Online Teaching — Course Summary

A quick reference of what is covered and what you will learn in each session.

QUICK NAVIGATION

Session 01 — Online Teaching Foundations

Session 02 — Designing a Course and Planning a Lesson

Session 03 — Creating Learning Content

Session 04 — Running Live Classes and Engagement

Session 05 — Assessment Feedback and Learner Support

Session 06 — Capstone Design and Deliver a Mini Lesson

SESSION 01

Online Teaching Foundations

Week 1 â€" Module 1: Design and Set Up

WHAT YOU WILL LEARN

- ✓ **Explain** — the four online teaching modes â€" **live**, **recorded**, **cohort** and **one-to-one** â€" in their own words, and give one advantage and one limitation of each.
- ✓ **Name at least four free tools** — (Zoom, Google Meet, Google Classroom, Google Docs/Slides, Google Forms, Canva, OBS, YouTube unlisted) and match each to the teaching job it does, including stating at least one free-tier limit (for example, Zoom's 40-minute group call ceiling).
- ✓ **Select an appropriate mode and platform stack** — for a stated Nigerian teaching need, giving clear reasons for the choice.
- ✓ **Explain what makes online teaching different** — from face-to-face teaching â€" shorter attention, distraction at home, mobile-first learners, screen fatigue, and participation that must be *designed* rather than assumed.
- ✓ **Complete a mode + platform decision card** — for their own course idea, recording the mode, the tools, the reasons, and the known limits.

SESSION 02

Designing a Course and Planning a Lesson

Week 1 â€" Module 1: Design and Set Up

WHAT YOU WILL LEARN

- ✓ **Explain** — what a learning outcome is and is not, and why vague outcomes like "understand sewing" fail.
- ✓ **Write at least five measurable learning outcomes** — for their own course, each starting with an observable action verb (list, identify, demonstrate, build, produce) and containing no "understand," "know about" or "appreciate."
- ✓ **Organise** — their outcomes into modules and lessons and **produce a curriculum map** â€" a table proving that every outcome is taught by at least one lesson and every lesson has a purpose.
- ✓ **Plan one complete timed lesson** — with an opener, input, practice, a check for understanding and an exit task, with timings that suit online reality.
- ✓ **Justify their timings** — and explain **two techniques** for keeping an online session on schedule (a visible agenda, a parking lot for side questions, a technical buffer, or short blocks).

SESSION 03

Creating Learning Content

Week 1 â€" Module 1: Design and Set Up

WHAT YOU WILL LEARN

- ✓ **Design a short slide deck** — (at least three slides) that works on a phone screen â€" one idea per slide, large readable type, high contrast â€" using Canva (free) or Google Slides.
- ✓ **Record a 60â€"90 second clean video lesson** — with clear audio, using OBS or the device's built-in recorder, following a simple script and a quiet, well-lit setup.
- ✓ **Build a worksheet in Google Docs** — that makes the learner *do* something â€" fill in, measure, answer or produce â€" not just read.
- ✓ **Apply accessibility basics** — to their content: captions or a transcript, readable font size, plain language and good contrast.
- ✓ **Apply mobile-friendly, low-data design** — : small file sizes, downloadable alternatives and unlisted hosting.
- ✓ **Classify five copyright scenarios** — correctly (usable / unusable without permission / must be cited) and use only their own, free-to-use or permitted material, with attribution.

SESSION 04

Running Live Classes and Engagement

Week 2 â€" Module 2: Deliver and Grow

WHAT YOU WILL LEARN

- ✓ **Host** — a short live class on Zoom or Google Meet as the host â€" using screen share, chat, and at least two participation tools (poll, hand raise, whiteboard or breakout rooms).
- ✓ **State three online classroom norms** — and manage latecomers and disruption calmly and fairly.
- ✓ **Design an engagement rhythm** — with something asked or done at least every eight minutes â€" a poll, a chat prompt, a show of hands or a breakout pair task.
- ✓ **Diagnose and respond correctly** — to at least three common technical failures using a checklist (sound â†' camera â†' screen share â†' connection) and a written fallback plan.
- ✓ **Deliver a 10-minute micro-teach** — using at least two participation tools, with a clear opening, content, interaction and a closing check for understanding.

SESSION 05

Assessment Feedback and Learner Support

Week 2 â€" Module 2: Deliver and Grow

WHAT YOU WILL LEARN

- ✓ **Build an auto-graded quiz in Google Forms** — with an answer key, matching question types to outcomes.
- ✓ **Set up an assignment in Google Classroom** — and mark it with a **simple rubric** so grading is fair and quick.
- ✓ **Write feedback** — that is specific, kind and ends in a clear next step â€" never just "well done."
- ✓ **Choose an appropriate support step** — for two struggling-learner scenarios, respecting dignity and privacy.
- ✓ **Pass the ethics check** — (at least 70%): state the minimum personal data a course needs, how to store and share it safely, and classify copyright scenarios correctly.

SESSION 06

Capstone Design and Deliver a Mini Lesson

Week 2 â€" Module 2: Deliver and Grow

WHAT YOU WILL LEARN

- ✓ **Assemble a complete one-page mini-course outline** — from their existing artefacts â€" course title, target learner, delivery mode and reasons, five lessons each with a measurable outcome, the free tools used, a schedule, an assessment plan and an ethics note â€" with every outcome taught and checked. *(Design doc LO8, LO2.)*
- ✓ **Produce a 5â€"10 minute mini-lesson** — , recorded or live, that has a clear opening tied to a stated outcome, at least one piece of learning content, a moment of learner interaction or practice, and a closing check for understanding. *(Design doc LO8, LO4, LO5.)*
- ✓ **Choose and justify recorded or live delivery** — for their mini-lesson, applying the free-tool, low-data and time-management lessons from Sessions 1â€"4. *(Design doc LO8, LO1.)*
- ✓ **Present and defend their design choices orally** — , answering at least three viva questions accurately by pointing to concrete evidence from their artefacts. *(Design doc LO8.)*
- ✓ **Verify their outline against the ethics rules** — â€" minimum data, safe storage, consent, minors, and copyright â€" and state what their CEA certificate honestly certifies. *(Design doc LO7, LO8.)*
