-right corner. Choose PNG. Click 'Download' again."
- If the learner cannot find the downloaded image: "Open File Explorer and navigate to the Downloads folder."

Completion Checklist:

- ☐ Canva account created
- ☐ Instagram post created from custom dimensions
- ☐ Background colour chosen
- ☐ Heading and subheading added
- ☐ Element added
- ☐ Design downloaded as PNG
- ☐ Design saved with a name

I. INDEPENDENT CLASS EXERCISE (10 minutes)

Exercise: "Canva Scavenger Hunt"

Scenario: "Your colleague asks you to find and use several tools in Canva. Your task is to find each tool and use it."

Task: Without looking at your notes or your neighbour's screen, complete the following tasks in Canva:

1. Open Canva and sign in to your account.
2. Create a new design with custom dimensions: 1200 x 628 pixels (Facebook post).
3. Change the background colour to dark green.
4. Add a heading: "Weekend Sale."
5. Add a subheading: "Saturday & Sunday Only."
6. Add a shape (e.g., a circle or rectangle) and position it behind the text.
7. Upload an image from your computer (or use a Canva photo) and add it to the design.
8. Download the design as a PNG.
9. Save the design with the name "Weekend Sale Post."

Requirements:

- Complete all 9 tasks independently
- Do not ask the instructor for help unless you are truly stuck

Time Allowance: 10 minutes

Success Criteria:

- All 9 tasks completed correctly
- The learner can explain what each tool does

Hints Available If the Learner Gets Stuck:

- Hint 1: "To create a custom size, click 'Create a design' and then 'Custom size.'"
- Hint 2: "To change the background, click 'Background' in the left sidebar."
- Hint 3: "To upload an image, click 'Uploads' in the left sidebar and then 'Upload files.'"

Complete Answer Key for the Instructor:

1. The learner opens Canva and signs in.
2. The learner creates a new design with custom dimensions 1200 x 628.

3. The learner changes the background to dark green.
4. The learner adds a heading "Weekend Sale."
5. The learner adds a subheading "Saturday & Sunday Only."
6. The learner adds a shape and positions it behind the text.
7. The learner uploads or selects an image and adds it to the design.
8. The learner downloads the design as a PNG.
9. The learner saves the design with the name "Weekend Sale Post."

J. REAL-WORLD CASE STUDY (5 minutes)

Case: "Adaeze's Social Media Presence"

Situation: Adaeze runs a small bakery in Port Harcourt. She wants to promote her business on Instagram but does not know how to create professional-looking posts. She takes photos with her phone and posts them directly, but they look amateur and do not attract customers.

The Problem: Adaeze's Instagram posts look unprofessional because they lack design. There is no consistent colour scheme, no clear hierarchy and no branding.

Why It Matters: Social media is one of the most powerful marketing tools for small businesses. A professional social media presence can attract customers, build trust and increase sales. An amateur presence can drive customers away.

Relevant Concept: Canva skills. If Adaeze knew how to use Canva, she could create professional-looking Instagram posts in minutes.

Worked Solution: If Adaeze had taken this course, here is what she would do:

1. Create a Canva account.
2. Set up a brand kit with her bakery's colours and fonts.
3. Create an Instagram post template with her logo, a consistent layout and her brand colours.
4. Each time she wants to post, she opens the template, changes the text and image, and downloads the design.
5. Her Instagram feed now looks professional and consistent.

Reasoning: Consistency is key in branding. When all your designs use the same colours, fonts and layout, people recognise your brand instantly. Canva makes this easy with templates and brand kits.

Possible Mistake: Adaeze might create a different design for each post, with different colours and fonts. This looks inconsistent and unprofessional.

Correction: Create a template and reuse it. Change only the text and image. Keep the colours, fonts and layout consistent.

Transfer Exercise: "Your friend Chinedu sells phone accessories. He posts on Instagram but his posts look messy. What advice would you give him?"

Professional Connection: Every small business needs a social media presence. Social media posts are designs. The skills you learn in this course will help you create professional-looking posts that attract customers.

K. COMMON MISTAKES AND TROUBLESHOOTING (5 minutes)

Mistake 1: Not Creating a Canva Account

Symptoms: The learner tries to use Canva without an account. **Likely Cause:** The learner does not know they need an account. **How to Investigate:** Ask the learner, "Do you have a Canva account?" **Safe Corrective Steps:** Guide the learner through the account creation process. **How to Confirm the Problem Is Resolved:** The learner has a Canva account. **How to Prevent Recurrence:** Make account creation a standard first step in every Canva session.

Mistake 2: Using the Wrong Dimensions

Symptoms: The learner creates a design with the wrong dimensions. **Likely Cause:** The learner does not know the standard dimensions. **How to Investigate:** Check the design dimensions. Are they correct for the intended format? **Safe Corrective Steps:** Teach the learner the standard dimensions for common design types. **How to Confirm the Problem Is Resolved:** The learner uses correct dimensions. **How to Prevent Recurrence:** Provide a "Standard Design Dimensions" reference card.

Mistake 3: Not Saving Designs

Symptoms: The learner creates a design but does not save it. **Likely Cause:** The learner does not know that Canva auto-saves. **How to Investigate:** Ask the learner, "Did you save your design?" **Safe Corrective Steps:** Explain that Canva auto-saves designs. Show them how to rename and organise designs. **How to Confirm the Problem Is Resolved:** The learner saves and organises designs. **How to Prevent Recurrence:** Remind the learner that Canva auto-saves, but they should still rename and organise designs.

Mistake 4: Not Downloading Designs

Symptoms: The learner creates a design but does not download it. **Likely Cause:** The learner does not know how to download. **How to Investigate:** Ask the learner, "Did you download your design?" **Safe Corrective Steps:** Show the learner how to download designs from the top-right corner. **How to Confirm the Problem Is Resolved:** The learner downloads designs. **How to Prevent Recurrence:** Make downloading a standard step in every Canva exercise.

Mistake 5: Using Too Many Templates

Symptoms: The learner uses a different template for every design, resulting in inconsistent branding. **Likely Cause:** The learner does not understand the importance of consistency. **How to Investigate:** Look at the learner's designs. Are they consistent? **Safe Corrective Steps:** Teach the learner to create a reusable template and stick with it. **How to Confirm the Problem Is Resolved:** The learner uses consistent templates. **How to Prevent Recurrence:** Remind the learner: "Consistency is key in branding."

L. SESSION ASSIGNMENT (5 minutes)

Assignment Title: "My Branded Instagram Post"

Purpose: To reinforce Canva skills by having the learner create a branded Instagram post.

Realistic Scenario: "You are a small business owner. You want to create a professional Instagram post to promote your business. Create this post in Canva."

Detailed Instructions:

1. Open Canva and sign in to your account.
2. Create a new design with custom dimensions: 1080 x 1080 pixels (Instagram post).
3. Choose a background colour that represents your business.
4. Add a heading with your business name.
5. Add a subheading with a tagline or promotion.
6. Add at least one element (shape, icon or illustration).
7. Upload or select an image that represents your business.
8. Apply the design principles you learned in Week 1 (hierarchy, contrast, alignment, balance, white space).
9. Download the design as a PNG.
10. Save the design with the name "My Branded Instagram Post."
11. Show the downloaded image to the instructor before leaving.

Required Deliverables:

- A PNG image of the Instagram post (downloaded from Canva)
- The design saved in Canva with the correct name

Submission Format:

- The learner must show the instructor the downloaded image on their screen
- The design must be visible in the learner's Canva account

Deadline Recommendation:

- Before leaving the session (in-class assignment)

Marking Rubric:

Criterion	Excellent (5)	Good (3)	Needs Improvement (1)
Dimensions	Correct (1080 x 1080)	Slightly off	Incorrect
Background colour	Appropriate for the business	Mostly appropriate	Inappropriate
Heading	Clear, well-formatted	Mostly clear	Unclear or missing
Subheading	Clear, well-formatted	Mostly clear	Unclear or missing
Element	Relevant and well-positioned	Present but not ideal	Missing or irrelevant
Image	Relevant and high-quality	Present but not ideal	Missing or irrelevant
Design principles	All principles applied correctly	Most principles applied	Few principles applied
Download	PNG downloaded correctly	Downloaded but wrong format	Not downloaded
File saved correctly	Saved in Canva with correct name	Saved but wrong name	Not saved

Total: 45 marks

Common Mistakes to Avoid:

- Using the wrong dimensions
- Not applying design principles
- Not downloading the design
- Not saving the design

Instructor Reference Solution:

The final Instagram post should have:

- Correct dimensions (1080 x 1080 pixels)
- An appropriate background colour
- A clear, well-formatted heading with the business name
- A clear, well-formatted subheading
- At least one relevant element
- A relevant, high-quality image
- All design principles applied (hierarchy, contrast, alignment, balance, white space)
- Downloaded as a PNG
- Saved in Canva with the correct name

M. KNOWLEDGE CHECK (5 minutes)

Questions

1. Multiple Choice: What is Canva? a) A photo editing software you install on your computer b) A free, web-based design tool c) A video editing program d) A word processing program

Answer: b) A free, web-based design tool

2. Short Answer: What are the standard dimensions for an Instagram post?

Answer: 1080 x 1080 pixels (square).

3. Multiple Choice: Where do you find the 'Create a design' button in Canva? a) In the left sidebar b) In the top bar or main area of the dashboard c) In the Download menu d) In the profile settings

Answer: b) In the top bar or main area of the dashboard

4. Explain in Your Own Words: Why is it important to use the correct dimensions for a design?

Answer: Using the correct dimensions ensures that the design fits the intended format. An Instagram post with the wrong dimensions will be cropped or stretched when uploaded. A flyer with the wrong dimensions will not print correctly.

5. Practical Identification: Open Canva. Identify the left sidebar, the canvas, the top bar, and the Download button.

Answer: The learner correctly identifies all four elements.

6. Scenario-Based: Your friend says, "I created a design in Canva but I cannot find it. Where did it go?" What advice would you give?

Answer: Canva automatically saves your designs. Click 'Projects' in the left sidebar to see all your saved designs. If you still cannot find it, check the 'Recent designs' section on the dashboard.

7. Error-Detecting: A learner writes in their assignment: "I created a Facebook post with dimensions 1080 x 1080 pixels." What is wrong with this, and what should they have done instead?

Answer: 1080 x 1080 is the dimension for an Instagram post (square). A Facebook post should be 1200 x 628 pixels (landscape). The learner should have used the correct dimensions for the intended format.

N. REFLECTION AND RECAP (5 minutes)

Plain-English Summary

Today you learned how to use Canva â€" the design tool you will use throughout the rest of this course. You learned how to create a Canva account, navigate the dashboard, start a design from scratch or from a template, add text and images, and download your designs. You also learned the standard dimensions for common design types. You now have the tool skills to create professional designs.

Five Important Takeaways

1. Canva is a free, web-based design tool â€" no installation needed.
2. Always use the correct dimensions for the intended format.
3. Canva auto-saves your designs, but you should still rename and organise them.
4. Download your designs as PNG for digital use or PDF for print.
5. Consistency is key â€" create templates and reuse them.

Questions That Help You Recognise What You Can Now Do

- Can you create a Canva account?
- Can you navigate the Canva dashboard?
- Can you create a design from custom dimensions?
- Can you add text, elements and images in Canva?
- Can you download and save your designs?

Connection to the Next Session

In the next session, you will learn more advanced Canva skills â€" layers, alignment, grouping, effects and brand setup. You will also learn how to set up a brand kit with your colours and fonts. You now know the basics. Next, you will learn to work like a professional in Canva.

O. INSTRUCTOR EVALUATION NOTES

Observable Signs of Competence

- The learner creates a Canva account independently.

- The learner navigates the Canva dashboard.
- The learner creates a design from custom dimensions.
- The learner adds text, elements and images.
- The learner downloads and saves designs.
- The learner uses correct dimensions.

Common Misconceptions

- **"Canva is only for social media."** Some learners think Canva is only for Instagram posts. Correct this by showing them the full range of design types available.
- **"I need to pay for Canva."** Some learners think Canva is a paid tool. Correct this by explaining the free tier.
- **"Templates are cheating."** Some learners think using templates is not real design. Correct this by explaining that professionals use templates too â€" the skill is in customising them.

Suggested Remedial Exercises

- For learners who cannot create a Canva account: Sit with them and guide them through the process step by step.
- For learners who use the wrong dimensions: Provide a "Standard Design Dimensions" reference card.
- For learners who cannot download: Walk them through the download process step by step.

Differentiation Guidance

Level 1 â€" Supported (for learners who struggle):

- Provide a printed "Canva Account Creation Guide" with screenshots.
- Pair with a more confident learner for practical exercises.
- Allow extra time for the independent exercise.
- Focus on account creation and basic navigation before design work.

Level 2 â€" Independent (standard):

- Complete all exercises as written.
- Answer all knowledge check questions.
- Complete the assignment to the standard shown in the rubric.

Level 3 â€" Challenge (for learners who finish early):

- Ask the learner to create designs for multiple formats (Instagram, Facebook, flyer).
- Ask the learner to research and write down three more Canva features.
- Ask the learner to explain the difference between Canva Free and Canva Pro.

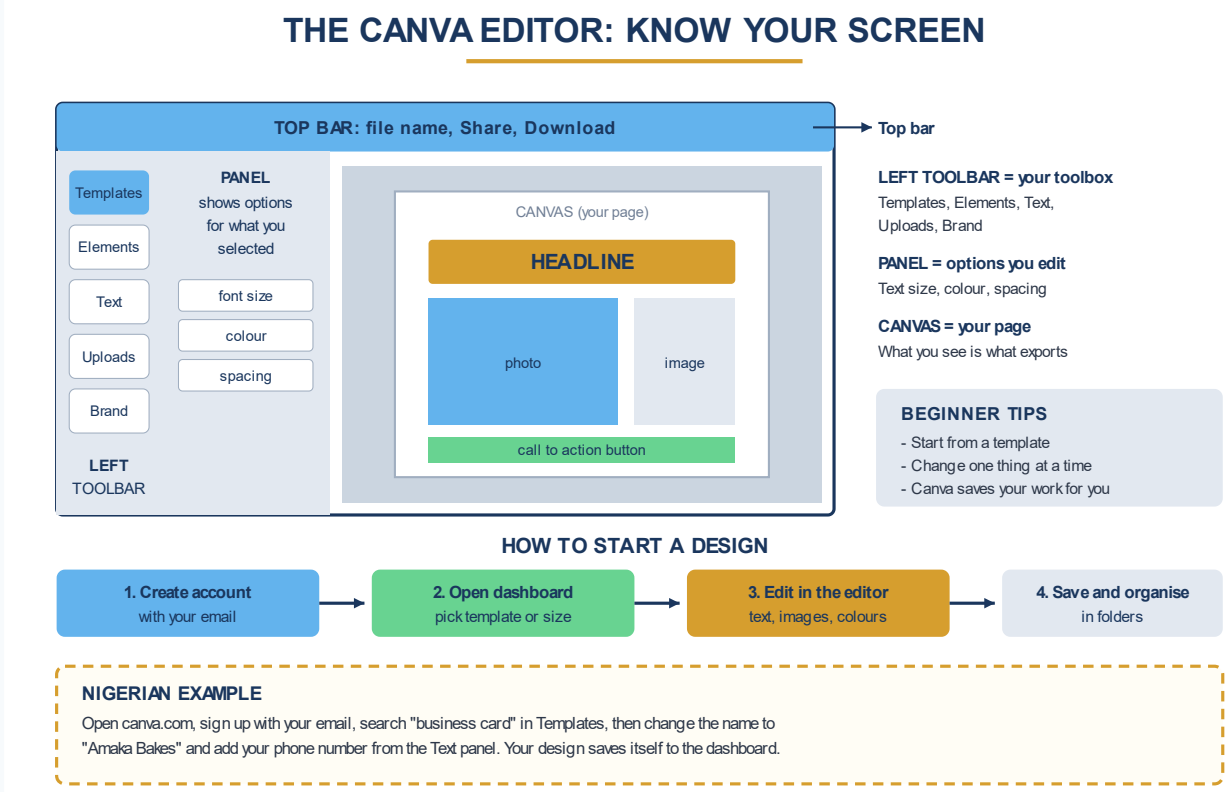

End of Session 4

Next Session: Session 5 â€" The Tool: Layers & Brand **What to Bring:** Attention to detail, willingness to experiment
Preparation: Prepare brand setup examples

SESSION 05 OF 12

Canva Layers Brand

CONCEPT DIAGRAM — SESSION 05

SESSION 5: THE TOOL â€" LAYERS & BRAND

Week: 2 **Module:** The Design Tool **Duration:** 105 minutes **Difficulty:** Beginner **Prerequisite Knowledge:** Session 4 â€" Canva Interface **Connection to Previous Session:** Builds on Session 4 by teaching layers, alignment, grouping and brand setup

Preparation Required Before Class:

- Ensure Canva is accessible on all machines
- Prepare brand setup examples (colours and fonts)
- Prepare layer and alignment demonstrations

A. SESSION IDENTIFICATION

Field	Detail
Session Number	5
Title	The Tool â€" Layers & Brand
Week	2
Module	The Design Tool

Field	Detail
Duration	105 minutes
Difficulty	Beginner
Prerequisite Knowledge	Session 4 â€" Canva Interface
Connection to Previous Session	Builds on Session 4 by teaching layers and brand
Preparation	Brand setup examples prepared

B. LEARNING OUTCOMES

By the end of this session, the learner will be able to:

1. **Understand layers** and how they work in Canva.
2. **Use positioning and alignment tools** to arrange elements precisely.
3. **Group and ungroup elements** for easier editing.
4. **Apply transparency and effects** to elements.
5. **Crop and mask images** using frames.
6. **Set up a Canva brand kit** with custom colours and fonts.
7. **Apply brand colours and fonts** consistently across designs.
8. **Explain why** brand consistency matters in professional design.

C. REQUIRED MATERIALS

Hardware:

- One desktop computer per learner
- One keyboard per learner
- One mouse per learner
- One monitor per learner
- Projector for instructor demonstration

Software:

- Google Chrome or Microsoft Edge web browser
- Canva (free tier)

Accounts:

- Each learner's Canva account (created in Session 4)

Internet:

- Academy Wi-Fi (required for this session)

Printed Materials:

- "Brand Setup Guide" handout (one per learner)

Teaching Aids:

- Projected brand examples (consistent vs inconsistent)

D. OPENING ACTIVITY (10 minutes)

"The Brand Consistency Test"

Instructor Setup: Display two sets of social media posts â€" one set with consistent branding (same colours, fonts, layout) and one set with inconsistent branding (different colours, fonts, layout for each post).

Instructor Script: "Good morning, everyone. Look at these two sets of social media posts. They are for the same business â€" a restaurant. But one set looks professional and the other looks amateur. What is the difference? [Pause for answers â€" colours, fonts, consistency.]

The difference is brand consistency. The set on the left uses the same colours, fonts and layout for every post. The set on the right uses different colours, fonts and layout for each post.

When people see your posts, they should instantly recognise your brand. That is what brand consistency does. Today, you will learn how to set up a brand kit in Canva and apply it consistently across all your designs. Let us begin."

Expected Learner Response: Learners will identify the consistent set as more professional. This sets the context for the session.

E. PREREQUISITE REVIEW (5 minutes)

Instructor Script: "Before we start, let us remember what we learned in the last session. Quick review."

Review Questions and Expected Answers:

1. "How do you create a Canva account?"
    - Go to canva.com, click Sign up, enter your email and password, and follow the prompts.
2. "What are the standard dimensions for an Instagram post?"
    - 1080 x 1080 pixels.
3. "How do you add text in Canva?"
    - Click 'Text' in the left sidebar, then click 'Add a heading' or 'Add a subheading.'
4. "How do you download a design in Canva?"
    - Click 'Download' in the top-right corner, choose a format, and click 'Download.'
5. "What is the most important principle of branding?"
    - Consistency â€" using the same colours, fonts and layout across all designs.

How to Address Common Gaps:

- If a learner cannot remember how to create a Canva account, ask a partner to help.
- If a learner forgot the standard dimensions, provide a quick reference.

F. FULL LECTURE NOTES (35 minutes)

Topic 1: Understanding Layers (10 minutes)

Instructor Script: "In Canva, every element on your design â€" text, images, shapes, backgrounds â€" is a layer. Layers are stacked on top of each other, like sheets of paper. The layer at the top of the stack is in front. The layer at the bottom is behind.

Why Layers Matter: Understanding layers helps you control which elements are in front and which are behind. For example, if you want text to appear on top of an image, the text layer must be above the image layer.

How to Manage Layers in Canva:

1. Click on an element to select it.
2. Right-click and choose 'Layer' to see layer options:
    - 'Bring to front': Move the element to the top of the stack.
    - 'Bring forward': Move the element up one layer.
    - 'Send to back': Move the element to the bottom of the stack.
    - 'Send backward': Move the element down one layer.

Layer Tips:

- The background is always the bottom layer.
- Text should usually be above images and shapes.
- If you cannot select an element, it may be behind another element. Use 'Send to back' on the front element to access it."

Topic 2: Positioning and Alignment (10 minutes)

Instructor Script: "Precise positioning and alignment are what separate a professional design from an amateur one. Canva has tools to help you align elements perfectly.

Positioning Tools:

1. Select an element.
2. Right-click and choose 'Position' to see positioning options:
    - 'Center': Centre the element on the canvas.
    - 'Middle': Centre the element vertically.
    - 'Top' / 'Bottom': Align to the top or bottom edge.
    - 'Left' / 'Right': Align to the left or right edge.

Alignment Tools:

1. Select multiple elements (hold Shift and click).
2. Right-click and choose 'Align' to see alignment options:
    - 'Align left': Align all selected elements to the left edge.
    - 'Align centre': Align all selected elements to the centre.
    - 'Align right': Align all selected elements to the right edge.
    - 'Align top': Align all selected elements to the top edge.
    - 'Align middle': Align all selected elements to the vertical centre.
    - 'Align bottom': Align all selected elements to the bottom edge.

