Microsoft Office — Course Summary

A quick reference of what is covered and what you will learn in each session.

QUICK NAVIGATION

Session 01 — Word Fundamentals

Session 02 — Document Formatting

Session 03 — Professional Documents

Session 04 — Excel Fundamentals

Session 05 — Formulas Functions

Session 06 — Data Management

Session 07 — PowerPoint Fundamentals

Session 08 — Professional Presentations

Session 09 — Final Project Capstone

SESSION 01

Word Fundamentals

WHAT YOU WILL LEARN

- ✓ **Explain what Microsoft Word is** — and what it is used for.
- ✓ **Open Microsoft Word** — from the Start menu or desktop shortcut.
- ✓ **Identify the main parts of the Word interface:** — the Ribbon, tabs, document area, status bar, and Quick Access Toolbar.
- ✓ **Type and edit text** — in a Word document, including inserting, deleting, and replacing text.
- ✓ **Select text** — using the mouse (click and drag) and keyboard (Shift + arrow keys).
- ✓ **Cut, copy, and paste** — text using right-click menu and keyboard shortcuts.
- ✓ **Save a document** — to a specific location with a descriptive file name.
- ✓ **Open a saved document** — from the File menu or recent documents list.
- ✓ **Export a document to PDF** — using the Save As or Export function.
- ✓ **Explain why** — saving work regularly and using descriptive file names matters.

SESSION 02

Document Formatting

WHAT YOU WILL LEARN

- ✓ **Change fonts and font sizes** — to create a professional appearance.
- ✓ **Apply bold, italic and underline** — to emphasise text.
- ✓ **Change text colour and highlighting** — for visual impact.
- ✓ **Set text alignment** — (left, centre, right, justify) appropriately.
- ✓ **Adjust line spacing and paragraph spacing** — for readability.
- ✓ **Create bulleted and numbered lists** — for organised information.
- ✓ **Use the Format Painter** — to copy formatting from one section to another.
- ✓ **Explain why** — consistent formatting matters in professional documents.
- ✓ **Apply the "less is more" principle** — using formatting sparingly and purposefully.

SESSION 03

Professional Documents

WHAT YOU WILL LEARN

- ✓ **Set page size and orientation** — (portrait vs landscape) appropriately.
- ✓ **Adjust margins** — to control the amount of white space around the text.
- ✓ **Insert and edit headers and footers** — with page numbers, dates and document titles.
- ✓ **Insert and format tables** — for organised information.
- ✓ **Insert page breaks** — to control where new pages begin.
- ✓ **Print a document** — with the correct settings.
- ✓ **Export a document to PDF** — for professional sharing.
- ✓ **Explain why** — page layout matters in professional documents.

SESSION 04

Excel Fundamentals

WHAT YOU WILL LEARN

- ✓ **Explain what Microsoft Excel is** — and what it is used for.
- ✓ **Open Microsoft Excel** — from the Start menu.
- ✓ **Identify the main parts of the Excel interface:** — the Ribbon, worksheet tabs, formula bar, column headers, row headers, and cells.
- ✓ **Navigate between cells** — using the mouse and keyboard (arrow keys, Tab, Enter).
- ✓ **Enter and edit data** — in cells (text, numbers, dates).
- ✓ **Understand cell references** — (e.g., A1, B2, C3).
- ✓ **Save and open workbooks.** — 8. **Apply basic cell formatting:** bold, borders, fill colour, number format.
- ✓ **Explain why** — Excel is different from Word and when to use each.

SESSION 05

Formulas Functions

WHAT YOU WILL LEARN

- ✓ **Explain what a formula is** — and how it differs from manually typed values.
- ✓ **Create basic formulas** — using the equals sign (=) and cell references.
- ✓ **Use the SUM function** — to add a range of cells.
- ✓ **Use the AVERAGE function** — to calculate the mean of a range of cells.
- ✓ **Use the COUNT, MIN and MAX functions** — for basic data analysis.
- ✓ **Use AutoSum** — to quickly calculate totals.
- ✓ **Understand relative vs absolute cell references** — and when to use each.
- ✓ **Identify and fix common formula errors** — (#REF!, #DIV/0!, #VALUE!).
- ✓ **Apply number formatting** — (currency, percentage, decimals) to formula results.
- ✓ **Explain why** — formulas are more efficient than manual calculations.

SESSION 06

Data Management

WHAT YOU WILL LEARN

- ✓ **Sort data** — alphabetically, numerically and by custom criteria.
- ✓ **Filter data** — to show only specific records.
- ✓ **Apply conditional formatting** — to highlight important data.
- ✓ **Create simple charts** — (bar, pie, line) from data.
- ✓ **Format charts** — with titles, labels and colours.
- ✓ **Explain why** — data management tools are essential for analysis.
- ✓ **Choose the right chart type** — for different data.

SESSION 07

PowerPoint Fundamentals

WHAT YOU WILL LEARN

- ✓ **Explain what Microsoft PowerPoint is** — and what it is used for.
- ✓ **Open Microsoft PowerPoint** — from the Start menu.
- ✓ **Identify the main parts of the PowerPoint interface:** — the Ribbon, slides pane, slide area, notes pane, and status bar.
- ✓ **Create a new presentation** — from a blank slide or a template.
- ✓ **Add, delete and rearrange slides.** — 6. **Apply slide layouts** (Title Slide, Title and Content, Two Content, etc.).
- ✓ **Apply themes and colour schemes** — for a professional appearance.
- ✓ **Save and open presentations.** — 9. **Explain why** PowerPoint is different from Word and Excel and when to use each.

SESSION 08

Professional Presentations

WHAT YOU WILL LEARN

- ✓ **Insert and format images** — in a presentation.
- ✓ **Insert and format shapes and SmartArt** — for visual communication.
- ✓ **Add transitions** — between slides for smooth flow.
- ✓ **Add simple animations** — to text and objects.
- ✓ **Use Presenter View** — to see notes and upcoming slides while presenting.
- ✓ **Deliver a presentation aloud** — with confidence and clarity.
- ✓ **Apply the principles of good presentation design:** — minimal text, strong visuals, clear structure.
- ✓ **Give and receive constructive feedback** — on presentations.

SESSION 09

Final Project Capstone

WHAT YOU WILL LEARN

- ✓ **Plan and organise** — a multi-part project from a brief.
- ✓ **Create a formatted CV or business letter** — in Microsoft Word, exported to PDF.
- ✓ **Create a working spreadsheet** — in Microsoft Excel with live formulas and at least one chart.
- ✓ **Create a 5–7 slide presentation** — in Microsoft PowerPoint.
- ✓ **Present the presentation aloud** — to the class with confidence.
- ✓ **Explain their design and formatting decisions** — for all three deliverables.
- ✓ **Reflect on their learning** — and identify areas for continued growth.
