Web Design — Course Summary

A quick reference of what is covered and what you will learn in each session.

Quick Navigation

Session 01 — HOW THE WEB WORKS
Session 02 — HTML BASICS
Session 03 — HTML INTERMEDIATE
Session 04 — CSS BASICS
Session 05 — CSS LAYOUT
Session 06 — CSS RESPONSIVE DESIGN
Session 07 — PLANNING A WEBSITE
Session 08 — BUILDING THE STRUCTURE
Session 09 — STYLING THE WEBSITE
Session 10 — INTERACTIVITY AND MEDIA
Session 11 — TESTING AND DEBUGGING
Session 12 — FINAL PROJECT: CAPSTONE (FINALISE AND PRESENT)

SESSION 01

HOW THE WEB WORKS

Week 1 — Module 1: HTML Foundations

WHAT YOU WILL LEARN

- ✓ **Explain in their own words** — what happens, step by step, when a person types a website address (URL) into a browser and presses Enter.
- ✓ **Describe what a web browser is** — and name at least three popular browsers used today.
- ✓ **Describe what a web server is** — and explain, in simple language, how it delivers a webpage to a browser.
- ✓ **Distinguish** — between *local files* (files sitting on your own computer) and *live websites* (files served to anybody on the internet).
- ✓ **Identify the three core languages** — of a webpage — HTML, CSS and JavaScript — and state what each one does, using the house analogy.
- ✓ **Explain what a file extension is** — and correctly name the extensions `.html`, `.css`, `.jpg`/`.png` and recognise a website address (URL) when they see one.
- ✓ **Explain the difference** — between a *relative path* and an *absolute path*, and read a simple file path such as `images/logo.png`.
- ✓ **Set up a workspace** — in Visual Studio Code using the folder `webdesign-practice`.
- ✓ **Create, save and open** — a simple `index.html` file in Google Chrome without help.

SESSION 02

HTML BASICS

Week 1 — Module 1: HTML Foundations

WHAT YOU WILL LEARN

- ✓ **Explain what HTML is** — and state clearly that it describes *structure and meaning*, not appearance.
- ✓ **Write a complete HTML document** — with the correct order: ``, ``, ``, `