Spacing Tools:

1. Select multiple elements.
2. Right-click and choose 'Spacing' to distribute elements evenly:
    - 'Distribute horizontally': Equal spacing between elements horizontally.
    - 'Distribute vertically': Equal spacing between elements vertically.

Alignment Tips:

- Use the alignment tools instead of eyeballing. Eyeballing is imprecise.
- Use the spacing tools to create even gaps between elements.
- Hold Shift when dragging to constrain movement to horizontal or vertical."

Topic 3: Grouping and Transparency (10 minutes)

Instructor Script: "Grouping and transparency are two powerful tools for managing complex designs.

Grouping: Grouping combines multiple elements into a single unit. This makes it easier to move, resize or edit them together.

1. Select multiple elements (hold Shift and click).
2. Right-click and choose 'Group' (or press Ctrl+G).
3. The elements are now grouped. You can move or resize them as one unit.
4. To ungroup, right-click and choose 'Ungroup' (or press Ctrl+Shift+G).

Transparency: Transparency makes an element see-through. This is useful for:

- Creating overlay effects.
- Making background images less dominant.
- Creating watermark effects.

1. Select an element.
2. Click the transparency button (checkerboard icon) in the top toolbar.
3. Drag the slider to adjust the transparency (0% = fully opaque, 100% = fully transparent).

Grouping and Transparency Tips:

- Group elements that belong together (e.g., a logo and a tagline).
- Use transparency to create subtle background effects.
- Do not make text too transparent â€" it must remain readable."

Topic 4: Brand Setup (5 minutes)

Instructor Script: "A brand kit is a collection of your brand's colours, fonts and logos. Setting up a brand kit in Canva ensures that all your designs are consistent.

Setting Up Brand Colours:

1. Go to your Canva dashboard.
2. Click 'Brand Kit' in the left sidebar (or 'Brand' in the top bar).
3. Click 'Add a brand colour.'
4. Enter the hex code or use the colour picker to choose your brand colour.
5. Repeat for all your brand colours.

Setting Up Brand Fonts:

1. In the Brand Kit, click 'Add a brand font.'
2. Choose a heading font and a body font from the font dropdowns.
3. These fonts will now be available in all your designs under 'Brand fonts.'

Using Your Brand Kit:

1. Open any design.
2. Click on an element (e.g., text or shape).
3. In the colour picker, you will see your brand colours under 'Brand colours.'
4. In the font dropdown, you will see your brand fonts under 'Brand fonts.'

Best Practice:

- Choose 2â€"3 brand colours (one dominant, one secondary, one accent).
- Choose 2 brand fonts (one for headings, one for body text).
- Use your brand colours and fonts in every design."

G. INSTRUCTOR DEMONSTRATION (15 minutes)

Demonstration 1: Working with Layers (5 minutes)

What the Instructor Prepares:

- A Canva design with multiple elements

What the Instructor Says and Does: "I am going to show you how to work with layers."

1. "I have a design with a background, an image and some text. The text is behind the image, so I cannot see it."
2. "I right-click on the text. I choose 'Layer' and then 'Bring to front.' The text moves to the top of the stack and is now visible."
3. "Now I want to move the image behind the text but in front of the background. I right-click on the image. I choose 'Layer' and then 'Send backward.' The image moves down one layer."
4. "Now the order is: text (front), image (middle), background (back)."

What Learners Should Observe: The instructor managing layers to control the stacking order.

Expected Result: Learners can describe how to manage layers in Canva.

Demonstration 2: Alignment and Grouping (5 minutes)

What the Instructor Prepares:

- A Canva design with multiple elements

What the Instructor Says and Does: "Now I will show you alignment and grouping."

1. "I have three shapes on the canvas. I want to align them. I hold Shift and click on all three to select them."
2. "I right-click and choose 'Align' and then 'Align centre.' All three shapes are now centred horizontally."
3. "I right-click and choose 'Spacing' and then 'Distribute vertically.' The shapes are now evenly spaced."
4. "Now I want to group them so I can move them together. I right-click and choose 'Group.' The three shapes are now one unit."
5. "I drag the group to a new position. All three shapes move together."

What Learners Should Observe: The instructor using alignment, spacing and grouping tools.

Expected Result: Learners can describe how to use alignment and grouping in Canva.

Demonstration 3: Setting Up a Brand Kit (5 minutes)

What the Instructor Prepares:

- Canva open on the projector

What the Instructor Says and Does: "Now I will show you how to set up a brand kit."

1. "I click 'Brand Kit' in the left sidebar."
2. "I click 'Add a brand colour.' I enter a hex code for dark blue (#1A3A5C). I click 'Add.'"
3. "I add another brand colour â€" orange (#E67E22)."
4. "I add a third brand colour â€" white (#FFFFFF)."
5. "I click 'Add a brand font.' I choose Montserrat for headings and Open Sans for body text."
6. "Now I open a new design. I add some text. I click on the text. In the colour picker, I see my brand colours. I choose dark blue. In the font dropdown, I see my brand fonts. I choose Montserrat."
7. "My design now uses my brand colours and fonts. Every design I create from now on will be consistent."

What Learners Should Observe: The instructor setting up a brand kit and applying it to a design.

Expected Result: Learners can describe how to set up and use a brand kit in Canva.

H. GUIDED PRACTICAL EXERCISE (20 minutes)

Exercise: "My Branded Template"

Practical Objective: The learner will set up a Canva brand kit and create a reusable template using their brand colours and fonts.

Starting Materials:

- Canva open on each machine, signed in to the learner's account

Instructions:

Part 1: Set Up Your Brand Kit (8 minutes)

1. "Click 'Brand Kit' in the left sidebar."
2. "Add three brand colours. Choose colours that represent your business. You can use hex codes or the colour picker."
3. "Add two brand fonts â€" one for headings and one for body text."
4. "Your brand kit is now set up."

Instructor Prompts:

- "What colours did you choose?" (Answer: Varies.)
- "What fonts did you choose?" (Answer: Varies.)

- "Why did you choose those colours and fonts?" (Answer: They represent the business's brand and audience.)

Part 2: Create a Reusable Template (12 minutes)

5. "Create a new design with custom dimensions: 1080 x 1080 pixels (Instagram post)."
6. "Set the background to one of your brand colours."
7. "Add a heading using your brand heading font. Type your business name."
8. "Add a subheading using your brand body font. Type a tagline."
9. "Add a shape using one of your brand colours."
10. "Add an image that represents your business."
11. "Use the alignment tools to centre all elements."
12. "Group the elements that belong together."
13. "Save the design with the name 'My Branded Template.'"

Instructor Prompts:

- "Did you use your brand colours?" (Answer: Yes.)
- "Did you use your brand fonts?" (Answer: Yes.)
- "Are all elements aligned?" (Answer: Yes.)

Expected Result: Every learner has set up a brand kit and created a reusable template using their brand colours and fonts.

Troubleshooting Guidance:

- If the learner cannot find the Brand Kit: "Click 'Brand Kit' in the left sidebar. If you do not see it, look for 'Brand' in the top bar."
- If the learner cannot add brand colours: "Click 'Add a brand colour' in the Brand Kit. Enter a hex code or use the colour picker."
- If the learner cannot align elements: "Select multiple elements by holding Shift and clicking. Then right-click and choose 'Align.'"

Completion Checklist:

- ☐ Brand kit set up with 3 colours and 2 fonts
- ☐ Template created with correct dimensions
- ☐ Brand colours and fonts applied
- ☐ Elements aligned and grouped
- ☐ Template saved with correct name

I. INDEPENDENT CLASS EXERCISE (10 minutes)

Exercise: "Brand Consistency Challenge"

Scenario: "You are given a design that does not use consistent branding. Your task is to fix it using your brand kit."

Task: Open the "Inconsistent Design" file provided by the instructor (or create a new design). Fix the following:

1. Change all colours to your brand colours.
2. Change all fonts to your brand fonts.
3. Align all elements using the alignment tools.
4. Group related elements.
5. Add transparency to the background image if needed.
6. Save the design as "Consistent Design."

Requirements:

- Use only your brand colours and fonts
- All elements must be aligned
- Related elements must be grouped

Time Allowance: 10 minutes

Success Criteria:

- All colours match the brand kit
- All fonts match the brand kit
- All elements are aligned
- Related elements are grouped

Hints Available If the Learner Gets Stuck:

- Hint 1: "Click on an element and look for your brand colours in the colour picker."
- Hint 2: "Select multiple elements by holding Shift and clicking, then use the alignment tools."
- Hint 3: "Right-click on related elements and choose 'Group.'"

Complete Answer Key for the Instructor:

The final design should have:

- All colours matching the learner's brand kit
- All fonts matching the learner's brand kit
- All elements properly aligned
- Related elements grouped
- Saved as "Consistent Design"

J. REAL-WORLD CASE STUDY (5 minutes)

Case: "The Business That Built a Brand"

Situation: Adaeze runs a small fashion design business in Port Harcourt. She has been using Canva for a few months but her designs look inconsistent. Each flyer, social media post and business card uses different colours and fonts. Customers do not recognise her brand.

The Problem: Adaeze's designs lack brand consistency. She does not have a brand kit set up. She chooses colours and fonts randomly for each design.

Why It Matters: Brand consistency builds recognition and trust. When customers see consistent colours, fonts and layouts, they instantly recognise the brand. Inconsistent branding looks unprofessional and confuses customers.

Relevant Concept: Brand setup. If Adaeze had set up a brand kit and used it consistently, her designs would look professional and recognisable.

Worked Solution: If Adaeze had taken this course, here is what she would do:

1. Choose 2â€“3 brand colours that represent her fashion brand.
2. Choose 2 brand fonts â€“ one for headings, one for body text.
3. Set up a brand kit in Canva.
4. Create a reusable template for social media posts.
5. Use the same colours, fonts and layout for every design.
6. Her brand is now instantly recognisable.

Reasoning: Brand consistency is not about being boring. It is about being recognisable. When people see your colours and fonts, they should think of your business â€“ even before they read the text.

Possible Mistake: Adaeze might think that using the same colours and fonts for every design is boring. She might want to try something new each time. But consistency is more important than variety in branding.

Correction: You can vary the images and text, but keep the colours, fonts and layout consistent. That is how professional brands work.

Transfer Exercise: "Your friend Chinedu sells phone accessories. He uses different colours and fonts for every Instagram post. What advice would you give him?"

Professional Connection: Every business, no matter how small, needs consistent branding. The skills you learn in this session will help you build a recognisable brand for any business.

K. COMMON MISTAKES AND TROUBLESHOOTING (5 minutes)

Mistake 1: Not Setting Up a Brand Kit

Symptoms: The learner creates designs without setting up a brand kit. **Likely Cause:** The learner does not know about brand kits or does not understand their importance. **How to Investigate:** Ask the learner, "Do you have a brand kit set up?" **Safe Corrective Steps:** Guide the learner through the brand kit setup process. **How to Confirm the Problem Is Resolved:** The learner has a brand kit set up. **How to Prevent Recurrence:** Make brand kit setup a standard step in every Canva project.

Mistake 2: Not Using Alignment Tools

Symptoms: The learner eyeballs the positioning of elements instead of using alignment tools. **Likely Cause:** The learner does not know about the alignment tools. **How to Investigate:** Look at the design. Are the elements precisely aligned? **Safe Corrective Steps:** Teach the learner to use the alignment and spacing tools. **How to Confirm the Problem Is Resolved:** The learner uses alignment tools. **How to Prevent Recurrence:** Remind the learner: "Use the tools, not your eyes."

Mistake 3: Not Grouping Related Elements

Symptoms: The learner moves elements individually instead of grouping them. **Likely Cause:** The learner does not know about grouping. **How to Investigate:** Ask the learner, "Did you group related elements?" **Safe Corrective Steps:** Teach the learner to group related elements. **How to Confirm the Problem Is Resolved:** The learner groups related elements. **How to Prevent Recurrence:** Remind the learner: "Group elements that belong together."

Mistake 4: Making Text Too Transparent

Symptoms: The learner makes text too transparent, making it hard to read. **Likely Cause:** The learner uses transparency for aesthetic effect without considering readability. **How to Investigate:** Can you read the text easily? **Safe Corrective Steps:** Teach the learner to keep text at 100% opacity (or close to it) for readability. **How to Confirm the Problem Is Resolved:** The learner keeps text readable. **How to Prevent Recurrence:** Remind the learner: "Text must always be readable."

Mistake 5: Using Too Many Brand Colours

Symptoms: The learner chooses 5 or more brand colours. **Likely Cause:** The learner thinks more colours make the brand more interesting. **How to Investigate:** Count the brand colours. **Safe Corrective Steps:** Teach the learner to use 2â€“3 brand colours maximum. **How to Confirm the Problem Is Resolved:** The learner uses 2â€“3 brand colours. **How to Prevent Recurrence:** Remind the learner: "2â€“3 colours maximum."

L. SESSION ASSIGNMENT (5 minutes)

Assignment Title: "My Brand Kit and Template"

Purpose: To reinforce brand setup skills by having the learner create a complete brand kit and reusable template.

Realistic Scenario: "You are a designer hired to create a brand identity for a new business. Your first task is to set up a brand kit and create a reusable template for social media posts."

Detailed Instructions:

1. Open Canva and sign in to your account.
2. Choose a business (real or fictional).
3. Set up a brand kit with:
    - 3 brand colours (with hex codes)
    - 2 brand fonts (one for headings, one for body text)
4. Create a reusable Instagram post template using your brand kit.
5. The template should include:
    - A background in one of your brand colours

- A heading area with your brand heading font
- A subheading area with your brand body font
- A shape or element in one of your brand colours
- An image area

6. Save the template as "My Brand Kit and Template."
7. Show the template to the instructor before leaving.

Required Deliverables:

- A Canva brand kit with 3 colours and 2 fonts
- A reusable Instagram post template saved in Canva

Submission Format:

- The brand kit and template must be visible in the learner's Canva account
- The learner must show the instructor the template on their screen

Deadline Recommendation:

- Before leaving the session (in-class assignment)

Marking Rubric:

Criterion	Excellent (5)	Good (3)	Needs Improvement (1)
Brand colours	3 colours with hex codes	3 colours but no hex codes	Fewer than 3 colours
Brand fonts	2 fonts (heading + body)	2 fonts but same category	1 font or 3+ fonts
Template dimensions	Correct (1080 x 1080)	Slightly off	Incorrect
Brand colours applied	All colours from brand kit	Mostly from brand kit	Not from brand kit
Brand fonts applied	All fonts from brand kit	Mostly from brand kit	Not from brand kit
Alignment	All elements aligned	Mostly aligned	Not aligned
Grouping	Related elements grouped	Some grouping	No grouping
File saved correctly	Saved in Canva with correct name	Saved but wrong name	Not saved

Total: 40 marks

Common Mistakes to Avoid:

- Not setting up a brand kit
- Using too many colours or fonts
- Not applying brand colours and fonts to the template
- Not saving the template

Instructor Reference Solution:

The final brand kit should have:

- 3 brand colours with hex codes
- 2 brand fonts (one heading, one body)
- A reusable Instagram post template using the brand kit
- All elements aligned and grouped
- Saved as "My Brand Kit and Template"

M. KNOWLEDGE CHECK (5 minutes)

Questions

1. Multiple Choice: What are layers in Canva? a) Different pages in a design b) Stacked elements on top of each other c) Different colour schemes d) Different font categories

Answer: b) Stacked elements on top of each other

2. Short Answer: What is a brand kit and why is it important?

Answer: A brand kit is a collection of your brand's colours, fonts and logos. It is important because it ensures consistency across all your designs, which builds brand recognition and trust.

3. Multiple Choice: How do you group elements in Canva? a) Right-click and choose 'Group' b) Press Ctrl+G c) Both a and b d) You cannot group elements in Canva

Answer: c) Both a and b

4. Explain in Your Own Words: Why should you use alignment tools instead of eyeballing?

Answer: Eyeballing is imprecise. Alignment tools ensure that elements are perfectly aligned, which makes the design look professional. Small misalignments are noticeable and make a design look amateur.

5. Practical Identification: Open Canva. Identify the Brand Kit, the alignment tools, and the grouping option.

Answer: The learner correctly identifies all three elements.

6. Scenario-Based: Your friend says, "I set up a brand kit but I still choose different colours for each design. What is the point of having a brand kit?" What advice would you give?

Answer: The point of a brand kit is to ensure consistency. If you choose different colours for each design, you are not using your brand kit. Always use your brand colours and fonts â€" that is how you build a recognisable brand.

7. Error-Detecting: A learner writes in their assignment: "I made the text 50% transparent because it looked too bold." What is wrong with this, and what should they have done instead?

Answer: Making text 50% transparent makes it hard to read. The learner should have kept the text at 100% opacity and instead reduced the font size or changed the font weight to make it less bold.

N. REFLECTION AND RECAP (5 minutes)

Plain-English Summary

Today you learned about layers, alignment, grouping, transparency and brand setup in Canva. You learned how to control the stacking order of elements, align elements precisely, group related elements, apply transparency and set up a brand kit with your colours and fonts. These are the skills that make your designs look professional and consistent.

Five Important Takeaways

1. Layers control which elements are in front and which are behind.
2. Use alignment tools â€" never eyeball.
3. Group related elements for easier editing.
4. Set up a brand kit with 2â€"3 colours and 2 fonts.
5. Use your brand kit in every design for consistency.

Questions That Help You Recognise What You Can Now Do

- Can you manage layers in Canva?
- Can you use alignment and spacing tools?
- Can you group and ungroup elements?
- Can you apply transparency?
- Can you set up and use a brand kit?

Connection to the Next Session

In the next session, you will learn advanced Canva techniques â€" effects, cropping, resizing for different formats and export specifications. You will also learn the difference between print and digital design. You now know the core Canva skills. Next, you

will learn to prepare your designs for the real world.

O. INSTRUCTOR EVALUATION NOTES

Observable Signs of Competence

- The learner manages layers correctly.
- The learner uses alignment and spacing tools.
- The learner groups and ungroups elements.
- The learner applies transparency appropriately.
- The learner sets up and uses a brand kit.

Common Misconceptions

- **"Layers are too complicated."** Some learners think layers are an advanced concept. Correct this by showing them how simple it is to bring elements forward or send them back.
- **"Eyeballing is good enough."** Some learners think they can align elements by eye. Correct this by showing them the difference between eyeballed and tool-aligned designs.
- **"Brand kits are only for big companies."** Some learners think brand kits are only for large businesses. Correct this by explaining that even small businesses and individuals need consistent branding.

Suggested Remedial Exercises

- For learners who cannot manage layers: Have them practise with a simple design (background, image, text) and change the layer order multiple times.
- For learners who do not use alignment tools: Have them create a design with multiple elements and align them using only the tools (no eyeballing).
- For learners who do not set up a brand kit: Have them set up a brand kit for a fictional business and create three designs using the same brand kit.

Differentiation Guidance

Level 1 â€" Supported (for learners who struggle):

- Provide a "Brand Setup Guide" handout with screenshots.
- Pair with a more confident learner for practical exercises.
- Allow extra time for the independent exercise.
- Focus on layers and alignment before brand setup.

Level 2 â€" Independent (standard):

- Complete all exercises as written.
- Answer all knowledge check questions.
- Complete the assignment to the standard shown in the rubric.

Level 3 â€" Challenge (for learners who finish early):

- Ask the learner to create a brand kit for a real local business.
- Ask the learner to research and write down three more Canva features.
- Ask the learner to explain the difference between grouping and layering.

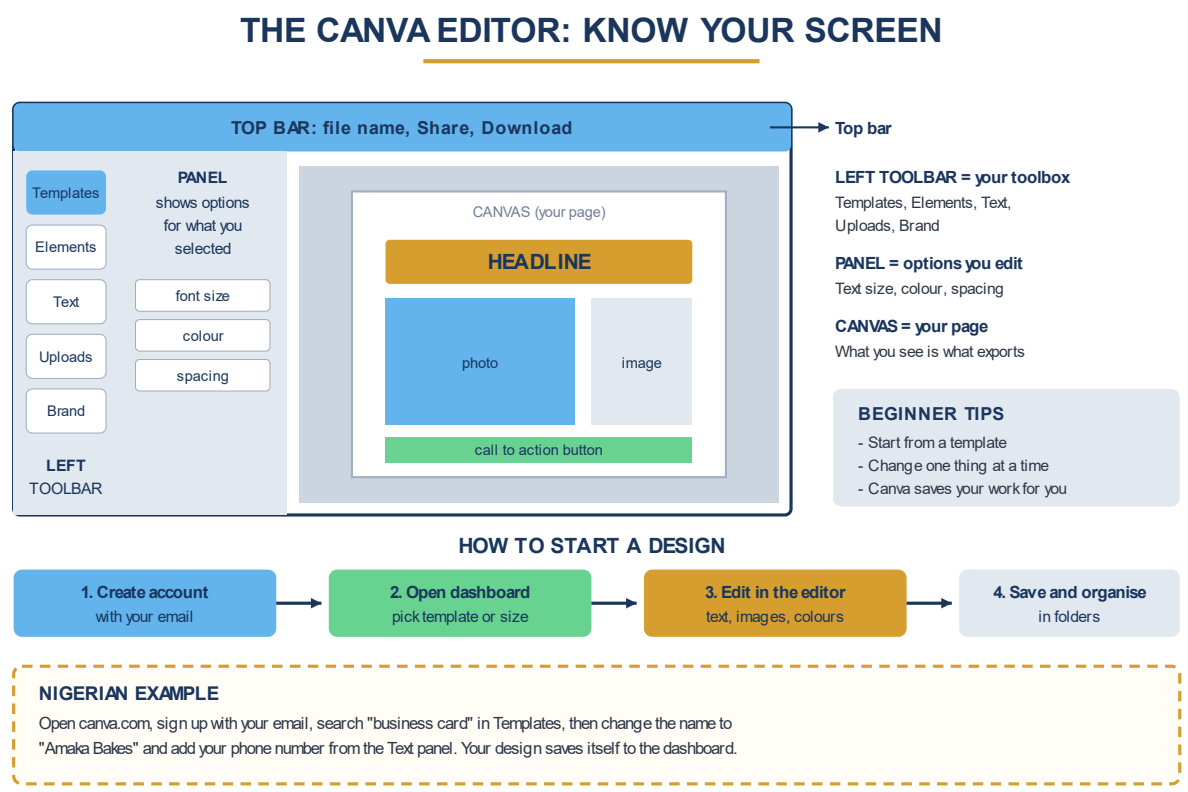

End of Session 5

Next Session: Session 6 â€" The Tool: Advanced Techniques **What to Bring:** Creativity, attention to detail **Preparation:** Prepare export format examples

SESSION 06 OF 12

Canva Advanced Techniques

CONCEPT DIAGRAM — SESSION 06

SESSION 6: THE TOOL â€" ADVANCED TECHNIQUES

Week: 2 **Module:** The Design Tool **Duration:** 105 minutes **Difficulty:** Beginner **Prerequisite Knowledge:** Sessions 4â€"5 â€" Canva Interface, Layers & Brand **Connection to Previous Session:** Builds on Sessions 4â€"5 by teaching advanced Canva techniques and export specifications **Preparation Required Before Class:**

- Ensure Canva is accessible on all machines
- Prepare export format examples (PNG, JPG, PDF)
- Prepare print vs digital specification examples

A. SESSION IDENTIFICATION

Field	Detail
Session Number	6
Title	The Tool â€" Advanced Techniques
Week	2
Module	The Design Tool

Field	Detail
Duration	105 minutes
Difficulty	Beginner
Prerequisite Knowledge	Sessions 4â€“5 â€” Canva Interface, Layers & Brand
Connection to Previous Session	Builds on Sessions 4â€–5 by teaching advanced techniques
Preparation	Export format examples prepared

B. LEARNING OUTCOMES

By the end of this session, the learner will be able to:

1. **Apply effects** such as shadows, outlines and curves to text and elements.
2. **Create simple shapes and logos** using Canva's shape tools.
3. **Use grids and guides** for precise layout.
4. **Resize designs** for different formats using Canva's resize feature.
5. **Export designs** in the correct format for print and digital.
6. **Explain the difference** between print (CMYK, 300 DPI) and digital (RGB, 72 DPI) specifications.
7. **Choose the right export format** for different use cases.

C. REQUIRED MATERIALS

Hardware:

- One desktop computer per learner
- One keyboard per learner
- One mouse per learner
- One monitor per learner
- Projector for instructor demonstration

Software:

- Google Chrome or Microsoft Edge web browser
- Canva (free tier)

Accounts:

- Each learner's Canva account

Internet:

- Academy Wi-Fi (required for this session)

Printed Materials:

- "Export Formats Reference" card (one per learner)
- "Print vs Digital Specifications" handout (one per learner)

D. OPENING ACTIVITY (10 minutes)

"The Blurry Flyer"

Instructor Setup: Display two versions of the same flyer â€“ one crisp and clear, one blurry and pixelated.

Instructor Script: "Good morning, everyone. Look at these two flyers. They are the same design. But one is crisp and clear, and the other is blurry and pixelated. What is the difference? [Pause for answers â€" resolution, DPI, export format.]

The difference is how they were exported. The crisp one was exported as a PDF for print. The blurry one was exported as a low-resolution PNG and then printed.

This is one of the most common mistakes beginners make â€" exporting designs in the wrong format. Today, you will learn how to export your designs correctly for both print and digital use. You will also learn advanced Canva techniques like effects, shapes and resizing. Let us begin."

Expected Learner Response: Learners will identify the quality difference. This sets the context for the session.

E. PREREQUISITE REVIEW (5 minutes)

Instructor Script: "Before we start, let us remember what we learned in the last session. Quick review."

Review Questions and Expected Answers:

1. "What are layers in Canva?"
    - Stacked elements on top of each other.
2. "How do you group elements in Canva?"
    - Select multiple elements, right-click, and choose 'Group' (or press Ctrl+G).
3. "What is a brand kit?"
    - A collection of your brand's colours, fonts and logos.
4. "How many brand colours should you use?"
    - 2â€"3 colours maximum.
5. "How many brand fonts should you use?"
    - 2 fonts maximum (one for headings, one for body text).

How to Address Common Gaps:

- If a learner cannot remember how to group elements, demonstrate it quickly.
- If a learner forgot the brand kit concept, remind them: "Colours + fonts + logos = brand kit."

F. FULL LECTURE NOTES (35 minutes)

Topic 1: Effects â€" Shadows, Outlines and Curves (10 minutes)

Instructor Script: "Effects add depth and visual interest to your designs. Canva has several effects you can apply to text and elements.

Shadow: A shadow creates a drop shadow behind an element, making it stand out from the background.

1. Select an element.
2. Click 'Effects' in the top toolbar.
3. Choose 'Shadow.'
4. Adjust the shadow's direction, blur and transparency.

Outline: An outline adds a border around text or shapes.

1. Select an element.
2. Click 'Effects' in the top toolbar.
3. Choose 'Outline.'
4. Adjust the outline's thickness and colour.

Curve: The curve effect bends text into an arc. This is useful for logos and decorative text.

1. Select a text element.

2. Click 'Effects' in the top toolbar.
3. Choose 'Curve.'
4. Adjust the curve amount using the slider.

Best Practice:

- Use effects sparingly. Too many effects make a design look cluttered.
- Shadows work well for call-to-action buttons and headings.
- Outlines work well for text on busy backgrounds.
- Curves work well for logos and decorative text.

Topic 2: Creating Simple Shapes and Logos (10 minutes)

Instructor Script: "Canva's shape tools allow you to create simple logos and graphic elements. You do not need to be an illustrator to create a clean, professional logo.

Basic Shapes:

1. Go to the left sidebar and click 'Elements.'
2. Click 'Shapes.'
3. Choose a shape (e.g., circle, square, triangle).
4. Drag the shape onto the canvas.
5. Resize, rotate and colour the shape.

Combining Shapes: You can combine multiple shapes to create more complex designs.

1. Add multiple shapes to the canvas.
2. Position them to create your design.
3. Group them together (Ctrl+G).
4. Apply effects (shadow, outline) if needed.

Simple Logo Design: A simple logo can be created using:

- A shape (e.g., a circle or square)
- Text (the business name)
- A brand colour

Example:

1. Add a circle shape.
2. Change the fill colour to your brand colour.
3. Add text in the centre of the circle.
4. Choose a clean, bold font.
5. Group the shape and text.
6. You now have a simple logo.

Best Practice:

- Keep logos simple. A simple logo is more memorable and more versatile.
- Use a maximum of 2 colours and 1 font in a logo.
- Make sure the logo works in black and white as well as colour.

Topic 3: Resizing for Different Formats (5 minutes)

Instructor Script: "Sometimes you need to create the same design in different sizes. For example, you might want to use the same design for an Instagram post, a Facebook post and a flyer. Canva's resize feature makes this easy.

How to Resize a Design:

1. Open the design you want to resize.
2. Click 'Resize' in the top bar (or 'File' > 'Resize').
3. Enter the new dimensions or choose a preset.

4. Click 'Resize.'
5. Canva creates a copy of your design with the new dimensions.
6. Adjust the layout if needed (elements may need to be repositioned).

Important Note: Resizing does not automatically adjust the layout. You may need to reposition elements after resizing. Always check the resized design before downloading.

Topic 4: Export Formats â€" Print vs Digital (10 minutes)

Instructor Script: "Choosing the right export format is essential. The wrong format can result in blurry prints or huge file sizes.

Digital Export (for screen):

- **PNG:** Best for social media posts, web graphics and designs with transparent backgrounds. High quality, large file size.
- **JPG:** Best for photographs and designs without transparent backgrounds. Smaller file size, slightly lower quality.
- **Resolution:** 72 DPI is sufficient for screen.

Print Export (for paper):

- **PDF (Standard):** Best for flyers, business cards and documents. Preserves quality and fonts.
- **PDF (Print):** Best for professional printing. Includes crop marks and bleed.
- **Resolution:** 300 DPI is required for print.

RGB vs CMYK:

- **RGB:** Red, Green, Blue. Used for digital displays (screens).
- **CMYK:** Cyan, Magenta, Yellow, Black. Used for print.
- Canva uses RGB by default. For professional printing, you may need to convert to CMYK using another tool. For most small print jobs (e.g., printing at a local print shop), RGB is acceptable.

Export Checklist:

1. Is the design for digital or print?
2. Choose the correct format (PNG/JPG for digital, PDF for print).
3. Check the resolution (72 DPI for digital, 300 DPI for print).
4. Check the dimensions (correct size for the intended format).
5. Download and verify the file.

G. INSTRUCTOR DEMONSTRATION (15 minutes)

Demonstration 1: Applying Effects (5 minutes)

What the Instructor Prepares:

- A Canva design with text and shapes

What the Instructor Says and Does: "I am going to apply some effects to this design."

1. "I select the heading text. I click 'Effects' in the top toolbar. I choose 'Shadow.' I adjust the shadow to make the text stand out."
2. "I select a shape. I click 'Effects.' I choose 'Outline.' I add a white outline to make the shape stand out from the background."
3. "I select a text element. I click 'Effects.' I choose 'Curve.' I bend the text into an arc for a decorative effect."

What Learners Should Observe: The instructor applying shadow, outline and curve effects.

Expected Result: Learners can describe how to apply effects in Canva.

Demonstration 2: Creating a Simple Logo (5 minutes)

What the Instructor Prepares:

- A blank Canva canvas

What the Instructor Says and Does: "Now I will create a simple logo using shapes and text."

1. "I go to 'Elements' in the left sidebar. I click 'Shapes.' I choose a circle. I drag it onto the canvas."
2. "I change the fill colour to dark blue."
3. "I click 'Text' in the left sidebar. I click 'Add a heading.' I type 'ACE.' I choose a bold, clean font. I change the colour to white."
4. "I position the text in the centre of the circle."
5. "I select both the circle and the text. I right-click and choose 'Group.'"
6. "I now have a simple logo â€" a circle with text in the centre."

What Learners Should Observe: The instructor creating a simple logo using shapes and text.

Expected Result: Learners can describe how to create a simple logo in Canva.

Demonstration 3: Exporting for Print and Digital (5 minutes)

What the Instructor Prepares:

- A completed Canva design

What the Instructor Says and Does: "Now I will export this design for both digital and print."

1. "For digital: I click 'Download.' I choose PNG. I click 'Download.' The file is saved to my Downloads folder."
2. "For print: I click 'Download.' I choose 'PDF Print.' I click 'Download.' The file is saved to my Downloads folder."
3. "I open both files. The PNG is optimised for screen. The PDF is optimised for print with high resolution."

What Learners Should Observe: The instructor exporting in different formats for different uses.

Expected Result: Learners can describe how to export for print and digital.

H. GUIDED PRACTICAL EXERCISE (20 minutes)

Exercise: "My Multi-Format Design"

Practical Objective: The learner will create a design, apply effects, create a simple logo, resize for different formats and export for print and digital.

Starting Materials:

- Canva open on each machine, signed in to the learner's account

Instructions:

Part 1: Create a Design with Effects (7 minutes)

1. "Create a new design with custom dimensions: 1080 x 1080 pixels (Instagram post)."
2. "Set the background to one of your brand colours."
3. "Add a heading using your brand heading font. Type 'Summer Sale.'"
4. "Apply a shadow effect to the heading."
5. "Add a subheading using your brand body font. Type '50% Off Everything.'"
6. "Apply an outline effect to the subheading."
7. "Add a shape and apply a curve effect to some text."

Instructor Prompts:

- "What effect did you apply to the heading?" (Answer: Shadow.)
- "What effect did you apply to the subheading?" (Answer: Outline.)

Part 2: Create a Simple Logo (5 minutes)

8. "Create a new design with custom dimensions: 500 x 500 pixels."
9. "Add a circle shape. Change the fill to one of your brand colours."
10. "Add text in the centre of the circle. Type your initials or a short word."

11. "Choose a bold, clean font. Change the colour to white."
12. "Group the shape and text."
13. "Save the logo as 'My Simple Logo.'"

Instructor Prompts:

- "What shape did you use?" (Answer: Circle.)
- "What colours did you use?" (Answer: Brand colour and white.)

Part 3: Resize and Export (8 minutes)

14. "Open your Instagram post design. Click 'Resize.' Enter 1200 x 628 pixels (Facebook post). Click 'Resize.'"
15. "Adjust the layout if needed. Reposition elements if they are out of place."
16. "Export the Instagram post as PNG (for digital)."
17. "Export the Facebook post as PNG (for digital)."
18. "Export the Instagram post as PDF Print (for print)."

Instructor Prompts:

- "Why did we export as PNG for digital?" (Answer: PNG is best for screen.)
- "Why did we export as PDF for print?" (Answer: PDF preserves quality and fonts for print.)

Expected Result: Every learner has created a design with effects, created a simple logo, resized for different formats and exported for print and digital.

Troubleshooting Guidance:

- If the learner cannot apply effects: "Select the element, then click 'Effects' in the top toolbar."
- If the learner cannot resize: "Click 'Resize' in the top bar or go to 'File' > 'Resize.'"
- If the learner cannot export: "Click 'Download' in the top-right corner, choose a format, and click 'Download.'"

Completion Checklist:

- ☐ Design created with effects (shadow, outline, curve)
- ☐ Simple logo created using shapes and text
- ☐ Design resized for different formats
- ☐ Design exported as PNG (digital) and PDF (print)

I. INDEPENDENT CLASS EXERCISE (10 minutes)

Exercise: "Export Format Quiz"

Scenario: "You are a designer. Your client asks you to prepare designs for different uses. For each scenario, choose the correct export format and explain why."

Task: For each scenario, write down:

1. The correct export format (PNG, JPG, PDF Standard, PDF Print)
2. The correct resolution (72 DPI or 300 DPI)
3. Why you chose that format

Scenarios:

1. An Instagram post for a clothing brand.
2. A flyer for a church event (to be printed at a local print shop).
3. A business card (to be printed professionally).
4. A website banner for a tech startup.
5. A photograph to be shared on WhatsApp.

Requirements:

- Choose the correct format for each scenario
- Explain your choice

Time Allowance: 10 minutes

Success Criteria:

- All 5 scenarios correctly answered
- Explanations are clear and accurate

Hints Available If the Learner Gets Stuck:

- Hint 1: "For digital use, choose PNG or JPG. For print, choose PDF."
- Hint 2: "For social media, PNG is best. For photographs, JPG is fine."
- Hint 3: "For professional printing, always use PDF Print at 300 DPI."

Complete Answer Key for the Instructor:

1. **Instagram post:** PNG, 72 DPI. PNG is best for social media because it supports high quality and transparent backgrounds.
2. **Flyer for print:** PDF Print, 300 DPI. PDF preserves quality and fonts for print. 300 DPI ensures crisp printing.
3. **Business card:** PDF Print, 300 DPI. Professional printing requires high resolution and PDF format.
4. **Website banner:** PNG or JPG, 72 DPI. Digital displays only need 72 DPI. PNG if transparency is needed, JPG if not.
5. **WhatsApp photograph:** JPG, 72 DPI. JPG is best for photographs because it has a smaller file size.

J. REAL-WORLD CASE STUDY (5 minutes)

Case: "The Blurry Business Card"

Situation: A small business owner in Port Harcourt designs a business card in Canva. She exports it as a low-resolution PNG and takes it to a print shop. The printed business cards are blurry and pixelated. The print shop tells her she needs to provide a high-resolution PDF.

The Problem: The business owner exported the design in the wrong format and at the wrong resolution. She did not understand the difference between digital and print specifications.

Why It Matters: Exporting in the wrong format can ruin an otherwise good design. A blurry business card looks unprofessional and can cost you customers.

Relevant Concept: Export formats. If the business owner had known to export as PDF Print at 300 DPI, the business cards would have been crisp and professional.

Worked Solution: If the business owner had taken this course, here is what she would do:

1. Design the business card in Canva with the correct dimensions (1050 x 600 pixels for a standard 3.5 x 2 inch card at 300 DPI).
2. Export as PDF Print.
3. Take the PDF to the print shop.
4. The printed business cards are crisp and professional.

Reasoning: Print and digital have different requirements. Digital designs are viewed on screens, which have lower resolution. Print designs are viewed on paper, which requires higher resolution. Using the wrong format is like wearing shoes on the wrong feet â€" it might work, but it will not look right.

Possible Mistake: The business owner might think that PNG is always the best format because it is high quality. But PNG is designed for screens, not print. For print, PDF is the correct format.

Correction: Always ask yourself: "Is this design for screen or paper?" If screen, use PNG or JPG at 72 DPI. If paper, use PDF at 300 DPI.

Transfer Exercise: "Your friend designed a flyer in Canva and exported it as PNG. He wants to print 100 copies. What advice would you give him?"

Professional Connection: Every design you create will eventually be exported â€" for screen or for paper. Knowing the correct format and resolution is essential for professional-quality work.

K. COMMON MISTAKES AND TROUBLESHOOTING (5 minutes)

Mistake 1: Using Too Many Effects

Symptoms: The learner applies multiple effects to every element. **Likely Cause:** The learner thinks more effects make the design more interesting. **How to Investigate:** Look at the design. Are there effects on every element? **Safe Corrective Steps:** Teach the learner to use effects sparingly â€" one or two effects per design. **How to Confirm the Problem Is Resolved:** The learner uses effects sparingly. **How to Prevent Recurrence:** Remind the learner: "Less is more."

Mistake 2: Exporting in the Wrong Format

Symptoms: The learner exports a print design as PNG or a digital design as PDF. **Likely Cause:** The learner does not understand the difference between print and digital formats. **How to Investigate:** Ask the learner, "Is this design for screen or paper?" **Safe Corrective Steps:** Teach the learner to always ask "screen or paper?" before exporting. **How to Confirm the Problem Is Resolved:** The learner chooses the correct format. **How to Prevent Recurrence:** Provide an "Export Formats Reference" card.

Mistake 3: Not Checking Resolution

Symptoms: The learner exports a design without checking the resolution. **Likely Cause:** The learner does not understand DPI. **How to Investigate:** Check the exported file's resolution. **Safe Corrective Steps:** Teach the learner to use 72 DPI for digital and 300 DPI for print. **How to Confirm the Problem Is Resolved:** The learner uses the correct resolution. **How to Prevent Recurrence:** Remind the learner: "72 for screen, 300 for print."

Mistake 4: Not Adjusting Layout After Resizing

Symptoms: The learner resizes a design but does not adjust the layout. **Likely Cause:** The learner thinks resizing automatically adjusts the layout. **How to Investigate:** Look at the resized design. Are elements out of place? **Safe Corrective Steps:** Teach the learner to always check and adjust the layout after resizing. **How to Confirm the Problem Is Resolved:** The learner adjusts the layout after resizing. **How to Prevent Recurrence:** Remind the learner: "Always check after resizing."

Mistake 5: Making Logos Too Complex

Symptoms: The learner creates a logo with too many shapes, colours and fonts. **Likely Cause:** The learner thinks a complex logo looks more professional. **How to Investigate:** Look at the logo. How many shapes, colours and fonts are there? **Safe Corrective Steps:** Teach the learner to keep logos simple â€" one shape, one or two colours, one font. **How to Confirm the Problem Is Resolved:** The learner creates simple logos. **How to Prevent Recurrence:** Remind the learner: "Simple is memorable."

L. SESSION ASSIGNMENT (5 minutes)

Assignment Title: "My Multi-Format Design Package"

Purpose: To reinforce advanced Canva skills by having the learner create a design package for multiple formats.

Realistic Scenario: "You are a designer hired to create a promotional package for a summer sale. The package must include an Instagram post, a Facebook post and a print flyer. All three must use the same design but be formatted for their specific use."

Detailed Instructions:

1. Open Canva and sign in to your account.
2. Create a design for an Instagram post (1080 x 1080 pixels) promoting a summer sale.
3. Apply at least two effects (e.g., shadow and outline).
4. Create a simple logo for the sale.
5. Resize the design for a Facebook post (1200 x 628 pixels). Adjust the layout.
6. Resize the design for a print flyer (A4: 2480 x 3508 pixels). Adjust the layout.
7. Export the Instagram post as PNG.
8. Export the Facebook post as PNG.
9. Export the flyer as PDF Print.
10. Save all designs in Canva with descriptive names.
11. Show all exported files to the instructor before leaving.

Required Deliverables:

- Instagram post (PNG)
- Facebook post (PNG)
- Print flyer (PDF)
- All designs saved in Canva

Submission Format:

- The learner must show the instructor all exported files on their screen
- All designs must be visible in the learner's Canva account

Deadline Recommendation:

- Before leaving the session (in-class assignment)

Marking Rubric:

Criterion	Excellent (5)	Good (3)	Needs Improvement (1)
Instagram post	Correct dimensions, well-designed	Mostly correct	Incorrect
Facebook post	Correct dimensions, layout adjusted	Mostly correct	Incorrect
Print flyer	Correct dimensions, layout adjusted	Mostly correct	Incorrect
Effects	2+ effects applied correctly	1 effect applied	No effects
Logo	Simple, clean, professional	Mostly correct	Too complex or missing
Export formats	All correct (PNG for digital, PDF for print)	Mostly correct	Incorrect
File saved correctly	All saved in Canva with correct names	Some saved	Not saved

Total: 35 marks

Common Mistakes to Avoid:

- Not adjusting the layout after resizing
- Exporting in the wrong format
- Making the logo too complex
- Not saving designs in Canva

Instructor Reference Solution:

The final design package should have:

- Instagram post: 1080 x 1080 pixels, PNG, with effects and logo
- Facebook post: 1200 x 628 pixels, PNG, layout adjusted
- Print flyer: A4 (2480 x 3508 pixels), PDF Print, layout adjusted
- All designs saved in Canva with descriptive names

M. KNOWLEDGE CHECK (5 minutes)

Questions

1. Multiple Choice: What is the best export format for a design that will be printed? a) PNG b) JPG c) PDF d) GIF

Answer: c) PDF

2. Short Answer: What is the difference between RGB and CMYK?

Answer: RGB (Red, Green, Blue) is used for digital displays (screens). CMYK (Cyan, Magenta, Yellow, Black) is used for print.

3. Multiple Choice: What resolution should you use for print designs? a) 72 DPI b) 150 DPI c) 300 DPI d) 600 DPI

Answer: c) 300 DPI

4. Explain in Your Own Words: Why should you keep logos simple?

Answer: Simple logos are more memorable, more versatile and easier to reproduce across different media. A complex logo may look good on a large screen but become unreadable on a small business card.

5. Practical Identification: Open Canva. Identify the Effects button, the Resize option, and the Download button.

Answer: The learner correctly identifies all three elements.

6. Scenario-Based: Your friend says, "I exported my flyer as PNG because PNG is high quality." The flyer is going to be printed. What advice would you give?

Answer: PNG is designed for screens, not print. For print, you should export as PDF Print at 300 DPI. This ensures crisp, professional-quality printing.

7. Error-Detecting: A learner writes in their assignment: "I resized my design from Instagram post to flyer but I did not check the layout." What is wrong with this, and what should they have done?

Answer: Resizing does not automatically adjust the layout. The learner should have checked the resized design and repositioned any elements that were out of place.

N. REFLECTION AND RECAP (5 minutes)

Plain-English Summary

Today you learned advanced Canva techniques â€" effects, simple logo creation, resizing for different formats and export specifications. You learned the difference between print and digital design and how to choose the correct export format. These are the skills that prepare your designs for the real world.

Five Important Takeaways

1. Use effects sparingly â€" one or two per design.
2. Keep logos simple â€" one shape, one or two colours, one font.
3. Always check the layout after resizing.
4. Export as PNG/JPG for digital and PDF for print.
5. Use 72 DPI for digital and 300 DPI for print.

Questions That Help You Recognise What You Can Now Do

- Can you apply effects in Canva?
- Can you create a simple logo using shapes and text?
- Can you resize a design for different formats?
- Can you export for print and digital?
- Can you explain the difference between RGB and CMYK?

Connection to the Next Session

This is the last session on the tool. You now have all the Canva skills you need. In the next session, you will start creating real-world designs â€" flyers and social media posts. You will apply everything you have learned so far to create professional designs for real Nigerian commercial contexts. You are ready.

O. INSTRUCTOR EVALUATION NOTES

Observable Signs of Competence

- The learner applies effects appropriately.
- The learner creates simple logos.
- The learner resizes designs correctly.

- The learner exports in the correct format.
- The learner understands print vs digital specifications.

Common Misconceptions

- **"PNG is always the best format."** Some learners think PNG is always correct. Correct this by teaching the difference between print and digital formats.
- **"More effects make a better design."** Some learners overuse effects. Correct this by teaching restraint.
- **"Resizing is automatic."** Some learners think resizing adjusts the layout automatically. Correct this by teaching them to always check after resizing.

Suggested Remedial Exercises

- For learners who overuse effects: Have them redesign a cluttered design using only one or two effects.
- For learners who export in the wrong format: Provide an "Export Formats Reference" card and have them practise choosing the correct format for different scenarios.
- For learners who make complex logos: Have them redesign a complex logo using only one shape, one colour and one font.

Differentiation Guidance

Level 1 â€” Supported (for learners who struggle):

- Provide an "Export Formats Reference" card.
- Pair with a more confident learner for practical exercises.
- Allow extra time for the independent exercise.
- Focus on effects and export before logo creation.

Level 2 â€” Independent (standard):

- Complete all exercises as written.
- Answer all knowledge check questions.
- Complete the assignment to the standard shown in the rubric.

Level 3 â€” Challenge (for learners who finish early):

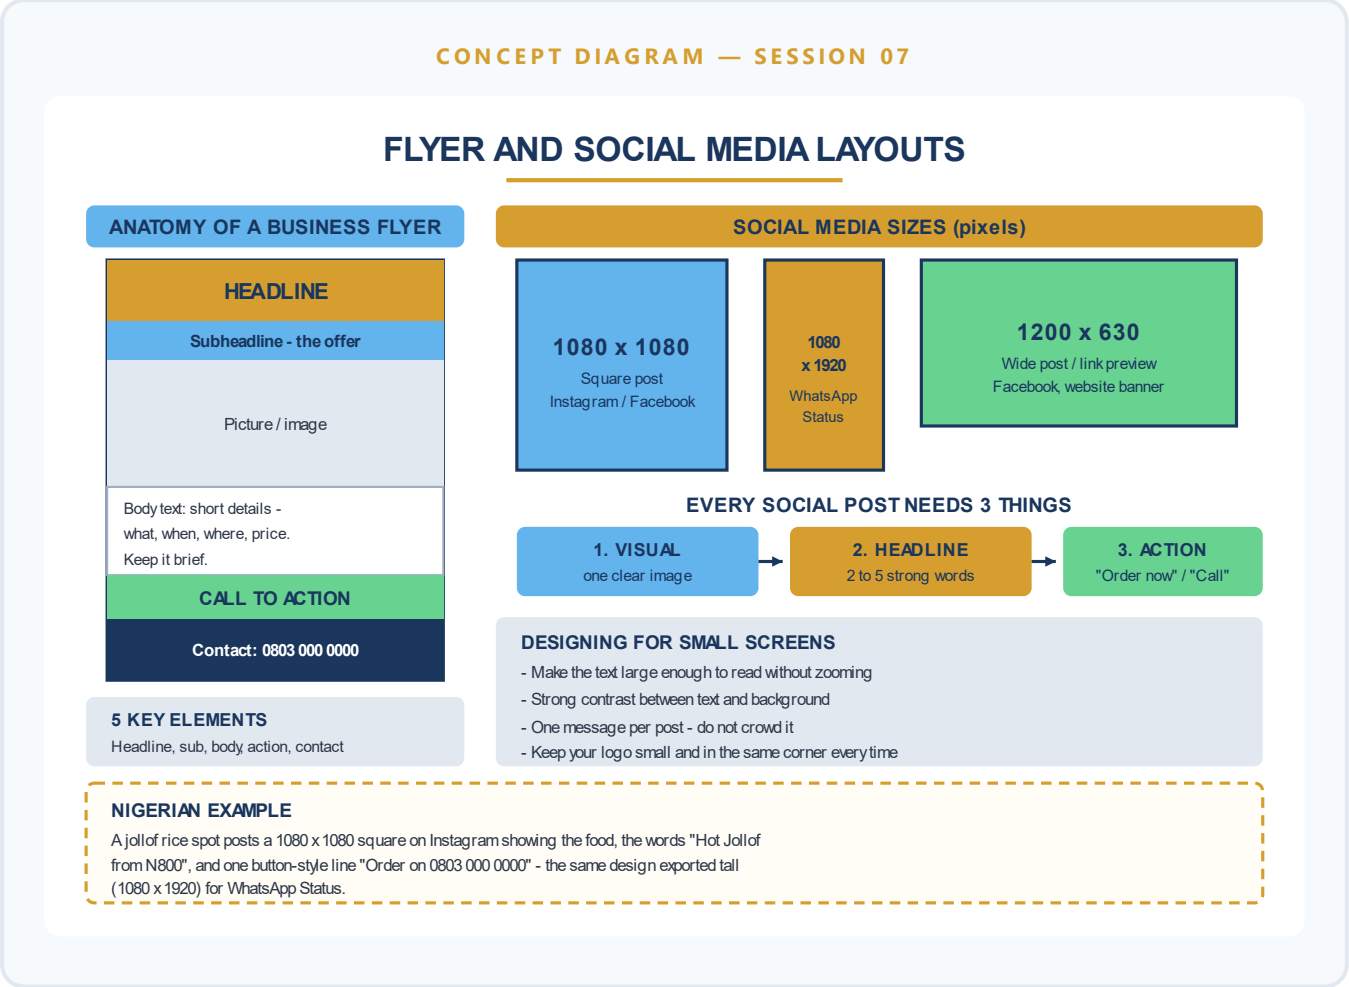

- Ask the learner to create a design package for a real local business.
- Ask the learner to research and write down three more Canva features.
- Ask the learner to explain the difference between DPI and PPI.

End of Session 6 â€” End of Week 2 (The Design Tool)

Next Session: Session 7 â€” Real-World Design I: Flyers & Social **What to Bring:** Creativity, understanding of design principles **Preparation:** Prepare flyer and social media templates for analysis

SESSION 07 OF 12

Flyers and Social

SESSION 7: REAL-WORLD DESIGN I â€" FLYERS & SOCIAL

Week: 3 **Module:** Real-World Design **Duration:** 105 minutes **Difficulty:** Beginner **Prerequisite Knowledge:** Sessions 1â€"6 â€" Design Foundations and Canva skills **Connection to Previous Session:** Transitions from tool skills to real-world application

Preparation Required Before Class:

- Prepare flyer and social media examples for analysis
- Prepare a sample flyer design brief
- Ensure Canva is accessible on all machines

A. SESSION IDENTIFICATION

Field	Detail
Session Number	7
Title	Real-World Design I â€" Flyers & Social
Week	3
Module	Real-World Design

Field	Detail
Duration	105 minutes
Difficulty	Beginner
Prerequisite Knowledge	Sessions 1â€"6 â€" All prior knowledge
Connection to Previous Session	Transitions from tool skills to real-world application
Preparation	Flyer and social media examples, design brief

B. LEARNING OUTCOMES

By the end of this session, the learner will be able to:

1. **Identify the key elements** of a business flyer: headline, subheadline, body, call to action, contact information.
2. **Apply design principles** to create a professional flyer.
3. **Identify the key elements** of a social media post: visual, headline, call to action.
4. **Design for Instagram and Facebook** using correct dimensions.
5. **Design WhatsApp graphics** appropriately.
6. **Use Canva's flyer and social media templates** as starting points.
7. **Apply brand consistency** across multiple design formats.

C. REQUIRED MATERIALS

Hardware:

- One desktop computer per learner
- Projector for instructor demonstration

Software:

- Canva (free tier)
- Web browser

Accounts:

- Each learner's Canva account

Internet:

- Academy Wi-Fi (required)

Printed Materials:

- "Flyer Design Checklist" (one per learner)
- "Social Media Dimensions Reference" (one per learner)

D. OPENING ACTIVITY (10 minutes)

"The Flyer Test"

Instructor Setup: Display three flyers for different Nigerian businesses â€" one excellent, one average, one poor.

Instructor Script: "Good morning, everyone. Over the past six sessions, you have learned design principles and Canva skills. Today, we start applying them to real-world design.

Look at these three flyers. They are for real Nigerian businesses â€" a restaurant, a salon and a church. Which one would make you stop and read? Which one would you walk past? [Pause for answers.]

The best flyer has clear hierarchy â€" the business name is the biggest thing you see. It has good contrast â€" the text is easy to read. It has a clear call to action â€" you know what to do next. And it has the right information â€" name, address, phone number, offer.

Today, you will create your own professional flyer. By the end of this session, you will be able to create flyers that compete with professional designers. Let us begin."

Expected Learner Response: Learners will identify the best flyer and explain why. This activates prior knowledge and sets the context.

E. PREREQUISITE REVIEW (5 minutes)

Instructor Script: "Before we start, quick review of what we have learned so far."

Review Questions and Expected Answers:

1. "What are the six core design principles?"
    - Hierarchy, contrast, alignment, balance, white space, purpose/audience.
2. "What is the 60-30-10 rule?"
    - 60% dominant colour, 30% secondary colour, 10% accent colour.
3. "How do you export a design for print?"
    - Download as PDF Print at 300 DPI.
4. "What is the standard dimension for an Instagram post?"
    - 1080 x 1080 pixels.
5. "How do you set up a brand kit in Canva?"
    - Click Brand Kit in the left sidebar, add brand colours and fonts.

F. FULL LECTURE NOTES (35 minutes)

Topic 1: Business Flyer Design (15 minutes)

Instructor Script: "A flyer is a single-page design that promotes a business, event or offer. It is one of the most common design types in Nigeria. Every salon, restaurant, church, shop and event needs flyers.

Key Elements of a Business Flyer:

1. **Business Name:** The most important element. It should be the largest text on the flyer.
2. **Tagline or Offer:** A short phrase that tells the reader what the business offers or what the special offer is.
3. **Key Information:** What, where, when. The essential details.
4. **Call to Action:** What you want the reader to do â€" "Call Now," "Visit Us," "Order Today."
5. **Contact Information:** Phone number, address, website, social media handles.
6. **Visual Element:** An image or illustration that supports the message.

Flyer Design Principles:

1. **Hierarchy:** The business name is the biggest. The offer is second. The details are third. The contact information is smallest.
2. **Contrast:** Use dark text on a light background or light text on a dark background.
3. **Alignment:** Left-align all text for a clean, organised look.
4. **Balance:** Distribute visual weight evenly. Do not put all the text on one side and all the images on the other.
5. **White Space:** Leave breathing room around text and images.

Common Flyer Mistakes:

- Too much text â€" the reader does not know what to focus on.
- Too many fonts â€" looks unprofessional.

- Poor contrast â€" text is hard to read.
- No call to action â€" the reader does not know what to do.
- Missing contact information â€" the reader cannot reach the business."

Topic 2: Social Media Graphic Design (15 minutes)

Instructor Script: "Social media graphics are designs created specifically for platforms like Instagram, Facebook and WhatsApp. They have different requirements from flyers.

Instagram Posts:

- Dimensions: 1080 x 1080 pixels (square) or 1080 x 1350 pixels (portrait)
- Design for mobile viewing â€" most people view Instagram on their phones.
- Use bold, readable text â€" small text is hard to read on a phone.
- Keep the design simple â€" you have less than 3 seconds to grab attention.

Facebook Posts:

- Dimensions: 1200 x 628 pixels (landscape)
- Design for both desktop and mobile viewing.
- Facebook posts appear in a feed, so they need to stand out among other content.

WhatsApp Graphics:

- Dimensions: 1080 x 1080 pixels (square) or similar
- WhatsApp is used for more personal, informal communication.
- Designs should feel friendly and direct.
- Common uses: birthday wishes, event invitations, business promotions, price lists.

Social Media Design Principles:

1. **Simplicity:** Social media designs should be simple and immediate. If it takes more than 3 seconds to understand, it is too complex.
2. **Bold Text:** Use large, bold text that is readable on a phone screen.
3. **One Message:** Each post should have one clear message. Do not try to say everything in one post.
4. **Call to Action:** Every post should tell the reader what to do â€" "Order Now," "Send a Message," "Click the Link."
5. **Brand Consistency:** Use your brand colours and fonts in every post.

Topic 3: Using Canva Templates Effectively (5 minutes)

Instructor Script: "Canva has thousands of flyer and social media templates. Templates are a great starting point, but you must customise them to make them your own.

How to Use Templates Effectively:

1. **Choose a template that matches your purpose.** Do not choose a template just because it looks nice. Choose one that has the right structure for your message.
2. **Change the colours to your brand colours.** Do not keep the template's default colours.
3. **Change the fonts to your brand fonts.** Do not keep the template's default fonts.
4. **Replace the images with your own.** Do not keep the template's stock images unless they are relevant.
5. **Adjust the layout if needed.** Move elements, resize text, delete unnecessary elements.
6. **Add your brand elements.** Add your logo, brand colours and contact information.

Template Mistakes:

- Using a template without customising it â€" it looks generic.
- Choosing a template that does not match the purpose â€" the structure is wrong.
- Keeping too many template elements â€" the design looks cluttered."

G. INSTRUCTOR DEMONSTRATION (15 minutes)

Demonstration 1: Designing a Business Flyer (7 minutes)

What the Instructor Prepares:

- Canva open on the projector
- A blank flyer template

What the Instructor Says and Does: "I am going to design a flyer for a fictional restaurant. Watch how I apply the principles."

1. "I start with a blank A4 canvas (2480 x 3508 pixels)."
2. "I set the background to a warm cream colour."
3. "I add the restaurant name â€" 'Taste of Home' â€" in large, bold text at the top. This is the hierarchy â€" the name is the most important element."
4. "I add a tagline â€" 'Delicious Nigerian Food' â€" in smaller text below the name."
5. "I add an image of food in the centre."
6. "I add the key information â€" address, phone number, opening hours â€" at the bottom."
7. "I add a call to action â€" 'Order Now: 0801 234 5678' â€" in a bold, colourful button."
8. "I apply my brand colours throughout â€" dark green and gold."
9. "I left-align all text for a clean, organised look."
10. "I leave plenty of white space around the text and image."

What Learners Should Observe: The instructor applying all design principles to create a professional flyer.

Expected Result: Learners can describe the key elements of a business flyer.

Demonstration 2: Designing a Social Media Post (8 minutes)

What the Instructor Prepares:

- Canva open on the projector
- The flyer design from Demonstration 1

What the Instructor Says and Does: "Now I will create a social media post for the same restaurant."

1. "I create a new design with Instagram dimensions â€" 1080 x 1080 pixels."
2. "I use the same brand colours â€" dark green and gold â€" for consistency."
3. "I add one image â€" a photo of the restaurant's signature dish."
4. "I add one headline â€" 'New Menu Available Now' â€" in large, bold text."
5. "I add one call to action â€" 'Send us a message to order' â€" in a smaller font."
6. "I keep the design simple â€" one image, one headline, one call to action."
7. "I export as PNG."

What Learners Should Observe: The instructor creating a simple, focused social media post.

Expected Result: Learners can describe the key elements of a social media post.

H. GUIDED PRACTICAL EXERCISE (20 minutes)

Exercise: "My Business Flyer"

Practical Objective: The learner will design a professional business flyer for a fictional business.

Starting Materials:

- Canva open on each machine, signed in
- "Flyer Design Checklist" handout

Instructions:

1. "Create a new design in Canva with A4 dimensions (2480 x 3508 pixels) for a flyer."
2. "Choose a fictional business â€" a restaurant, salon, shop, church or event."
3. "Set the background to a colour that represents the business."
4. "Add the business name in large, bold text at the top. This is the most important element."
5. "Add a tagline or offer below the name."
6. "Add an image that represents the business (use Canva's photo library)."
7. "Add key information â€" what, where, when."
8. "Add a call to action â€" 'Call Now,' 'Visit Us,' 'Order Today.'"
9. "Add contact information â€" phone number, address, social media handles."
10. "Apply your brand colours and fonts."
11. "Left-align all text."
12. "Leave white space around text and images."
13. "Download as PDF Print."
14. "Save in Canva as 'My Business Flyer.'"

Instructor Prompts:

- "What is the first thing the reader sees?" (Answer: The business name.)
- "Can you read all the text easily?" (Answer: Yes â€" good contrast.)
- "Do you know what to do next?" (Answer: Yes â€" the call to action is clear.)

Expected Result: Every learner has created a professional business flyer.

Completion Checklist:

- ☐ Business name is the largest text
- ☐ Tagline or offer is present
- ☐ Image is relevant and high-quality
- ☐ Key information is included
- ☐ Call to action is clear
- ☐ Contact information is present
- ☐ Brand colours and fonts are applied
- ☐ Text is left-aligned
- ☐ White space is adequate
- ☐ Downloaded as PDF Print
- ☐ Saved in Canva

I. INDEPENDENT CLASS EXERCISE (10 minutes)

Exercise: "Social Media Post Design"

Scenario: "Using the same business from your flyer, create an Instagram post and a Facebook post."

Task:

1. Create an Instagram post (1080 x 1080 pixels) for the same business.
2. Create a Facebook post (1200 x 628 pixels) for the same business.
3. Both posts must use the same brand colours and fonts as the flyer.
4. Each post must have one clear message and one call to action.
5. Download both as PNG.

Time Allowance: 10 minutes

Success Criteria:

- Correct dimensions for both platforms
- Consistent branding across all three designs

- One clear message per post
- Call to action present

Hints Available If the Learner Gets Stuck:

- Hint 1: "Use the same brand colours and fonts from your flyer."
- Hint 2: "Keep it simple â€" one image, one headline, one call to action."
- Hint 3: "For Instagram, use 1080 x 1080. For Facebook, use 1200 x 628."

Complete Answer Key for the Instructor: The learner should create two social media posts that are consistent with the flyer in colours, fonts and branding. Each post should have one clear message and one call to action.

J. REAL-WORLD CASE STUDY (5 minutes)

Case: "The Restaurant That Doubled Its Customers"

Situation: A restaurant in Port Harcourt has been struggling to attract customers. Their flyer is cluttered, with too many fonts and colours. Their social media posts are inconsistent â€" different colours and fonts for each post. A designer is hired to redesign their marketing materials.

The Problem: The restaurant's marketing materials look unprofessional and inconsistent. Customers do not recognise the brand. The flyer does not communicate clearly. The social media posts do not stand out.

Relevant Concept: Flyer and social media design. The designer applied all the principles â€" hierarchy, contrast, alignment, balance, white space and brand consistency.

Worked Solution: The designer:

1. Created a clean flyer with clear hierarchy â€" business name, tagline, key information, call to action.
2. Used the restaurant's brand colours consistently across all materials.
3. Created simple social media posts with one message and one call to action.
4. Within three months, customer visits double.

Transfer Exercise: "Your friend runs a small business and wants to promote it on social media. What are three things you would tell her to make her posts more effective?"

K. COMMON MISTAKES AND TROUBLESHOOTING (5 minutes)

Mistake 1: Too Much Text on a Flyer

Symptoms: The flyer is covered with text. **Fix:** Remove unnecessary information. Keep only the essentials â€" name, offer, key details, call to action.

Mistake 2: No Call to Action

Symptoms: The flyer does not tell the reader what to do. **Fix:** Add a clear call to action â€" "Call Now," "Visit Us," "Order Today."

Mistake 3: Inconsistent Branding Across Formats

Symptoms: The flyer, Instagram post and Facebook post all look different. **Fix:** Use the same brand colours and fonts across all designs.

Mistake 4: Complex Social Media Posts

Symptoms: The social media post tries to say too much. **Fix:** One message per post. If you have more to say, create multiple posts.

Mistake 5: Poor Image Quality

Symptoms: The images are blurry or pixelated. **Fix:** Use high-quality images from Canva's photo library or your own photos.

L. SESSION ASSIGNMENT (5 minutes)

Assignment Title: "My Promotional Flyer Package"

Design a flyer and two social media posts for a fictional business.

Requirements:

- One A4 flyer (PDF Print)
- One Instagram post (PNG)
- One Facebook post (PNG)
- All three must use the same brand colours and fonts
- Each must have a clear hierarchy and call to action

Marking Rubric:

Criterion	Excellent (5)	Good (3)	Needs Improvement (1)
Flyer hierarchy	Clear, effective	Mostly clear	Unclear
Flyer content	All key elements present	Most present	Missing elements
Social post 1	Correct dimensions, on-brand	Mostly correct	Incorrect
Social post 2	Correct dimensions, on-brand	Mostly correct	Incorrect
Brand consistency	Consistent across all three	Mostly consistent	Inconsistent
Export formats	All correct	Mostly correct	Incorrect

Total: 30 marks

M. KNOWLEDGE CHECK (5 minutes)

1. What are the five key elements of a business flyer? Answer: Business name, tagline/offer, key information, call to action, contact information.

2. What are the standard dimensions for an Instagram post? Answer: 1080 x 1080 pixels.

3. Why should social media posts be simple? Answer: You have less than 3 seconds to grab attention. If it takes more than 3 seconds to understand, it is too complex.

4. What is the most common mistake when using Canva templates? Answer: Not customising the template â€" keeping the default colours, fonts and images.

5. How many messages should each social media post have? Answer: One.

N. REFLECTION AND RECAP (5 minutes)

Today you learned how to design professional flyers and social media posts. You learned the key elements of each format, the design principles that apply, and how to maintain brand consistency across multiple formats. In the next session, you will learn about print design and identity materials.

O. INSTRUCTOR EVALUATION NOTES

Observable Signs of Competence

- The learner creates flyers with clear hierarchy and all key elements.
- The learner designs social media posts with one message and one call to action.
- The learner maintains brand consistency across formats.
- The learner uses correct dimensions for each format.

Common Misconceptions

- **"More text means more information."** Teach: less is more.
- **"Social media posts should say everything."** Teach: one message per post.
- **"Templates are ready to use."** Teach: always customise.

Differentiation Guidance

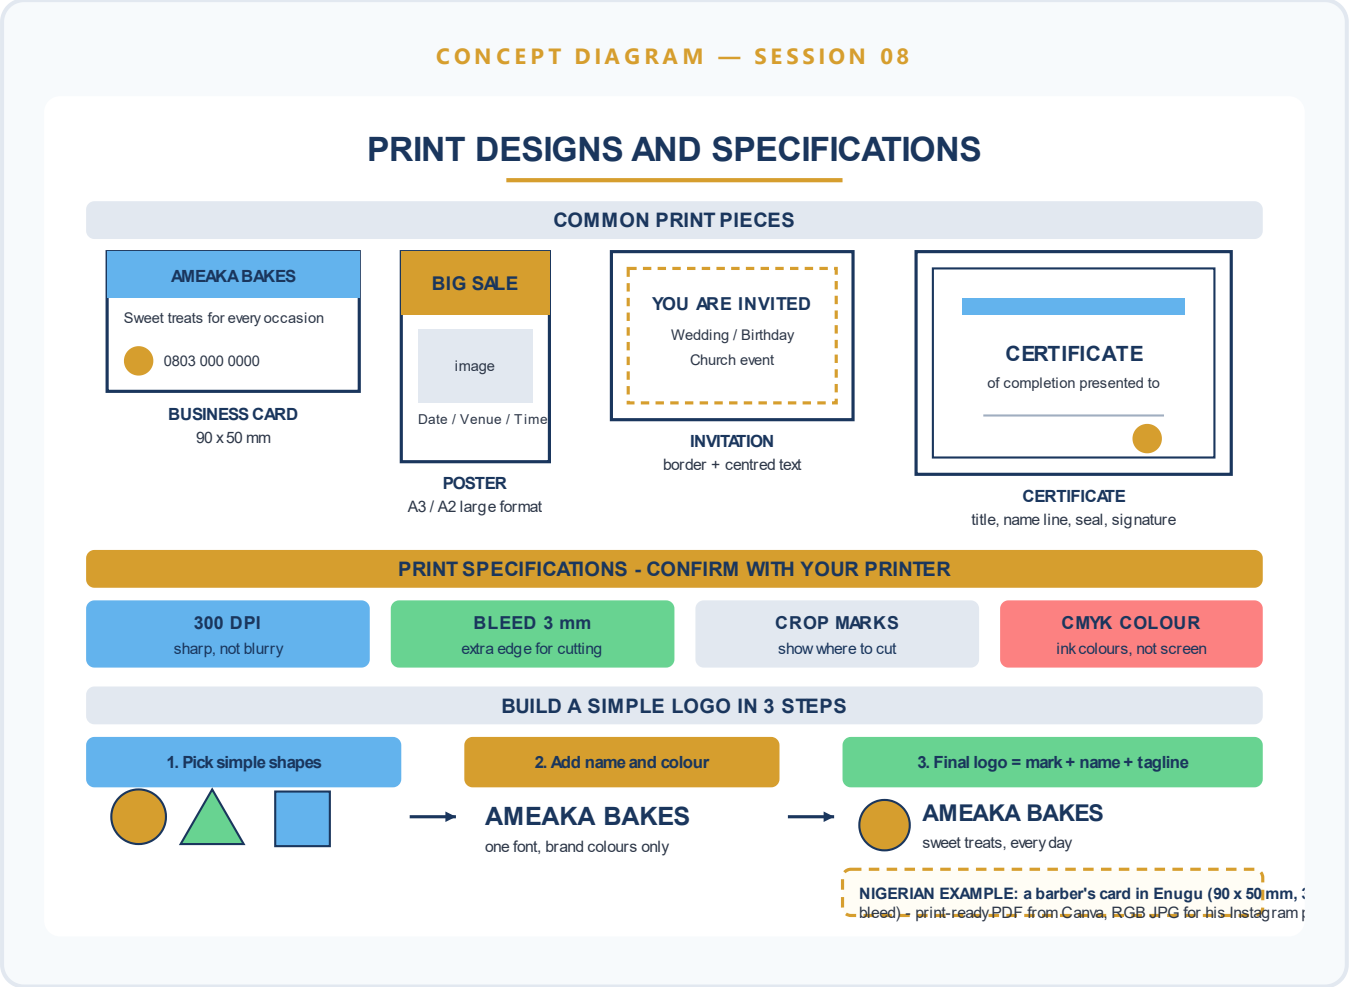

- Level 1: Provide a flyer template and guide them through customisation.
- Level 2: Complete the exercise as written.
- Level 3: Create a full promotional package (flyer + 3 social posts + WhatsApp graphic).

End of Session 7

Next Session: Session 8 â€" Real-World Design II: Print & Identity

SESSION 08 OF 12

Print and Identity

SESSION 8: REAL-WORLD DESIGN II â€" PRINT & IDENTITY

Week: 3 **Module:** Real-World Design **Duration:** 105 minutes **Difficulty:** Beginner **Prerequisite Knowledge:** Sessions 1â€"7 â€" All prior knowledge **Connection to Previous Session:** Builds on Session 7 by teaching print and identity design **Preparation Required Before Class:**

- Prepare business card, poster, invitation and certificate examples
- Prepare logo design examples
- Ensure Canva is accessible on all machines

A. SESSION IDENTIFICATION

Field	Detail
Session Number	8
Title	Real-World Design II â€" Print & Identity
Week	3
Module	Real-World Design

Field	Detail
Duration	105 minutes
Difficulty	Beginner
Prerequisite Knowledge	Sessions 1â€“7 â€” All prior knowledge
Connection to Previous Session	Builds on Session 7 by teaching print and identity design
Preparation	Print and identity design examples

B. LEARNING OUTCOMES

By the end of this session, the learner will be able to:

1. **Design a standard-size business card** with essential information.
2. **Design a poster** using large-format design principles.
3. **Design invitations** for weddings, birthdays and church events.
4. **Design certificates** with proper layout and borders.
5. **Create a simple logo** using shapes, text and colour.
6. **Apply print specifications** (300 DPI, bleed, crop marks) correctly.
7. **Explain the difference** between print and digital design requirements.

C. REQUIRED MATERIALS

Hardware:

- One desktop computer per learner
- Projector for instructor demonstration

Software:

- Canva (free tier)
- Web browser

Accounts:

- Each learner's Canva account

Internet:

- Academy Wi-Fi (required)

Printed Materials:

- "Business Card Essentials" handout (one per learner)
- "Print Specifications Reference" (one per learner)

D. OPENING ACTIVITY (10 minutes)

"The Business Card Test"

Instructor Setup: Display three business cards â€” one excellent, one average, one poor.

Instructor Script: "Good morning, everyone. Look at these three business cards. They are for the same type of business â€” a hair salon. Which one would make you trust the salon? Which one would make you throw it away? [Pause for answers.]

The best business card has the salon name as the most important element. It has the essential information â€” name, service, phone number, address. It uses clean fonts and a simple layout. It looks professional.

The worst business card has too much text, too many fonts, and the information is hard to find. It looks amateur.

Today, you will learn how to design business cards, posters, invitations, certificates and simple logos. These are the identity materials that every business needs. Let us begin."

E. PREREQUISITE REVIEW (5 minutes)

Review Questions and Expected Answers:

1. "What are the key elements of a business flyer?"
    - Business name, tagline/offer, key information, call to action, contact information.
2. "What are the standard dimensions for an Instagram post?"
    - 1080 x 1080 pixels.
3. "How do you export a design for print?"
    - Download as PDF Print at 300 DPI.
4. "What is the 60-30-10 rule?"
    - 60% dominant colour, 30% secondary colour, 10% accent colour.
5. "How do you create a simple logo in Canva?"
    - Use a shape, add text, group them together.

F. FULL LECTURE NOTES (35 minutes)

Topic 1: Business Card Design (10 minutes)

Instructor Script: "A business card is a small card that contains your business's essential contact information. It is one of the most important identity materials for any business.

Standard Business Card Size:

- Nigeria/International: 3.5 x 2 inches (1050 x 600 pixels at 300 DPI)
- Always check with your print shop for their preferred size.

Essential Information on a Business Card:

1. Business name (most important)
2. Your name and title
3. Phone number
4. Email address
5. Physical address (if applicable)
6. Website or social media handles
7. Logo (if available)

Business Card Design Principles:

1. **Hierarchy:** The business name is the largest. Your name and title are second. Contact information is smallest.
2. **Simplicity:** A business card is small. Do not try to fit too much information.
3. **Readability:** Use fonts that are readable at small sizes.
4. **Brand Consistency:** Use your brand colours and fonts.
5. **White Space:** Leave breathing room â€" do not fill every inch.

Common Business Card Mistakes:

- Too much text â€" the card looks cluttered.
- Too small fonts â€" hard to read.
- Too many colours â€" looks unprofessional.

- Missing essential information â€" no phone number or address.
- Low-resolution design â€" prints blurry."

Topic 2: Poster Design (5 minutes)

Instructor Script: "A poster is a large-format design intended to be viewed from a distance. Posters are used for events, advertisements, announcements and decorations.

Poster Sizes:

- A3: 11.7 x 16.5 inches (3508 x 4961 pixels at 300 DPI)
- A2: 16.5 x 23.4 inches (4961 x 7016 pixels at 300 DPI)
- Custom sizes are also common.

Poster Design Principles:

1. **Large Text:** Posters are viewed from a distance. Text must be large and bold.
2. **Simple Message:** One main message. Do not try to say everything.
3. **Strong Visual:** One strong image or graphic that grabs attention.
4. **Clear Hierarchy:** What you see from far away (headline) vs what you see up close (details).
5. **Contrast:** High contrast for readability at a distance.

Topic 3: Invitations and Certificates (10 minutes)

Instructor Script: "Invitations and certificates are common design needs for events, churches, schools and organisations.

Invitations: An invitation tells people about an event and encourages them to attend.

Key Elements of an Invitation:

1. Event name (e.g., "Wedding Ceremony," "Birthday Party," "Church Anniversary")
2. Date and time
3. Venue
4. Host name(s)
5. Dress code (if applicable)
6. RSVP information

Invitation Design Principles:

1. **Tone:** The design should match the tone of the event. A wedding invitation is elegant. A birthday invitation is fun. A church invitation is formal.
2. **Hierarchy:** The event name is the most important. Date and time are second. Venue is third.
3. **Readability:** All text must be readable. Do not use decorative fonts for essential information.

Certificates: A certificate is a formal document that recognises an achievement or participation.

Key Elements of a Certificate:

1. Title (e.g., "Certificate of Achievement," "Certificate of Participation")
2. Recipient name (most important â€" usually the largest text)
3. Description of the achievement
4. Date
5. Signature lines
6. Organisation name and logo

Certificate Design Principles:

1. **Formality:** Certificates should look formal and official.
2. **Border:** A decorative border adds a sense of importance.
3. **Hierarchy:** The recipient's name is the most important element.
4. **White Space:** Leave plenty of white space for a clean, elegant look."

Topic 4: Simple Logo Design (10 minutes)

Instructor Script: "A logo is a visual mark that represents a business, organisation or brand. It is the most important element of brand identity.

Types of Logos:

1. **Wordmark:** Text only (e.g., Google, Coca-Cola). The business name is the logo.
2. **Lettermark:** Initials only (e.g., IBM, CNN). The first letters of the business name.
3. **Icon/Symbol:** An image or shape (e.g., Apple, Nike). A visual mark without text.
4. **Combination:** Text + icon (e.g., Burger King, Adidas). A wordmark with a symbol.

Simple Logo Design in Canva: You can create a simple, effective logo using Canva's shape and text tools.

Steps:

1. Choose a shape that represents the business (e.g., a circle for unity, a square for stability, a triangle for energy).
2. Add the business name or initials.
3. Choose one or two brand colours.
4. Use a clean, bold font.
5. Group the shape and text.
6. Export as PNG with transparent background (if available in free tier) or as a high-resolution PNG.

Logo Design Principles:

1. **Simplicity:** A simple logo is more memorable and more versatile.
2. **Relevance:** The logo should be relevant to the business.
3. **Memorability:** A good logo is easy to remember.
4. **Versatility:** A good logo works in different sizes and formats.
5. **Timelessness:** A good logo does not follow trends that will quickly become dated.

G. INSTRUCTOR DEMONSTRATION (15 minutes)

Demonstration 1: Designing a Business Card (5 minutes)

What the Instructor Prepares:

- Canva open on the projector
- A blank canvas with business card dimensions

What the Instructor Says and Does: "I am going to design a business card for a fictional hair salon."

1. "I create a new design with dimensions 1050 x 600 pixels (3.5 x 2 inches at 300 DPI)."
2. "I set the background to white."
3. "I add the salon name â€" 'Glamour Hair Studio' â€" in large, bold text at the top."
4. "I add a tagline â€" 'Beauty Redefined' â€" in smaller text below the name."
5. "I add a simple logo â€" a circle with the initials 'GH.'"
6. "I add the essential information â€" name, title, phone number, address â€" at the bottom."
7. "I use my brand colours â€" gold and black."
8. "I leave plenty of white space."
9. "I download as PDF Print."

What Learners Should Observe: The instructor designing a professional business card with all essential elements.

Demonstration 2: Designing a Simple Logo (5 minutes)

What the Instructor Prepares:

- Canva open on the projector
- A blank canvas

What the Instructor Says and Does: "Now I will create a simple logo for the same salon."

1. "I create a new design with dimensions 500 x 500 pixels."
2. "I add a circle shape. I change the fill to gold."
3. "I add text â€" 'GH' â€" in the centre of the circle. I choose a bold, elegant font. I change the colour to black."
4. "I add the full name â€" 'Glamour Hair Studio' â€" below the circle in smaller text."
5. "I group all elements."
6. "I download as PNG."

What Learners Should Observe: The instructor creating a simple, professional logo using shapes and text.

Demonstration 3: Designing a Certificate (5 minutes)

What the Instructor Prepares:

- Canva open on the projector
- A blank canvas with A4 dimensions

What the Instructor Says and Does: "Now I will design a certificate."

1. "I create a new design with A4 dimensions (2480 x 3508 pixels)."
2. "I set the background to a light cream colour."
3. "I add a decorative border using shapes."
4. "I add the title â€" 'Certificate of Achievement' â€" in large, elegant text at the top."
5. "I add 'This certificate is presented to' in smaller text."
6. "I add a blank line for the recipient's name."
7. "I add the description, date and signature lines at the bottom."
8. "I use formal colours â€" dark blue and gold."
9. "I download as PDF Print."

What Learners Should Observe: The instructor designing a formal, elegant certificate.

H. GUIDED PRACTICAL EXERCISE (20 minutes)

Exercise: "My Business Card and Logo"

Practical Objective: The learner will design a business card and a simple logo for a fictional business.

Starting Materials:

- Canva open on each machine, signed in

Instructions:

Part 1: Design a Logo (8 minutes)

1. "Create a new design with dimensions 500 x 500 pixels."
2. "Add a shape that represents your business."
3. "Add your business name or initials."
4. "Choose one or two brand colours."
5. "Use a clean, bold font."
6. "Group all elements."
7. "Save as 'My Simple Logo.'"

Part 2: Design a Business Card (12 minutes)

8. "Create a new design with dimensions 1050 x 600 pixels."
9. "Set the background to white or a light brand colour."
10. "Add your business name in large, bold text."
11. "Add your name and title."

12. "Add your logo."
13. "Add essential contact information â€" phone, email, address."
14. "Use your brand colours and fonts."
15. "Leave white space."
16. "Download as PDF Print."
17. "Save as 'My Business Card.'"

Instructor Prompts:

- "Is the business name the most important element?" (Answer: Yes.)
- "Can you read all the text easily?" (Answer: Yes.)
- "Is there enough white space?" (Answer: Yes.)

Completion Checklist:

- ☐ Logo created with shape, text and brand colours
- ☐ Business card created with correct dimensions
- ☐ All essential information included
- ☐ Brand colours and fonts applied
- ☐ White space adequate
- ☐ Downloaded as PDF Print
- ☐ Saved in Canva

I. INDEPENDENT CLASS EXERCISE (10 minutes)

Exercise: "Invitation or Certificate Design"

Scenario: "Design either an invitation or a certificate for a fictional event or organisation."

Task: Choose one:

- **Option A:** Design a wedding invitation or birthday invitation.
- **Option B:** Design a certificate of achievement or participation.

Requirements:

- Correct dimensions (A4 or A5 for print)
- All essential information included
- Appropriate tone and style
- Brand colours and fonts applied
- Downloaded as PDF Print

Time Allowance: 10 minutes

Success Criteria:

- Correct dimensions
- All essential information present
- Appropriate tone and style
- Professional appearance

J. REAL-WORLD CASE STUDY (5 minutes)

Case: "The Church Anniversary"

Situation: A church in Port Harcourt is celebrating its 25th anniversary. They need a banner, invitations, certificates and a programme cover. A member volunteers to design them but has no design training. The designs look amateur and the pastor is

not satisfied.

The Problem: The volunteer does not understand print specifications, hierarchy or how to create formal designs.

Relevant Concept: Print and identity design. If the volunteer had taken this course, they would know how to design professional print materials.

Worked Solution: The volunteer learns to:

1. Design a formal banner with large, readable text.
2. Design elegant invitations with the right tone.
3. Design certificates with proper borders and layout.
4. Export everything as PDF Print at 300 DPI.
5. The pastor is impressed and the anniversary is a success.

Transfer Exercise: "Your friend is organising a wedding. She needs invitations and a programme cover. What advice would you give her?"

K. COMMON MISTAKES AND TROUBLESHOOTING (5 minutes)

Mistake 1: Too Much Information on a Business Card

Symptoms: The business card is cluttered with text. **Fix:** Include only essential information â€" name, title, phone, email, address.

Mistake 2: Fonts Too Small on Print Materials

Symptoms: Text is hard to read when printed. **Fix:** Use a minimum of 10pt for body text on print materials.

Mistake 3: Low-Resolution Images in Print Designs

Symptoms: Images are blurry when printed. **Fix:** Use high-resolution images (300 DPI) for print.

Mistake 4: Informal Tone for Formal Events

Symptoms: A wedding invitation looks like a party flyer. **Fix:** Match the tone to the event. Formal events need formal designs.

Mistake 5: Not Leaving White Space on Certificates

Symptoms: The certificate looks cluttered. **Fix:** Leave plenty of white space for an elegant, formal look.

L. SESSION ASSIGNMENT (5 minutes)

Assignment Title: "My Identity Package"

Design a business card, logo and one additional identity material (invitation, certificate or poster) for a fictional business.

Requirements:

- Logo (PNG)
- Business card (PDF Print)
- One additional material (PDF Print)
- All must use the same brand colours and fonts

Marking Rubric:

Criterion	Excellent (5)	Good (3)	Needs Improvement (1)
Logo	Simple, clean, professional	Mostly correct	Too complex or missing
Business card	All elements present, professional	Mostly correct	Missing elements

Criterion	Excellent (5)	Good (3)	Needs Improvement (1)
Additional material	Correct format, appropriate tone	Mostly correct	Incorrect
Brand consistency	Consistent across all three	Mostly consistent	Inconsistent
Export formats	All correct	Mostly correct	Incorrect

Total: 25 marks

M. KNOWLEDGE CHECK (5 minutes)

1. What is the standard size of a business card? Answer: 3.5 x 2 inches (1050 x 600 pixels at 300 DPI).

2. What are the four types of logos? Answer: Wordmark, lettermark, icon/symbol, combination.

3. What is the most important element on a certificate? Answer: The recipient's name.

4. What resolution should you use for print designs? Answer: 300 DPI.

5. What is the most common mistake on business cards? Answer: Too much text / cluttered layout.

N. REFLECTION AND RECAP (5 minutes)

Today you learned how to design business cards, posters, invitations, certificates and simple logos. You learned the key elements of each format and the design principles that apply. In the next session, you will learn how to organise your work, present designs to clients and build a portfolio.

O. INSTRUCTOR EVALUATION NOTES

Observable Signs of Competence

- The learner designs business cards with all essential elements.
- The learner creates simple, clean logos.
- The learner designs invitations and certificates with appropriate tone.
- The learner applies print specifications correctly.

Common Misconceptions

- **"A business card should have lots of information."** Teach: only essentials.
- **"Logos need to be complex to look professional."** Teach: simple is better.
- **"Certificates do not need white space."** Teach: white space creates elegance.

Differentiation Guidance

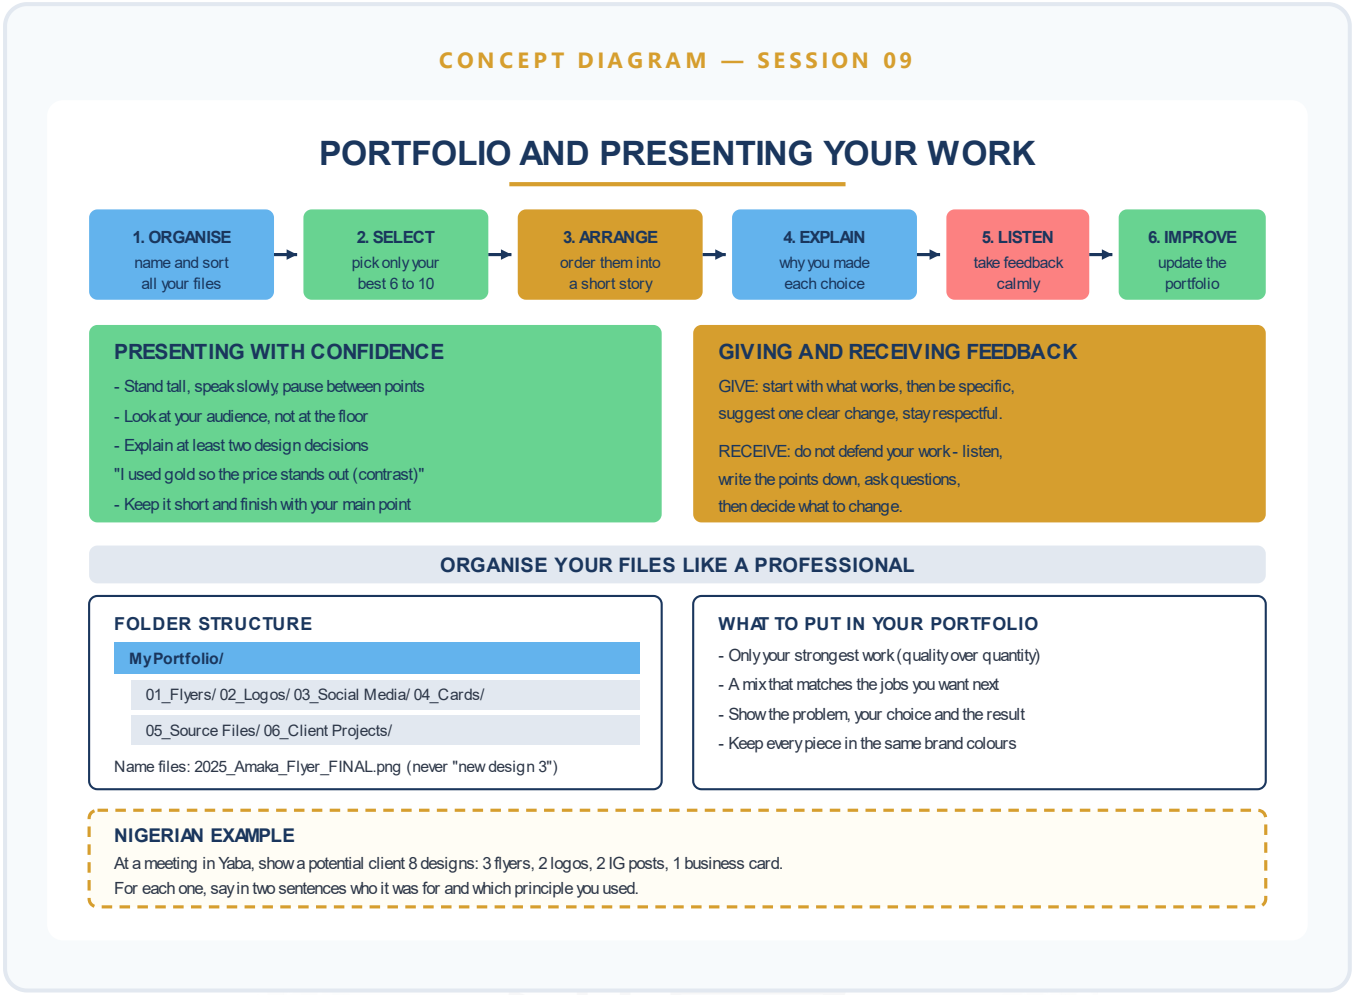

- Level 1: Provide templates and guide customisation.
- Level 2: Complete the exercise as written.
- Level 3: Design a full identity package (logo + card + letterhead + social media banner).

End of Session 8

Next Session: Session 9 â€" Real-World Design III: Portfolios & Presentation

SESSION 09 OF 12

Portfolios Presentation

SESSION 9: REAL-WORLD DESIGN III â€" PORTFOLIOS & PRESENTATION

Week: 3 **Module:** Real-World Design **Duration:** 105 minutes **Difficulty:** Beginner **Prerequisite Knowledge:** Sessions 1â€"8 â€" All prior knowledge **Connection to Previous Session:** Builds on Session 8 by teaching portfolio creation and presentation skills **Preparation Required Before Class:**

- Prepare portfolio examples
- Prepare presentation feedback forms
- Ensure Canva is accessible on all machines

A. SESSION IDENTIFICATION

Field	Detail
Session Number	9
Title	Real-World Design III â€" Portfolios & Presentation
Week	3
Module	Real-World Design

Field	Detail
Duration	105 minutes
Difficulty	Beginner
Prerequisite Knowledge	Sessions 1â€"8 â€" All prior knowledge
Connection to Previous Session	Builds on Session 8 by teaching portfolio and presentation
Preparation	Portfolio examples, feedback forms

B. LEARNING OUTCOMES

By the end of this session, the learner will be able to:

1. **Organise design files** logically and professionally.
2. **Select their best work** for a portfolio.
3. **Present designs to an audience** with confidence.
4. **Explain design decisions** using correct vocabulary.
5. **Receive and implement feedback** professionally.
6. **Give constructive feedback** to peers.

C. REQUIRED MATERIALS

Hardware:

- One desktop computer per learner
- Projector for presentations

Software:

- Canva (free tier)
- Web browser

Accounts:

- Each learner's Canva account

Internet:

- Academy Wi-Fi (required)

Printed Materials:

- "Portfolio Checklist" (one per learner)
- "Peer Feedback Form" (one per learner)

D. OPENING ACTIVITY (10 minutes)

"The Portfolio Review"

Instructor Setup: Display two portfolios â€" one well-organised, one poorly organised.

Instructor Script: "Good morning, everyone. Look at these two portfolios. They contain the same designs. But one is easy to navigate and looks professional. The other is disorganised and hard to follow. Which one would you show to a potential client? [Pause.]

A portfolio is a collection of your best work. It is how you show potential clients or employers what you can do. A well-organised portfolio makes you look professional. A poorly organised portfolio makes you look careless â€" even if the designs

themselves are good.

Today, you will learn how to organise your work, select your best designs, present them confidently and handle feedback professionally. These are the skills that turn a designer into a professional."

E. PREREQUISITE REVIEW (5 minutes)

Review Questions and Expected Answers:

1. "What are the key elements of a business card?"
    - Business name, your name and title, phone number, email, address, logo.
2. "What are the four types of logos?"
    - Wordmark, lettermark, icon/symbol, combination.
3. "How do you export a design for print?"
    - Download as PDF Print at 300 DPI.
4. "What is the 60-30-10 rule?"
    - 60% dominant colour, 30% secondary colour, 10% accent colour.
5. "What is the most important principle of branding?"
    - Consistency.

F. FULL LECTURE NOTES (35 minutes)

Topic 1: Organising Design Files (10 minutes)

Instructor Script: "Professional designers organise their files carefully. This makes it easy to find work, share files with clients and maintain version control.

File Organisation Tips:

1. **Use folders.** Create a folder for each project or client.
2. **Use descriptive file names.** Instead of 'design1.png,' use 'restaurant-flyer-v1.png.'
3. **Use version numbers.** When you revise a design, save it as 'v2,' 'v3,' etc. This way you can go back to previous versions if needed.
4. **Separate final files from working files.** Keep your final exported files in a separate folder from your Canva working files.
5. **Back up your work.** Save copies of your work in at least two places â€" your computer and a USB drive or cloud storage.

File Naming Convention: [Client Name] - [Design Type] - [Version] - [Date] Example: Adaezes-Fashion-Flyer-v1-08102026.png

---

Topic 2: Building a Portfolio (10 minutes)

Instructor Script: "A portfolio is a curated collection of your best work. It is not everything you have ever created â€" it is your strongest pieces that demonstrate your range and skills.

What to Include in a Portfolio:

1. **Your best work.** Only include designs you are proud of.
2. **Variety.** Show different types of designs â€" flyers, social posts, business cards, logos.
3. **Context.** For each design, include a brief description â€" what was the purpose, who was the audience, what tools did you use.
4. **Process.** If possible, show the process â€" initial concept, revisions, final design.

How to Create a Simple Portfolio:

1. **Canva Presentation.** Create a Canva presentation with one slide per design.
2. **PDF Portfolio.** Export your designs as images and compile them into a PDF.

3. **Online Portfolio.** Use a free platform like Behance or a simple Google Slides presentation.

Portfolio Tips:

- Start with your strongest piece.
- End with your second strongest piece.
- Keep it concise â€" 5â€"10 pieces is enough for a beginner portfolio.
- Update it regularly as you create new work.

Topic 3: Presenting Designs (10 minutes)

Instructor Script: "Presenting your work is a skill. A good presentation can make a mediocre design look great. A bad presentation can make a great design look mediocre.

Presentation Tips:

1. **Start with the brief.** Explain what the client asked for.
2. **Explain your decisions.** Why did you choose these colours? Why this font? Why this layout?
3. **Show the process.** If you have multiple versions, show how the design evolved.
4. **Be confident.** You know more about your design than anyone else in the room.
5. **Invite feedback.** Ask specific questions â€" "What do you think of the colour choice?" "Is the hierarchy clear?"

Handling Feedback:

1. **Listen carefully.** Do not interrupt or get defensive.
2. **Ask clarifying questions.** "Can you explain what you mean by 'too busy'?"
3. **Thank the person.** Feedback is a gift â€" even if it is hard to hear.
4. **Evaluate the feedback.** Not all feedback is useful. Consider the source and the context.
5. **Implement what makes sense.** You do not have to implement every suggestion, but you should consider each one.

Topic 4: Giving Constructive Feedback (5 minutes)

Instructor Script: "Giving feedback is as important as receiving it. Good feedback is specific, constructive and kind.

How to Give Constructive Feedback:

1. **Start with what works.** "I like the colour combination â€" it feels fresh and modern."
2. **Be specific.** Instead of "I do not like it," say "The text is hard to read because the contrast is low."
3. **Suggest solutions.** "Have you tried making the headline larger?"
4. **Be kind.** Critique the work, not the person.
5. **Ask questions.** "What was your reasoning behind this choice?"

Feedback Formula: "I like [specific element] because [reason]. I wonder if [suggestion] would improve [specific aspect]. Have you considered [alternative]?"

G. INSTRUCTOR DEMONSTRATION (15 minutes)

Demonstration 1: Organising a Portfolio in Canva (5 minutes)

What the Instructor Prepares:

- Canva open on the projector
- Several completed designs

What the Instructor Says and Does: "I am going to create a simple portfolio in Canva."

1. "I create a new presentation in Canva (16:9 dimensions)."
2. "Slide 1: Title slide â€" my name and 'Design Portfolio.'"
3. "Slide 2: First design â€" a flyer. I add the exported image and a brief description."

4. "Slide 3: Second design â€" a business card. Same format."
5. "Slide 4: Third design â€" a social media post. Same format."
6. "Slide 5: Thank you slide with my contact information."
7. "I apply a consistent theme across all slides."
8. "I download as PDF."

What Learners Should Observe: The instructor creating a simple, professional portfolio in Canva.

Demonstration 2: Presenting a Design (5 minutes)

What the Instructor Prepares:

- One of the designs from the portfolio

What the Instructor Says and Does: "Now I will present this design as if I were presenting to a client."

1. "The brief was to create a flyer for a restaurant's grand opening."
2. "I chose warm colours â€" red and orange â€" because they are associated with food and energy."
3. "I made the restaurant name the largest text because that is the most important information."
4. "I used a clear call to action â€" 'Grand Opening â€" This Saturday' â€" so people know what to do."
5. "I left plenty of white space so the design does not feel cluttered."
6. "I would love to hear your feedback. What do you think of the colour choice? Is the hierarchy clear?"

What Learners Should Observe: The instructor presenting a design with confidence and explaining decisions.

Demonstration 3: Receiving Feedback (5 minutes)

What the Instructor Prepares:

- The same design, with a simulated "client" (another instructor or a learner)

What the Instructor Says and Does: "The client says: 'I like the design but I think it is too busy. Can you simplify it?'"

1. "I listen carefully and do not get defensive."
2. "I ask a clarifying question: 'When you say busy, do you mean there is too many elements, or the colours are too bright?'"
3. "The client says: 'There are too many elements.'"
4. "I thank the client: 'Thank you for the feedback. I will remove the decorative elements and simplify the layout.'"
5. "I make the revision and present the updated design."

What Learners Should Observe: The instructor receiving feedback professionally and implementing it.

H. GUIDED PRACTICAL EXERCISE (20 minutes)

Exercise: "My Design Portfolio"

Practical Objective: The learner will create a simple portfolio of their best work from the course so far.

Starting Materials:

- Canva open on each machine, signed in
- All previous designs saved in Canva

Instructions:

1. "Create a new presentation in Canva (16:9 dimensions)."
2. "Slide 1: Title slide â€" your name and 'Design Portfolio.'"
3. "Select your 3â€"4 best designs from the course so far."
4. "For each design, create a slide with:
    - The exported image
    - A brief description (purpose, audience, tools used, key decisions)"

5. "Apply a consistent theme across all slides."
6. "Final slide: Thank you with your contact information."
7. "Download as PDF."
8. "Save in Canva as 'My Design Portfolio.'"

Instructor Prompts:

- "Which designs are you most proud of?" (Answer: Varies.)
- "Can you explain your design decisions?" (Answer: Varies.)

Completion Checklist:

- ☐ Title slide with name and "Design Portfolio"
- ☐ 3â€“4 best designs included
- ☐ Each design has a brief description
- ☐ Consistent theme across all slides
- ☐ Thank you slide with contact information
- ☐ Downloaded as PDF
- ☐ Saved in Canva

I. INDEPENDENT CLASS EXERCISE (10 minutes)

Exercise: "Peer Portfolio Review"

Scenario: "Review a partner's portfolio and provide constructive feedback."

Task:

1. Exchange portfolios with a partner.
2. Review their portfolio carefully.
3. Complete the "Peer Feedback Form" with:
    - Two things that work well
    - Two suggestions for improvement
    - One question about their design decisions
4. Share your feedback with your partner verbally.

Time Allowance: 10 minutes

Success Criteria:

- Two specific positive comments
- Two specific, constructive suggestions
- One clarifying question
- Feedback is kind and professional

J. REAL-WORLD CASE STUDY (5 minutes)

Case: "The Designer Who Lost a Client"

Situation: A freelance designer presents work to a potential client. The designer shows 20 designs without any explanation. The client is overwhelmed and confused. The designer does not ask for feedback or explain their decisions. The client hires a different designer.

The Problem: The designer failed to present their work effectively. They did not explain their decisions, did not organise their portfolio and did not engage the client in a conversation.

Relevant Concept: Portfolio presentation. If the designer had presented 5 strong pieces with clear explanations, the client would have been impressed.

Worked Solution: The designer learns to:

1. Select their 5 best pieces.
2. Organise them from strongest to strongest.
3. Explain each design decision clearly.
4. Ask for feedback and respond professionally.
5. The next client is impressed and hires them.

Transfer Exercise: "You are presenting your work to a potential employer. How would you structure your presentation?"

K. COMMON MISTAKES AND TROUBLESHOOTING (5 minutes)

Mistake 1: Including Everything in the Portfolio

Symptoms: The portfolio has 20+ designs of varying quality. **Fix:** Select only your best 5â€"10 pieces. Quality over quantity.

Mistake 2: Not Explaining Design Decisions

Symptoms: The presenter shows designs without any explanation. **Fix:** Always explain the brief, your decisions and the reasoning behind them.

Mistake 3: Getting Defensive About Feedback

Symptoms: The designer argues with feedback instead of listening. **Fix:** Listen carefully, ask clarifying questions, thank the person, then evaluate.

Mistake 4: Inconsistent Portfolio Design

Symptoms: Each slide has a different theme or layout. **Fix:** Apply a consistent theme across all portfolio slides.

Mistake 5: Not Having a Call to Action

Symptoms: The portfolio ends without contact information. **Fix:** Always end with a thank you slide and your contact information.

L. SESSION ASSIGNMENT (5 minutes)

Assignment Title: "My Design Portfolio"

Create a professional portfolio of your best work from the course.

Requirements:

- 5â€"10 of your best designs
- Each design has a brief description
- Consistent theme
- Downloaded as PDF
- Saved in Canva

Marking Rubric:

Criterion	Excellent (5)	Good (3)	Needs Improvement (1)
Selection	Best work, good variety	Mostly good	Weak selection
Descriptions	Clear, specific	Mostly clear	Vague or missing

Criterion	Excellent (5)	Good (3)	Needs Improvement (1)
Theme consistency	Consistent throughout	Mostly consistent	Inconsistent
Presentation	Professional, confident	Mostly professional	Unprofessional
File saved correctly	PDF + Canva	One format	Not saved

Total: 25 marks

M. KNOWLEDGE CHECK (5 minutes)

1. What should a portfolio contain? Answer: Your best work, not everything you have created.

2. How many pieces should a beginner portfolio have? Answer: 5â€“10 pieces.

3. What is the feedback formula? Answer: "I like [specific element] because [reason]. I wonder if [suggestion] would improve [specific aspect]."

4. What should every portfolio end with? Answer: A thank you slide with contact information.

5. What is the most important rule when receiving feedback? Answer: Listen carefully and do not get defensive.

N. REFLECTION AND RECAP (5 minutes)

Today you learned how to organise your work, build a portfolio, present designs confidently and handle feedback professionally. In the next session, you will learn the professional design workflow â€” from brief to delivery.

O. INSTRUCTOR EVALUATION NOTES

Observable Signs of Competence

- The learner organises files logically.
- The learner selects their best work for a portfolio.
- The learner presents designs with confidence.
- The learner explains design decisions clearly.
- The learner handles feedback professionally.

Common Misconceptions

- **"A portfolio should have everything."** Teach: quality over quantity.
- **"Feedback is personal criticism."** Teach: feedback is about the work, not the person.
- **"Presenting is just showing."** Teach: presenting is explaining and engaging.

Differentiation Guidance

- Level 1: Provide a portfolio template and guide them through populating it.
- Level 2: Complete the exercise as written.
- Level 3: Create an online portfolio on Behance or a similar platform.

End of Session 9 â€” End of Week 3 (Real-World Design)

Next Session: Session 10 â€” Professional Workflow

SESSION 10 OF 12

Professional Workflow

CONCEPT DIAGRAM — SESSION 10

SESSION 10: PROFESSIONAL WORKFLOW

Week: 4 **Module:** Professional Workflow **Duration:** 105 minutes **Difficulty:** Beginner **Prerequisite Knowledge:** Sessions 1â€"9 â€" All prior knowledge **Connection to Previous Session:** Builds on all previous sessions by teaching the professional design workflow **Preparation Required Before Class:**

- Prepare design brief templates
- Prepare revision workflow examples
- Prepare export format reference cards

A. SESSION IDENTIFICATION

Field	Detail
Session Number	10
Title	Professional Workflow
Week	4
Module	Professional Workflow

Field	Detail
Duration	105 minutes
Difficulty	Beginner
Prerequisite Knowledge	Sessions 1â€"9 â€" All prior knowledge
Connection to Previous Session	Builds on all previous sessions
Preparation	Design brief templates, revision workflow examples

B. LEARNING OUTCOMES

By the end of this session, the learner will be able to:

1. **Understand client requirements** and ask the right questions.
2. **Work from a design brief** to create targeted designs.
3. **Manage the revision workflow** professionally.
4. **Organise design files** for handover.
5. **Export designs** in the correct format for the client's needs.
6. **Explain pricing basics** for design work.
7. **Apply professional communication** throughout the design process.

C. REQUIRED MATERIALS

Hardware:

- One desktop computer per learner
- Projector for instructor demonstration

Software:

- Canva (free tier)
- Web browser

Accounts:

- Each learner's Canva account

Internet:

- Academy Wi-Fi (required)

Printed Materials:

- "Design Brief Template" (one per learner)
- "Client Communication Guide" (one per learner)

D. OPENING ACTIVITY (10 minutes)

"The Brief"

Instructor Setup: Display a sample design brief on the projector.

Instructor Script: "Good morning, everyone. Over the past nine sessions, you have learned design principles, Canva skills and real-world design. Today, we learn the professional workflow â€" how designers work with clients from the first meeting to the final delivery.

A design brief is a document that tells the designer what the client needs. It includes the purpose, audience, requirements, timeline and budget. A good brief prevents misunderstandings and ensures the designer creates what the client actually wants.

Today, you will learn how to work from a brief, manage revisions, organise files and deliver professional work. These are the skills that separate a hobbyist from a professional."

E. PREREQUISITE REVIEW (5 minutes)

Review Questions and Expected Answers:

1. "What are the six core design principles?"
    - Hierarchy, contrast, alignment, balance, white space, purpose/audience.
2. "What is a brand kit?"
    - A collection of brand colours, fonts and logos.
3. "How do you export for print?"
    - PDF Print at 300 DPI.
4. "What should a portfolio contain?"
    - Your best 5â€“10 pieces with descriptions.
5. "What is the most important rule when receiving feedback?"
    - Listen carefully and do not get defensive.

F. FULL LECTURE NOTES (35 minutes)

Topic 1: Understanding Client Requirements (10 minutes)

Instructor Script: "The first step in any design project is understanding what the client needs. This is done through a design brief â€“ either a formal document or a conversation.

Key Questions to Ask a Client:

1. **What is the purpose of the design?** What do you want it to achieve?
2. **Who is the target audience?** Who will see this design?
3. **What information must be included?** Text, images, logos, contact details.
4. **What is the format?** Print or digital? What size?
5. **What is the timeline?** When do you need it?
6. **What is the budget?** How much can you spend on design?
7. **Are there any brand guidelines?** Colours, fonts, logos, tone.
8. **Who is the approver?** Who has the final say on the design?

Why These Questions Matter: Without clear requirements, you risk creating something the client does not want. This wastes time, money and goodwill. A good brief prevents this.

Topic 2: Working from a Design Brief (10 minutes)

Instructor Script: "Once you have the brief, you can start the design process. Here is a simple workflow:

Step 1: Research

- Look at similar designs for inspiration.
- Research the client's industry and audience.
- Collect any brand assets (logos, colours, fonts).

Step 2: Plan

- Sketch a rough layout on paper.
- Decide on the hierarchy â€" what is most important?
- Choose colours, fonts and images.

Step 3: Create

- Build the design in Canva.
- Apply the design principles you have learned.
- Save multiple versions as you work.

Step 4: Review

- Step back and look at the design with fresh eyes.
- Check it against the brief â€" does it meet all the requirements?
- Ask a friend or colleague for feedback.

Step 5: Revise

- Make changes based on your review and feedback.
- Save the revised version.

Step 6: Deliver

- Export in the correct format.
- Organise the files.
- Send to the client with a brief explanation.

Topic 3: The Revision Workflow (10 minutes)

Instructor Script: "Revisions are a normal part of the design process. Clients rarely love the first version. Here is how to handle revisions professionally.

The Revision Process:

1. **Present the design.** Explain your decisions and reasoning.
2. **Receive feedback.** Listen carefully and take notes.
3. **Clarify.** Ask questions if the feedback is unclear.
4. **Evaluate.** Consider each piece of feedback. Not all feedback is useful â€" use your judgement.
5. **Revise.** Make the changes that improve the design.
6. **Present again.** Show the revised design and explain what changed.
7. **Repeat** until the client is satisfied.
8. **Finalise.** Once approved, export the final files and deliver.

Revision Tips:

- Limit revisions to 2â€"3 rounds. More than that suggests the brief was unclear.
- Charge for additional revisions if you are working professionally.
- Keep all versions so you can go back if needed.
- Do not take feedback personally. It is about the work, not you.

Topic 4: File Organisation and Handover (5 minutes)

Instructor Script: "When you deliver a design to a client, you should organise the files professionally.

What to Deliver:

1. **Final exported files** in the correct format (PNG, PDF, etc.).
2. **Source files** (Canva link or editable file) â€" if the client wants to make future edits.
3. **A README file** (optional) explaining what each file is and how to use it.

File Naming Convention: [Client Name] - [Design Type] - [Version] - [Date] Example: Adaeze-Fashion-Flyer-Final-08102026.pdf

G. INSTRUCTOR DEMONSTRATION (15 minutes)

Demonstration 1: Working from a Brief (7 minutes)

What the Instructor Prepares:

- A sample design brief projected on the screen

What the Instructor Says and Does: "I have received this brief from a client. Let me show you how I would approach it."

1. "The brief says: 'Design a flyer for a restaurant grand opening. Target audience: local residents. Must include: restaurant name, date, address, phone number, special offer. Format: A4 print. Brand colours: red and gold.'"
2. "I start by researching similar restaurant flyers for inspiration."
3. "I sketch a rough layout â€" restaurant name at the top, image in the centre, details at the bottom."
4. "I choose colours â€" red and gold from the brand guidelines."
5. "I create the design in Canva, applying all the principles I have learned."
6. "I review the design against the brief â€" does it meet all the requirements? Yes."
7. "I export as PDF Print and deliver to the client."

What Learners Should Observe: The instructor working through the design process from brief to delivery.

Demonstration 2: Handling a Revision Request (8 minutes)

What the Instructor Prepares:

- The completed flyer from Demonstration 1
- A simulated client revision request

What the Instructor Says and Does: "The client responds: 'I like the flyer but can you make the headline bigger and change the image?'"

1. "I listen carefully and take notes."
2. "I ask a clarifying question: 'How much bigger would you like the headline?'"
3. "The client says: 'About 20% bigger.'"
4. "I make the changes â€" increase the headline size and replace the image."
5. "I present the revised design and explain what changed."
6. "The client approves. I export the final version and deliver."

What Learners Should Observe: The instructor handling a revision request professionally.

H. GUIDED PRACTICAL EXERCISE (20 minutes)

Exercise: "From Brief to Design"

Practical Objective: The learner will work from a design brief to create a complete design.

Starting Materials:

- A printed design brief (provided by instructor)
- Canva open on each machine

Instructions:

1. "Read the design brief carefully."
2. "Answer these questions:
    - What is the purpose?
    - Who is the target audience?
    - What information must be included?
    - What is the format?

- What are the brand colours?"

3. "Sketch a rough layout on paper."
4. "Create the design in Canva, applying all the principles you have learned."
5. "Review the design against the brief."
6. "Make any necessary revisions."
7. "Export in the correct format."
8. "Save in Canva with a descriptive name."

Design Brief: "Design a flyer for a fictional tech startup's product launch. Target audience: young professionals aged 25â€“40. Must include: product name ('TaskMaster App'), tagline ('Get Things Done'), date and time of launch, venue, website, call to action ('Register Now'). Format: A4 print. Brand colours: dark blue and white. Tone: modern, professional, innovative."

Completion Checklist:

- ☐ Brief read and understood
- ☐ Questions answered
- ☐ Layout sketched
- ☐ Design created in Canva
- ☐ Design reviewed against brief
- ☐ Revisions made
- ☐ Exported in correct format
- ☐ Saved in Canva

I. INDEPENDENT CLASS EXERCISE (10 minutes)

Exercise: "Revision Challenge"

Scenario: "Your client has requested changes to your design. Handle the revision professionally."

Task:

1. Take the design you created in the guided exercise.
2. Make the following revisions:
   - Change the headline to be 20% larger
   - Replace the image with a different one
   - Change the background colour to light grey
   - Add a QR code placeholder (a black square with 'QR CODE' text)
3. Export the revised design.
4. Save as 'TaskMaster Flyer v2.'

Time Allowance: 10 minutes

Success Criteria:

- All four revisions made correctly
- Design still looks professional
- Exported and saved correctly

J. REAL-WORLD CASE STUDY (5 minutes)

Case: "The Client Who Knew What They Wanted"

Situation: A designer is hired to create a logo for a new business. The client has a clear vision â€” they want a simple, modern logo in blue and white. The designer creates a complex, colourful logo because they think it looks better. The client is disappointed and asks for a revision.

The Problem: The designer ignored the client's brief and imposed their own preferences.

Relevant Concept: Working from a brief. The designer should have followed the client's requirements, not their own preferences.

Worked Solution: The designer learns to:

1. Listen to the client's requirements.
2. Create a design that meets the brief.
3. Present the design and explain how it meets the requirements.
4. Handle feedback professionally.
5. The client is satisfied and hires the designer for future work.

Transfer Exercise: "A client asks for a simple design but you think a complex design would look better. What do you do?"

K. COMMON MISTAKES AND TROUBLESHOOTING (5 minutes)

Mistake 1: Not Reading the Brief Carefully

Symptoms: The designer creates something that does not meet the brief. **Fix:** Read the brief carefully and check your design against it before presenting.

Mistake 2: Taking Feedback Personally

Symptoms: The designer gets defensive when receiving feedback. **Fix:** Remember â€" feedback is about the work, not you.

Mistake 3: Not Saving Versions

Symptoms: The designer overwrites previous versions and cannot go back. **Fix:** Save each version with a version number (v1, v2, v3).

Mistake 4: Delivering Disorganised Files

Symptoms: The client receives files with random names in random folders. **Fix:** Use a clear file naming convention and organise files in folders.

Mistake 5: Not Charging for Revisions

Symptoms: The designer does unlimited free revisions. **Fix:** Include 2â€"3 revision rounds in your price. Charge for additional rounds.

L. SESSION ASSIGNMENT (5 minutes)

Assignment Title: "My Design Brief and Flyer"

Create a design from a professional brief.

Requirements:

- Use the provided design brief
- Create a complete design in Canva
- Apply all design principles
- Export in the correct format
- Write a one-paragraph explanation of your design decisions

Marking Rubric:

Criterion	Excellent (5)	Good (3)	Needs Improvement (1)
Brief adherence	All requirements met	Most met	Several missing

Criterion	Excellent (5)	Good (3)	Needs Improvement (1)
Design principles	All applied correctly	Most applied	Few applied
Professional quality	Excellent	Good	Needs improvement
Explanation	Clear, specific	Mostly clear	Vague
File saved correctly	Correct format and name	Mostly correct	Incorrect

Total: 25 marks

M. KNOWLEDGE CHECK (5 minutes)

1. What are the six key questions to ask a client? Answer: Purpose, audience, information, format, timeline, budget.

2. What are the six steps of the design process? Answer: Research, plan, create, review, revise, deliver.

3. How many revision rounds should you include in your price? Answer: 2â€“3 rounds.

4. What should you deliver to a client? Answer: Final exported files, source files (if requested), and a README file (optional).

5. What is the most important rule when working from a brief? Answer: Check your design against the brief before presenting.

N. REFLECTION AND RECAP (5 minutes)

Today you learned the professional design workflow â€” from understanding client requirements to delivering final files. In the next session, you will put this into practice with a simulated client project.

O. INSTRUCTOR EVALUATION NOTES

Observable Signs of Competence

- The learner works from a brief effectively.
- The learner manages revisions professionally.
- The learner organises files correctly.
- The learner delivers work in the correct format.

Common Misconceptions

- **"The designer knows best."** Teach: the client's requirements come first.
- **"Revisions are free and unlimited."** Teach: limit revisions and charge for extras.
- **"File organisation does not matter."** Teach: professional organisation builds trust.

Differentiation Guidance

- Level 1: Provide a detailed brief and guide them through each step.
- Level 2: Complete the exercise as written.
- Level 3: Create their own brief and design from it.

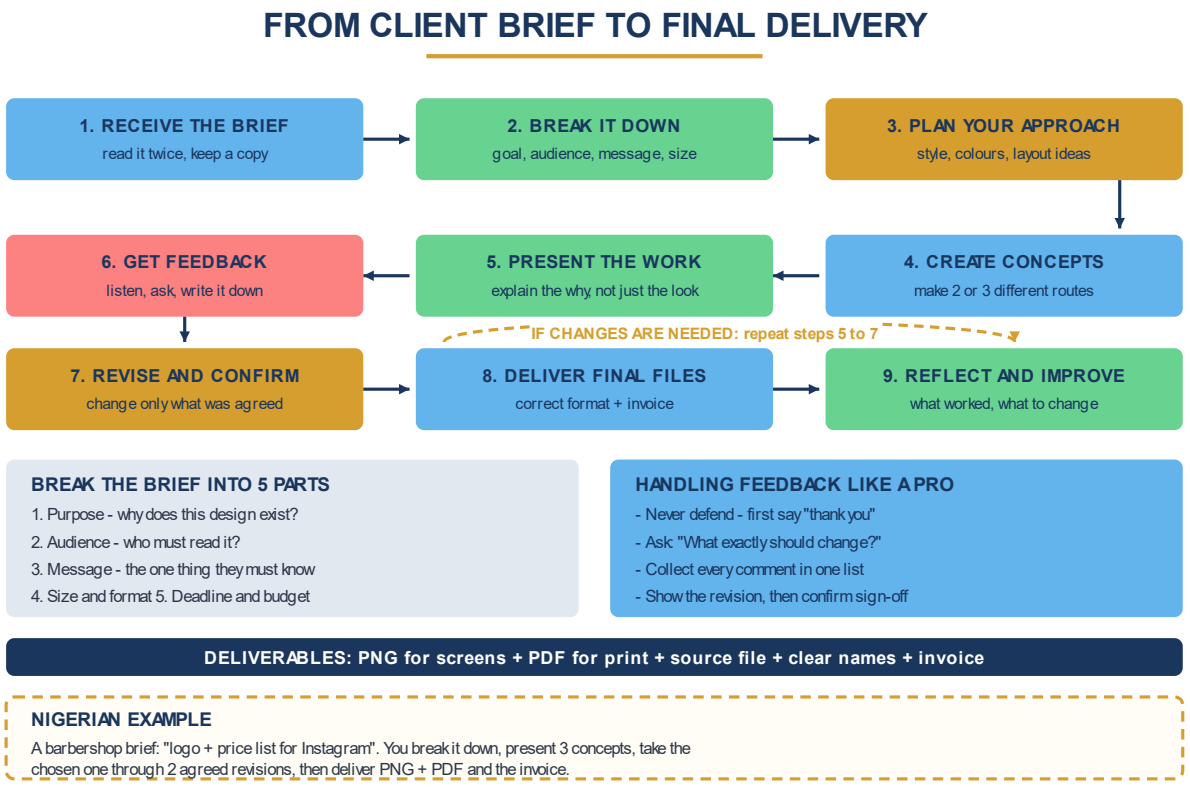

End of Session 10

Next Session: Session 11 â€“ Client Simulation

SESSION 11 OF 12

Client Simulation

CONCEPT DIAGRAM — SESSION 11

SESSION 11: CLIENT SIMULATION

Week: 4 **Module:** Professional Workflow **Duration:** 105 minutes **Difficulty:** Beginner **Prerequisite Knowledge:** Sessions 1â€"10 â€" All prior knowledge **Connection to Previous Session:** Builds on Session 10 by simulating a real client project **Preparation Required Before Class:**

- Prepare simulated client briefs (one per learner or per group)
- Prepare feedback scripts for the instructor to play the "client"
- Prepare assessment rubrics

A. SESSION IDENTIFICATION

Field	Detail
Session Number	11
Title	Client Simulation
Week	4
Module	Professional Workflow

Field	Detail
Duration	105 minutes
Difficulty	Beginner
Prerequisite Knowledge	Sessions 1â€"10 â€" All prior knowledge
Connection to Previous Session	Simulates a real client project
Preparation	Client briefs, feedback scripts, rubrics

B. LEARNING OUTCOMES

By the end of this session, the learner will be able to:

1. **Receive and interpret a client brief** professionally.
2. **Plan a design approach** based on the brief.
3. **Create initial concepts** that meet the brief requirements.
4. **Present work to a "client"** (instructor) and receive feedback.
5. **Handle feedback professionally** and make revisions.
6. **Deliver final files** in the correct format.
7. **Reflect on the process** and identify lessons learned.

C. REQUIRED MATERIALS

Hardware:

- One desktop computer per learner
- Projector for presentations

Software:

- Canva (free tier)
- Web browser

Accounts:

- Each learner's Canva account

Internet:

- Academy Wi-Fi (required)

Printed Materials:

- Simulated client brief (one per learner)
- "Client Communication Guide" (one per learner)

D. OPENING ACTIVITY (5 minutes)

"The Simulation Begins"

Instructor Script: "Good morning, everyone. Today is different. Today, you are not students â€" you are professional designers. I am your client. I have a design project for you, and I expect professional work.

You will receive a brief, create a design, present it to me, receive feedback, make revisions and deliver the final work. This is exactly how real design projects work. Let us begin."

E. PREREQUISITE REVIEW (5 minutes)

Review Questions and Expected Answers:

1. "What are the six steps of the design process?"
    - Research, plan, create, review, revise, deliver.
2. "What are the six key questions to ask a client?"
    - Purpose, audience, information, format, timeline, budget.
3. "How many revision rounds should you include?"
    - 2â€“3 rounds.
4. "What is the most important rule when receiving feedback?"
    - Listen carefully and do not get defensive.
5. "What should you deliver to a client?"
    - Final exported files, source files (if requested), and a README file (optional).

F. FULL LECTURE NOTES (10 minutes)

The Simulation Explained

Instructor Script: "Here is how the simulation works:

Phase 1: Receive the Brief (5 minutes) I will give you a design brief. Read it carefully. Ask me any clarifying questions.

Phase 2: Create the Design (30 minutes) Create a design that meets the brief. Apply all the principles you have learned. Save multiple versions as you work.

Phase 3: Present to the Client (10 minutes) Present your design to me. Explain your decisions. I will give you feedback.

Phase 4: Revise (15 minutes) Make the changes I requested. Present the revised design.

Phase 5: Deliver (5 minutes) Export the final files and deliver them to me.

Phase 6: Reflect (5 minutes) Write a short reflection on what you learned from the process."

G. INSTRUCTOR DEMONSTRATION (0 minutes)

There is no instructor demonstration in this session.

The instructor plays the role of the client. The learners play the role of designers.

H. GUIDED PRACTICAL EXERCISE (0 minutes)

There is no guided practical in this session.

The learner completes the simulation independently.

I. INDEPENDENT CLASS EXERCISE (70 minutes)

Exercise: "Client Simulation"

Scenario: "You are a professional designer. You have received a brief from a new client. Complete the project from brief to delivery."

Simulated Client Brief: "I am opening a new restaurant in Port Harcourt called 'Taste of Lagos.' I need a flyer to promote my grand opening. Here are the details:

- **Event:** Grand Opening Celebration
- **Date:** Saturday, 15th November 2026
- **Time:** 10am â€“ 10pm
- **Venue:** 123 Aba Road, Port Harcourt
- **Special Offer:** 20% off all meals on opening day
- **Contact:** 0801 234 5678, tasteoflagos.ng
- **Target Audience:** Local residents, food lovers, families
- **Tone:** Warm, inviting, celebratory
- **Format:** A4 flyer (print)
- **Brand Colours:** Red and gold
- **Deadline:** Today

Please create a flyer that captures the excitement of the grand opening and makes people want to come. I look forward to seeing your work."

Task: Complete the following phases:

Phase 1: Receive the Brief (5 minutes)

- Read the brief carefully.
- Ask the "client" (instructor) any clarifying questions.

Phase 2: Create the Design (30 minutes)

- Research similar restaurant flyers for inspiration.
- Sketch a rough layout.
- Create the design in Canva.
- Apply all design principles.
- Save multiple versions.

Phase 3: Present to the Client (10 minutes)

- Present your design to the instructor.
- Explain your decisions.
- Receive feedback.

Phase 4: Revise (15 minutes)

- Make the changes requested by the "client."
- Present the revised design.

Phase 5: Deliver (5 minutes)

- Export as PDF Print.
- Save in Canva with a descriptive name.

Phase 6: Reflect (5 minutes)

- Write a short reflection on what you learned.

Requirements:

- Complete all six phases.
- Apply all design principles.
- Handle feedback professionally.
- Deliver in the correct format.

Time Allowance: 70 minutes

Success Criteria:

- Design meets all brief requirements.
- All design principles applied.

- Feedback handled professionally.
- Final files delivered correctly.

Complete Answer Key for the Instructor:

There is no single correct answer. The instructor evaluates based on:

- Does the design meet the brief?
- Are the design principles applied correctly?
- Did the learner handle feedback professionally?
- Are the final files in the correct format?

J. REAL-WORLD CASE STUDY (5 minutes)

Case: "The First Client"

Situation: Adaeze has just completed the Graphic Design course. A friend asks her to design a flyer for a small event. Adaeze is nervous â€" this is her first real client. She remembers the simulation from the course and follows the same process.

The Problem: Adaeze is nervous because she has never worked with a real client before.

Relevant Concept: The professional workflow. Because Adaeze practised the workflow in the simulation, she knows exactly what to do.

Worked Solution: Adaeze:

1. Asks her friend the six key questions.
2. Creates a design based on the brief.
3. Presents the design and explains her decisions.
4. Receives feedback and makes revisions.
5. Delivers the final files.
6. Her friend is thrilled and recommends Adaeze to others.

Transfer Exercise: "You have just finished the course and someone asks you to design a flyer. What is the first thing you do?"

K. COMMON MISTAKES AND TROUBLESHOOTING (5 minutes)

Mistake 1: Not Asking Clarifying Questions

Symptoms: The designer starts work without fully understanding the brief. **Fix:** Always ask clarifying questions before starting.

Mistake 2: Presenting Without Explanation

Symptoms: The designer shows the design without explaining their decisions. **Fix:** Always explain your decisions â€" the client needs to understand your reasoning.

Mistake 3: Arguing with Feedback

Symptoms: The designer disagrees with the client's feedback. **Fix:** Listen, ask questions, evaluate, then respond professionally.

Mistake 4: Not Saving Versions

Symptoms: The designer overwrites previous versions. **Fix:** Save each version with a version number.

Mistake 5: Missing the Deadline

Symptoms: The designer does not deliver on time. **Fix:** Plan your time carefully and communicate if you need more time.

L. SESSION ASSIGNMENT (5 minutes)

Assignment Title: "My Client Simulation Reflection"

Write a reflection on the client simulation experience.

Requirements:

- What went well?
- What was challenging?
- What would you do differently next time?
- What did you learn about working with clients?

Marking Rubric:

Criterion	Excellent (5)	Good (3)	Needs Improvement (1)
Self-awareness	Insightful, honest	Mostly honest	Superficial
Lessons learned	Specific, actionable	Mostly specific	Vague
Professional growth	Clear evidence of growth	Some evidence	No evidence
Writing quality	Clear, well-organised	Mostly clear	Unclear

Total: 20 marks

M. KNOWLEDGE CHECK (5 minutes)

1. What is the first thing you should do when you receive a client brief? Answer: Read it carefully and ask clarifying questions.

2. What should you do before presenting a design to a client? Answer: Review the design against the brief and check that all requirements are met.

3. How should you respond when a client gives you feedback you disagree with? Answer: Listen carefully, ask clarifying questions, evaluate the feedback, then respond professionally.

4. What should you deliver to a client at the end of a project? Answer: Final exported files, source files (if requested), and a README file (optional).

5. What is the most important skill in client work? Answer: Communication â€" listening, asking questions and explaining decisions.

N. REFLECTION AND RECAP (5 minutes)

Today you experienced a simulated client project from brief to delivery. In the next session â€" the final session â€" you will create your capstone project: a complete mini brand package.

O. INSTRUCTOR EVALUATION NOTES

Observable Signs of Competence

- The learner interprets the brief correctly.
- The learner creates a design that meets the brief.
- The learner presents confidently and explains decisions.
- The learner handles feedback professionally.

- The learner delivers final files correctly.

Common Misconceptions

- **"The client is always right."** Teach: the client knows their business, but you are the design expert. Sometimes you need to respectfully push back.
- **"Feedback means failure."** Teach: feedback is a normal part of the process.
- **"Speed is more important than quality."** Teach: deliver on time, but never sacrifice quality.

Differentiation Guidance

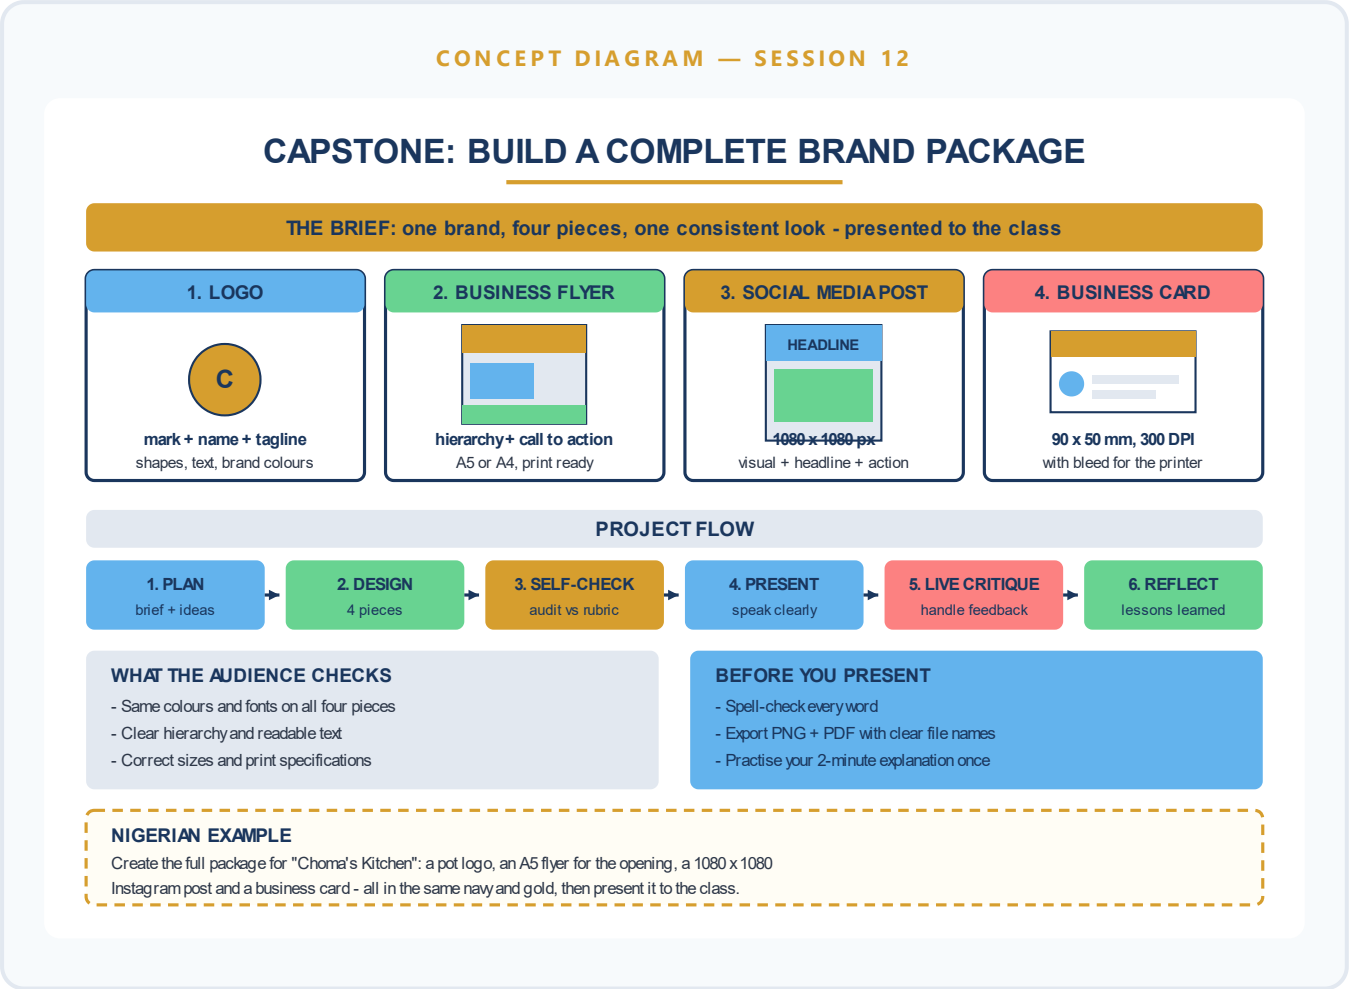

- Level 1: Provide additional guidance during each phase.
- Level 2: Complete the simulation as written.
- Level 3: Act as the "client" for another learner.

End of Session 11

Next Session: Session 12 â€" Final Project: Mini Brand Package (Capstone)

SESSION 12 OF 12

Final Project Capstone

SESSION 12: FINAL PROJECT â€" MINI BRAND PACKAGE (CAPSTONE)

Week: 4 **Module:** Professional Workflow **Duration:** 105 minutes **Difficulty:** Beginner (tests all accumulated skills) **Prerequisite Knowledge:** Sessions 1â€"11 â€" All prior knowledge **Connection to Previous Session:** Integrates and tests everything taught in Sessions 1â€"11 **Preparation Required Before Class:**

- Print capstone briefs (one per learner)
- Prepare assessment rubrics
- Ensure Canva is functional on all machines
- Prepare certificate sign-off sheets

A. SESSION IDENTIFICATION

Field	Detail
Session Number	12
Title	Final Project â€" Mini Brand Package (Capstone)
Week	4

Field	Detail
Module	Professional Workflow
Duration	105 minutes
Difficulty	Beginner (tests all accumulated skills)
Prerequisite Knowledge	Sessions 1â€"11 â€" All prior knowledge
Connection to Previous Session	Integrates and tests everything taught in Sessions 1â€"11
Preparation	Capstone briefs, rubrics, certificate sign-off sheets

B. LEARNING OUTCOMES

By the end of this session, the learner will be able to:

1. **Plan and organise** a multi-part design project from a brief.
2. **Design a simple logo** using shapes, text and brand colours.
3. **Design a business flyer** with clear hierarchy and call to action.
4. **Design a social media post** for Instagram or Facebook.
5. **Design a business card** with essential information.
6. **Present the brand package** to the class with confidence.
7. **Handle live critique** professionally.
8. **Reflect on their learning** across the entire course.

C. REQUIRED MATERIALS

Hardware:

- One desktop computer per learner
- Projector for presentations

Software:

- Canva (free tier)
- Web browser

Accounts:

- Each learner's Canva account

Internet:

- Academy Wi-Fi (required)

Printed Materials:

- Capstone brief (one per learner)
- Assessment rubric (one per learner)
- Certificate sign-off sheet (one per learner)

D. OPENING ACTIVITY (5 minutes)

"You Are Ready"

Instructor Script: "Good morning, everyone. This is it â€" the final session. Over the past four weeks, you have learned design principles, Canva skills, real-world design and professional workflow. Today, you are going to prove that you can create a complete brand package.

I am not going to help you. I am not going to give you step-by-step instructions. I am going to give you a project brief, and you are going to complete it on your own. This is not a test of perfection. It is a test of competence.

If you have attended the previous sessions and practised, you are ready. Let us begin."

E. PREREQUISITE REVIEW (5 minutes)

Instructor Script: "Before we start, let us do a quick review of everything you have learned."

Review Questions and Expected Answers:

1. "What are the six core design principles?"
   - Hierarchy, contrast, alignment, balance, white space, purpose/audience.
2. "What is the 60-30-10 rule?"
   - 60% dominant colour, 30% secondary colour, 10% accent colour.
3. "What are the four font categories?"
   - Serif, sans-serif, script, display.
4. "How do you export for print?"
   - PDF Print at 300 DPI.
5. "What are the six steps of the design process?"
   - Research, plan, create, review, revise, deliver.
6. "What should a portfolio contain?"
   - Your best 5â€"10 pieces with descriptions.
7. "What is the most important rule when receiving feedback?"
   - Listen carefully and do not get defensive.

F. FULL LECTURE NOTES (10 minutes)

The Capstone Project Explained

Instructor Script: "Here is what you are going to do today. I will give you the full project brief, and then you will complete it on your own.

The Project: You are a designer hired to create a mini brand package for a new business. You must create:

1. **A simple logo** â€" created in Canva using shapes, text and brand colours.
2. **A business flyer** â€" promoting the business, with clear hierarchy and call to action.
3. **A social media post** â€" Instagram or Facebook format, on-brand.
4. **A business card** â€" standard size, with essential contact information.

All four designs must be related to the same business and use the same brand colours and fonts.

After you have created all four designs, you will present your brand package to the class. This is your moment to show what you have learned.

Any questions?"

G. INSTRUCTOR DEMONSTRATION (0 minutes)

There is no instructor demonstration in this session.

H. GUIDED PRACTICAL EXERCISE (0 minutes)

There is no guided practical in this session.

I. INDEPENDENT CLASS EXERCISE (60 minutes)

Exercise: "Mini Brand Package"

Scenario: "You are a designer hired to create a mini brand package for a new business. Create all four deliverables as a unified package."

Task: Complete the following project without assistance:

Step 1: Choose Your Business (2 minutes) Choose a type of business. Examples:

- A fashion boutique
- A restaurant
- A tech startup
- A salon
- A provision shop
- A church media team
- Or any other business you like

Step 2: Design a Simple Logo (10 minutes)

1. Create a new design in Canva with dimensions 500 x 500 pixels.
2. Choose 2â€“3 brand colours.
3. Add a shape that represents the business.
4. Add the business name or initials.
5. Use a clean, bold font.
6. Group all elements.
7. Save as 'My Logo.'

Step 3: Design a Business Flyer (20 minutes)

1. Create a new design with A4 dimensions (2480 x 3508 pixels).
2. Set the background to one of your brand colours.
3. Add the business name in large, bold text.
4. Add a tagline or offer.
5. Add an image that represents the business.
6. Add key information â€” what, where, when.
7. Add a call to action.
8. Add contact information.
9. Apply your brand colours and fonts.
10. Download as PDF Print.
11. Save as 'My Flyer.'

Step 4: Design a Social Media Post (15 minutes)

1. Create a new design with Instagram dimensions (1080 x 1080 pixels).
2. Use the same brand colours and fonts.
3. Add one image.
4. Add one headline.

5. Add one call to action.
6. Download as PNG.
7. Save as 'My Social Post.'

Step 5: Design a Business Card (10 minutes)

1. Create a new design with business card dimensions (1050 x 600 pixels).
2. Add the business name.
3. Add your name and title.
4. Add the logo.
5. Add essential contact information.
6. Apply your brand colours and fonts.
7. Download as PDF Print.
8. Save as 'My Business Card.'

Step 6: Save All Documents (3 minutes) Save all four designs in Canva in a folder called 'CEA Final Project â€" [Your Name].'

Requirements:

- Complete all 6 steps independently.
- All four designs must use the same brand colours and fonts.
- The flyer and business card must be exported as PDF Print.
- The social media post must be exported as PNG.
- The logo must be exported as PNG.

Time Allowance: 60 minutes

Success Criteria:

- All four designs created to a satisfactory standard.
- All designs use consistent brand colours and fonts.
- All files exported in the correct format.
- All files saved in Canva.

J. REAL-WORLD CASE STUDY (5 minutes)

Case: "Emmanuel's First Client"

Situation: Emmanuel completed the Graphic Design course at CEA. He passed the capstone assessment. Two weeks later, a friend asks him to create a brand package for a new business. Emmanuel sits down at the computer and creates a logo, flyer, social media post and business card â€" all in one afternoon. His friend is thrilled.

The Problem: Emmanuel's friend needed a complete brand package quickly and could not afford a professional designer.

Relevant Concept: All the skills taught in Sessions 1â€"11. Emmanuel's success is the result of four weeks of focused, practical learning.

Worked Solution: Emmanuel succeeded because he had practised every step of the process multiple times. He had created logos, flyers, social media posts and business cards. By the time he did it for a real client, it was second nature.

Transfer Exercise: "Think about a business that needs a brand package. Write down the steps you would take to create it."

K. COMMON MISTAKES AND TROUBLESHOOTING (5 minutes)

Mistake 1: Choosing a Business That Is Too Complex

Symptoms: The learner chooses a business that is too complex and cannot complete the project in time. **Fix:** Encourage the learner to choose a simple business.

Mistake 2: Not Managing Time

Symptoms: The learner spends too much time on one design and does not have time for the others. **Fix:** Teach the learner to allocate time for each design.

Mistake 3: Inconsistent Branding

Symptoms: The four designs use different colours and fonts. **Fix:** Remind the learner to use the same brand colours and fonts across all designs.

Mistake 4: Not Exporting in the Correct Format

Symptoms: The learner exports everything as PNG instead of PDF Print for print materials. **Fix:** Remind the learner to export print materials as PDF Print and digital materials as PNG.

Mistake 5: Not Saving Designs

Symptoms: The learner creates designs but does not save them in Canva. **Fix:** Remind the learner to save all designs in Canva with descriptive names.

L. SESSION ASSIGNMENT (5 minutes)

Assignment Title: "My Learning Reflection"

Write a reflection on your learning across the entire Graphic Design course.

Requirements:

- Three things you learned
- Two things you found challenging
- One thing you want to learn next
- How you feel now compared to how you felt in Session 1

Marking Rubric:

Criterion	Excellent (5)	Good (3)	Needs Improvement (1)
Three things learned	Specific, accurate	Mostly specific	Vague
Two challenges	Specific, honest	Mostly specific	Vague
One next step	Clear, specific	Present but vague	Missing
Feeling comparison	Insightful, honest	Present but generic	Missing
File saved correctly	Saved on Desktop	Saved but wrong location	Not saved

Total: 25 marks

M. KNOWLEDGE CHECK (15 minutes)

Quiz

Section A: Design Principles (5 questions)

1. What are the six core design principles?
2. What is the 60-30-10 rule?
3. What is the rule of thirds?
4. Why is white space important?
5. What is the difference between a serif and a sans-serif font?

Section B: Canva Skills (5 questions)

6. How do you create a custom-sized design in Canva?
7. How do you group elements in Canva?
8. How do you set up a brand kit in Canva?
9. How do you resize a design in Canva?
10. What is the difference between PNG and PDF Print?

Section C: Real-World Design (5 questions)

11. What are the five key elements of a business flyer?
12. What is the standard size of a business card?
13. What are the four types of logos?
14. What should a portfolio contain?
15. What are the six steps of the design process?

Section D: Professional Workflow (5 questions)

16. What are the six key questions to ask a client?
17. How many revision rounds should you include in your price?
18. What should you deliver to a client at the end of a project?
19. What is the most important rule when receiving feedback?
20. What is the most important skill in client work?

Answer Key

Section A:

1. Hierarchy, contrast, alignment, balance, white space, purpose/audience.
2. 60% dominant colour, 30% secondary colour, 10% accent colour.
3. Dividing an image into nine equal parts and placing key elements along the lines.
4. It gives the viewer's eye a place to rest and makes the design easier to read.
5. Serif fonts have small lines at the ends of letters. Sans-serif fonts do not.

Section B: 6. Click 'Create a design,' then 'Custom size,' and enter the dimensions. 7. Select multiple elements, right-click, and choose 'Group' (or press Ctrl+G). 8. Click 'Brand Kit' in the left sidebar, add brand colours and fonts. 9. Click 'Resize' in the top bar, enter new dimensions, and click 'Resize.' 10. PNG is for digital use (screens). PDF Print is for print (paper).

Section C: 11. Business name, tagline/offer, key information, call to action, contact information. 12. 3.5 x 2 inches (1050 x 600 pixels at 300 DPI). 13. Wordmark, lettermark, icon/symbol, combination. 14. Your best 5â€"10 pieces with descriptions. 15. Research, plan, create, review, revise, deliver.

Section D: 16. Purpose, audience, information, format, timeline, budget. 17. 2â€"3 rounds. 18. Final exported files, source files (if requested), and a README file (optional). 19. Listen carefully and do not get defensive. 20. Communication â€" listening, asking questions and explaining decisions.

N. REFLECTION AND RECAP (5 minutes)

Plain-English Summary

Today you demonstrated that you can create a complete brand package â€" a logo, flyer, social media post and business card â€" all using consistent branding and professional design principles. You have completed the Graphic Design course. You should be proud of yourself.

Five Important Takeaways from the Entire Course

1. Design is about communication, not just decoration.
2. The six core principles â€" hierarchy, contrast, alignment, balance, white space, purpose/audience â€" apply to every design.
3. Canva is a powerful free tool, but the tool is not the skill â€" the thinking is the skill.

4. Brand consistency builds recognition and trust.
5. Professional workflow â€" brief, research, create, review, revise, deliver â€" is what separates professionals from hobbyists.

Questions That Help You Recognise What You Can Now Do

- Can you analyse a design using correct vocabulary?
- Can you create professional designs in Canva?
- Can you maintain brand consistency across multiple formats?
- Can you work from a design brief?
- Can you present your work and handle feedback professionally?
- Can you create a complete brand package?

What Comes Next

You have completed the Graphic Design course. You are now ready for the next level. At Cyber Elias Academy, you can continue with:

- **Content Creation** â€" Learn to create photos, videos and written content.
- **Digital Marketing** â€" Learn to promote businesses online.
- **Web Design** â€" Learn to build websites.
- **Business & Freelancing** â€" Learn to price and deliver freelance work.

The skills you learned today are the foundation for all of these courses. You are ready.

O. INSTRUCTOR EVALUATION NOTES

Observable Signs of Competence

- The learner creates a simple, clean logo.
- The learner creates a professional flyer with clear hierarchy.
- The learner creates a social media post with one message and one call to action.
- The learner creates a business card with all essential information.
- The learner maintains brand consistency across all four designs.
- The learner presents the package with confidence.
- The learner handles critique professionally.

Common Misconceptions

- **"I can just learn this on my own."** Some learners think they do not need a course. They may be right â€" some people can figure things out on their own. But most people benefit from structured, guided learning.
- **"I will never need to design anything."** Some learners think they will avoid design in their daily life. In 2026, this is almost impossible. Every business, church, school and event needs design.
- **"I am not creative enough."** Some learners think design requires natural creativity. In reality, design is a skill that can be learned through principles and practice.

Suggested Remedial Exercises

- For learners who do not pass the capstone: Allow them to practise on academy machines during opening hours. Provide a step-by-step guide they can follow. Let them retake the assessment when they are ready.
- For learners who cannot create a logo: Provide simple logo templates and guide them through customisation.
- For learners who cannot manage time: Provide a time allocation guide and check in with them during the project.

Differentiation Guidance

Level 1 â€" Supported (for learners who struggle):

- Allow extra time for the capstone project.

- Provide templates and examples for reference.
- Offer one-on-one support during the project.
- Allow them to retake the assessment after additional practice.

Level 2 â€" Independent (standard):

- Complete the capstone project as written.
- Answer all knowledge check questions.
- Complete the reflection assignment.

Level 3 â€" Challenge (for learners who finish early):

- Ask the learner to create additional brand materials (e.g., a letterhead, email signature, social media banner).
- Ask the learner to research and write down three more design principles.
- Ask the learner to help a struggling peer.

CERTIFICATE SIGN-OFF

Learner Name: _____

Date: _____

Capstone Project Result: Pass / Not Yet Competent

Knowledge Check Score: _____ / 100

Deliverables Completed:

- ☐ Simple logo (PNG)
- ☐ Business flyer (PDF Print)
- ☐ Social media post (PNG)
- ☐ Business card (PDF Print)
- ☐ Presentation to the class

Instructor Signature: _____

Certificate Awarded: Yes / No

Comments:

End of Session 12 â€" End of Course

Congratulations! You have completed the Graphic Design course at Cyber Elias Academy.

Next Step: Continue your learning with Content Creation, Digital Marketing, or another CEA course.
